Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.

The authors believe that prospective counselors must learn from the experience of practicing counselors. This enjoyable-to-read, inexpensive casebook offers nineteen live marriage and family therapy case studies that exemplify the major approaches taken to marriage and family counseling. The nineteen contributors provide real-life data about their counseling sessions, their decision-making process, their personal feelings, and even their mistakes. A common organization for each case study features: the problem, the diagnosis, goals, strategies, session-by-session accounts, results, and a "post-mortem." It is telling that the contributing authors have provided the case that touched them most, not their most successful case. For future counselors, therapists, and social workers.

The case focuses on two major challenges in deal making in emerging market economies—deal sourcing and negotiation—by focusing on a real (but disguised) Indian private equity deal. In 2010 Surya Tutoring was a fast-growing tutoring academy for high school students aspiring to gain admission to the prestigious Indian Institute of Technology (IIT). Surya's CEO, R. K. Sharma, wanted to expand its reach beyond Kota (a city of 1 million people in the northern state of Rajasthan), which had become the center of the IIT prep school industry and home to tens of thousands of students studying for the rigorous IIT entrance exam. Sharma knew there was vast untapped potential in the teeming Indian metropolises of Mumbai, Chennai, Delhi, and Bangalore, as well as in foreign markets such as Dubai and Australia. Sharma had received term sheets from two private equity firms willing to finance Surya's expansion. By the end of the month he needed to decide which to accept: the offer from big bulge bracket fund Blackgem, or the one from ZenCap, a small Indian firm based in Mumbai with which he had become intimately familiar during the past year.

PRACTICAL INVESTMENT MANAGEMENT is intended for learners studying investments for the first time. Very practical and applied, it is comprehensive enough for those who plan to become Certified Financial Analysts, but remains user-friendly due to its clarity of explanation and its pedagogy. The book contains all standard topics found in the typical modern investments text, but in addition, several chapters of Practical Investment Management are unique. In addition to being an increasingly important asset class, mortgage-backed securities provide some thought-provoking questions on fixed income valuation. Bob Strong has an engaging writing style along with practical experience making this a very solid, yet very friendly, book for readers.

Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and

transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, *How to Watch Television* is designed to engender classroom discussion among television critics of all backgrounds.
