Roger Fraser, the ever optimistic but perpetually put upon investment banking stock analyst-trouble shooter and occasional rugby player has more work and domestic issues to challenge his sensibilities. He skilfully manoeuvres from one demanding situation to the next, barely managing to extinguish the callous flames of fate seeming to constantly blight his endeavours and bite at his flesh. During his excursions into shocking social scandals and battling with egotistical megalomaniacs, he endlessly verges on disaster, but somehow always manages to survive. Roger pokes irreverent fun at the new

Establishment, single-handedly takes on female dragons, prevails against rampaging supermarket shoppers and trades wisecracks with a Brummy vicar, but invariably finds himself tethered to the doghouse, singing the blues.

This book deals with the current crises from a somewhat different the usual perspectives. It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone; it requires a more general approach, based on social costs. It does not deal with social costs according to the Pigouvian or the Coasian traditions. It draws on the work of Original Institutional Economics (OIE) such as Thorstein Veblen, Karl William Kapp, and Karl Polanyi, on Post-Keynesians such as Hyman Minsky and, in general, on authors who have provided insights beyond the conventional wisdom of economic thought.
