In the struggle for freedom and justice, organizers and activists have often turned to art, creativity, and humor. In this follow-up to the bestselling *Beautiful Trouble: A Toolbox for Revolution*, *Beautiful Rising* showcases some of the most innovative tactics used in struggles against autocracy and austerity across the Global South. Based on face-to-face jam sessions held in Yangon, Amman, Harare, Dhaka, Kampala, and Oaxaca, *Beautiful Rising* includes stories of the Ugandan organizers who smuggled two yellow-painted pigs into parliament to protest corruption; the Burmese students' 360-mile-long march against undemocratic and overly centralized education reforms; the Lebanese "honk at parliament" campaign against politicians who had clung to power long after their

term had expired; and much more.

The cover motif is a piece of old German money. It is a Reichsbanknote issued on August 22, 1923 for one hundred million marks. Nine years earlier, that many marks would have been about 5 percent of all the German marks in the world, worth 23 million American dollars. On the day it was issued, it was worth about twenty dollars. Three months later, it was worth only a few thousandths of an American cent. The process by which this occurs is known as inflation. A few years before, in 1920 and 1921, Germany had enjoyed a remarkable prosperity envied by the rest of the world. Prices were steady, business was humming, everyone was working, the stock market was

skyrocketing. The Germans were swimming in easy money. Within the year, they were drowning in it. Until it was all over, no one seemed to notice any connection between the earlier false boom and the later inflationary bust. In this book, Jens O. Parsson performs the neat trick of transforming the dry economic subject of inflation into a white-knuckles kind of blood-chiller. He begins with a freewheeling account of the spectacular inflation that all but destroyed Germany in 1923, taking it apart to find out both what made it tick and what made it finally end. He goes on to look at the American inflation that was steadily gaining force after 1962. In terms clear and fascinating enough for any layman, but with technical validity enough for any economist, he applies the lessons gleaned from the German inflation to find that too much about the American inflation was the same, lacking only the inexorable further deterioration that time would bring. The book concludes by charting out all the possible future prognoses for the American inflation, none easy but some much less catastrophic than others. Mr. Parsson brings much new light to bear on this subject. He lays on the line in tough, spare language exactly how and why the American inflation was caused, exactly who was responsible for causing it, exactly who unjustly benefited and who suffered from the inflation, exactly why the government could not permit the inflation to stop or even to cease growing worse, exactly who was going to pay the ultimate price, and exactly what would have to be done to avert the ultimate

conclusion. This book packs a wallop. It is not for the timid, and it spares no tender sensibilities. The conclusions it reaches are shocking and are bound to provoke endless dispute. If they proved to approximate even remotely the correct analysis of the American inflation, hardly any American citizen could escape being the prey of inflation and no one could afford not to know where the inflation was taking him. In the economic daily lives of everyone, nothing will be the same after this book as it was before.

An Inside View of Latin American Microfinance

This is a history of the famous old post erected deep within Apache country in Arizona where anyone stepping into the territory met with vicious, horrendous attack. The post served courageously to protect an ever-increasing influx of settlers into a

wild and fearsome territory. With the Spanish reach for empire, colonization, and usurpation of Indian lands, the Apaches retaliated in the only way they knew how, by vicious and sustained attack upon anyone violating Apache territory. Emigrants, lone travelers, overland-mail riders and itinerant merchants were gunned down, slaughtered, mutilated and roasted alive. If the white man wanted the gold and silver hiding in the hills the he would have to win access to the precious metals the hard way. This is the reason of Fort Huachuca's existence. One of the most savage contests of arms between dedicated and able frontier army soldiers and implacable Indian braves. This confrontation culminated in the inevitable reduction of the primitive by the technologically advanced. This was not brought on so much by the introduction of equipment and machines, however, as by persistence and the sheer weight of numbers. Fort Huachuca saw it all. It began in a primitive setting from cavalry charge and marathon infantrymen to

being equipped with the most modern equipment of real bugles and crackling loud-speakers. That shows how long the ugly battle continued.

