The times have changed. We need a fresh understanding of the meaning of success. What do Condoleezza Rice, Joe Torre, Bill Gates, Goldie Hawn, Mary Hart, Garry Kasparov, and Jack Welch have in common? All have talked at length with Maria Bartiromo about business, the world and their surprising, inspiring and uncommon ideas about the meaning of success. Their stories, those of an extraordinary range of other people from all walks of life, and Maria Bartiromo's personal insights are the foundation of The 10 Laws of Enduring Success. It is the guide for the extraordinary times we are living through. During bullish, optimistic periods, people seem to ride an upward wave with ease and confidence. The tangible evidence is right there for all to see--in their jobs, bank accounts, homes, families, and the admiration of their peers. But it is a fact of life that success, once earned, is not necessarily there to stay. If ever there was a cautionary tale about the fleeting nature of success, it is the events of recent years. But a funny thing happened. Faced with gut-wrenching realities, many people have started to re-evaluate the meaning of success in less superficial and impermanent ways. They're asking themselves hard questions that have long been ignored: about what's really important to them, and where the bedrock of their personal achievement lies. As Maria Bartiromo watched the financial drama from her front-row seat at the New York Stock Exchange, she began to re-assess the meaning of success--not just as one-off achievements, but as a durable, lifelong pursuit. Is there, she wondered, a definition of success that you can have permanently--in spite of the turmoil in your life, your job, or your bank account? This question is more important than ever, given the unpredictability of the current economy. --What are the intangibles that can't be measured or counted? --What are the qualities that aren't reflected in your title or on your business card? --And more practically, how can you remain successful even when the worst things happen to you? --Is it possible to build success from failure? It's lonely at the bottom of the heap,

when your BlackBerry stops buzzing, and the world moves on without you. Everyone wants to be close to success, and to have success. But what is success? How do you get it, and how do you keep it? As Maria interviewed some of the most successful people in the world, she felt the need to answer these questions: what makes these success stories tick? How did they achieve such leadership and power and how can one hold onto it, once you get it. What are the barriers to success and what is the bedrock to enduring success?

Becoming a market leader depends on everyone, including the CEO, unlearning the very things that made them successful. *Survival to Thrival* is a mind-meld of a three-time entrepreneur, a longtime venture capitalist, and other enterprise entrepreneurs, which demystifies building enterprise startups. Our mission is to help you succeed, to anticipate what is next, and most importantly, to let you know that you are not alone.

How to outsmart risk Risk has been defined as the potential for losing something of value. In business, that value could be your original investment or your expected future returns. The Risk-Driven Business Model will help you manage risk better by showing how the key choices you make in designing your business models either increase or reduce two characteristic types of risk—information risk, when you make decisions without enough information, and incentive-alignment risk, when decision makers' incentives are at odds with the broader goals of the company. Leaders who understand how the structure of their business model affects risk have the power to create wealth, revolutionize industries, and shape a better world. INSEAD's Karan Girotra and Serguei Netessine, noted operations and innovation professors who have consulted with dozens of companies, walk you through a business model audit to determine what key decisions get made in a business, when they get made, who makes them, and why we make the decisions we do. By changing your company's key decisions within this framework, you can fundamentally alter the risks that will impact your business. This book is for entrepreneurs and executives in companies involved in dynamic industries where the locus of risk is shifting, and includes lessons from Zipcar, Blockbuster, Apple, Benetton, Kickstarter, Walmart, and dozens of other global companies. The Risk-Driven Business Model demystifies business model risk, with clear directives aimed at improving decision making and driving your business forward.

Silicon Valley visionary John Chambers shares the lessons that transformed a dyslexic kid from West Virginia into one of the world's best business leaders and turned a simple router company into a global tech titan. When Chambers joined Cisco in 1991, it was a company with 400 employees, a single product, and about \$70 million in revenue. When he stepped down as CEO in 2015, he left a \$47 billion tech giant that was the backbone of the internet and a leader in areas from cybersecurity to data center convergence. Along the way, he had acquired 180 companies and turned more than 10,000 employees into millionaires. Widely recognized as an innovator, an industry leader, and one of the world's best CEOs, Chambers has outlasted and outmaneuvered practically every rival that ever tried to take Cisco on--Nortel, Lucent, Alcatel, IBM, Dell, and Hewlett-Packard, to name a few. Now Chambers is sharing his unique strategies for winning in a digital world. From his early lessons and struggles with dyslexia in West Virginia to his bold bets and battles with some of the biggest names in tech, Chambers gives readers a playbook on how to act before the market shifts, tap customers for strategy, partner for growth, build teams, and disrupt themselves. He also adapted those lessons to transform government, helping global leaders like French President Emmanuel Macron and Indian Prime Minister Narendra Modi to create new models for growth. As CEO of JC2 Ventures, he's now investing in a new generation of game-changing startups by helping founders become great leaders and scale their companies. Connecting the Dots is destined to become a business classic, providing hard-won insights and critical tools to thrive during the accelerating disruption of the digital age.
