How many decisions do you make in a day; ten, fifty, or maybe a hundred? The majority of decisions are basically inconsequential such as, 'Do I put my left shoe on first or my right one?' Other decisions carry a little weight like, 'Do I buy the Chevy or the Ford?' Very few are life altering in the vein of, 'Do I do drugs today or not?' It's not really a disease is a bold look at addiction. It is a serious, witty, and soul searching instruction manual of one way to beat addiction. CR Holland knows the life of an addict; he was one for almost twenty five years. He believes that addiction is not a disease, but a complicated manifestation of life experiences that culminate in disaster. This book examines primary research

And that is the thesis of the book; you as an addict have a choice to continue to feed your addiction or starve it into submission. Once you make your decision to end your addiction you will go through many twists and turns and It's not really a disease pinpoints these obstacles and enables you to have a strategy when they appear. Some obstacles will be universally common among addicts and other obstacles will be quite unique to your individual situation. Addicts and the reasons that we are addicts are so wildly different and unpredictable that not every scenario is possible to imagine but this book identifies and targets situations that you are most likely to experience. You don't have to be an addict to find this book to be of use. It will give yo

In this practical, engaging book, former elementary school teacher and university professor Brian Kissel asks teachers to go back to the roots of writing workshop. What happens when students, not planned teaching points, lead writing conferences? What happens when students, not tests, determine what they learned through reflection and self-evaluation? Writing instruction has shifted in recent years to more accountability, taking the focus away from the writer. This book explores what happens when empowered writers direct the writing workshop. Through stories from real classrooms, Brian reveals that no matter where children come from, they all have the powerful, shared need to be heard. And when children choose their writing topics, their lives unfold onto the page and teachers are educated by the young voices and bold choices of these writers. Written in an engaging, teacher-to-teacher style, this book focuses on four key components of writing workshop, with an eye on what happens when teachers step back and allow students to drive the instruction: Conferring sessions where students lead and teachers listen Author's Chair where students set the agenda and ask for feedback Reflection time and structures for students to set goals and expectations for themselves Mini-lessons that allow for detours based on students' needs, not teacher or curricular goals Each of the chapters includes practical ideas, a section of Guiding Beliefs, a list of Frequently Asked Questions, and some Digital Diversions to help teachers see the digital possibilities in their classrooms.