This book covers the state of the art of energy efficiency in household appliances and lighting which can be used now and in the near future to achieve significant and cost-effective energy savings. Recent developments in advanced appliance and lighting technologies by some of the largest manufacturers are also presented. Although energy-efficient household appliances and lighting technologies

can save a huge amount of electricity, they still have not been widely adopted. The barriers which can hinder the adoption of those technologies are presented. Policies and programmes to promote the large-scale penetration of energy-efficient technologies and the market transformation are featured in the book, describing the experiences gained in different parts of the world. This extensive coverage includes contributions from relevant institutions in the European Union, North America, Latin America, Asia, Australia and New Zealand.

The history of Faraway Ranch and the Erickson-

Riggs family is a rich and complex story. However, if viewed simplistically as we often have, the Faraway Ranch story is one more tale of Western settlement. Two Swedish immigrants, one a soldier and the other an officer's family servant, meet at a frontier military post, fall in love and decide to homestead along the banks of Bonita Creek in the Chiricahua Mountains.... There comes a time in every girl's life, when she has to choose good or choose bad. Amy Asbury chose bad, hands down. Good meant wallflowers, secretaries and subservient wives. Bad meant power- and a possible escape from a life of secrets. At twelve years old she was trying to make sense of a drug-addicted father and his disturbing behavior. By fifteen she was dealing with horrendous depression, blackouts and rape. At sixteen she was in a mental institution for suicidal tendencies and violent behavior. She knew she could never be normal. The only place for a girl like her was Hollywood. Read the true story of the social ascent (and eventual decline) of a girl in the Sunset Strip music scene of the early 1990's.

From crazy parties to glittered junkies and man-eating strippers, Amy has chronicled what life was like back in the days of excess and debauchery. It is not just a fascinating look into an amusing time in pop culture, but also details the mindset of a young woman trying to find confidence and self-worth in a life full of pain and chaos. The party came screeching to a halt when the Grunge movement took over and heroin became more prominent. How far off track can a person go before it's too late?

Nuovo Vesuvio. The "family" restaurant, redefined. Home to the finest in Napolitan' cuisine and Essex County's best kept secret. Now Artie Bucco, la cucina's master chef and your personal host, invites you to a special feast...with a little help from his friends. From arancini to zabaglione, from baccala to Quail Sinatra-style, Artie Bucco and his guests, the Sopranos and their associates, offer food lovers one hundred Avellinese-style recipes and valuable preparation tips. But that's not all! Artie also brings you a cornucopia of precious Sopranos artifacts that includes photos from the old country; the first Bucco's Vesuvio's menu from 1926; AJ's school essay on "Why I Like

Food"; Bobby Bacala's style tips for big eaters, and much, much more. So share the big table with: Tony Soprano, waste management executive "Most people soak a bagful of discount briquettes with lighter fluid and cook a pork chop until it's shoe leather and think they're Wolfgang Puck." Enjoy his tender Grilled Sausages sizzling with fennel or cheese. Warning: Piercing the skin is a fire hazard. Corrado "Junior" Soprano, Tony's uncle "Mama always cooked. No one died of too much cholesterol or some such crap." Savor his Pasta Fazool, a toothsome marriage of cannellini beans and ditalini pasta, or Giambott', a grand-operatic vegetable medley. Carmela Soprano, Tony's wife "If someone were sick, my inclination would be to send over a pastina and ricotta. It's healing food." Try her Baked Ziti, sinfully enriched with three cheeses, and her earthy 'Shcarole with Garlic. Peter Paul "Paulie Walnuts" Gualtieri, associate of Tony Soprano "I have heard that Eskimos have fifty words for snow. We have five hundred words for food." Sink your teeth into his Eggs in Purgatory-eight eggs, bubbling tomato sauce, and an experience that's pure heaven. As Artie says, "Enjoy, with a thousand meals and a thousand laughs. Buon' appetito!"

Examines social and cultural phenomena through the lens of different television shows. We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it ‘good’ or ‘bad.’ Rather, criticism uses the close examination of a television program to explore that program’s cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television* brings together forty original essays from today’s leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium’s earliest days to contemporary online transformations of television, *How to*

Watch Television is designed to engender classroom discussion among television critics of all backgrounds.

Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows

from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap *Twentieth-Century Building Materials* was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading

experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines. *Analysis for Financial Management* John Wiley & Sons
