In this
groundbreaking and
highly practical
book, Number Sense
Routines: Building
Numerical Literacy

Every Day in Grades
K-3, author Jessica
Shumway proposes that
all children have
innate number sense
which can be
developed through
daily exercise.
Shumway created a
series of math
routines designed to
help young students
strengthen and build
their facility with
numbers. These quick
5, 10, or 15 minute
exercises are easy to
implement as an add-
on to any elementary

math curriculum.
Understanding Number
Sense: Students with
strong number sense
understand numbers,
how to subitize,
relationships among
numbers, and number
systems. They make
reasonable estimates,
compute fluently, use
reasoning strategies,
and use visual models
to solve problems.
Number Sense Routines
supports the early
learner by instilling
the importance of
daily warm-ups and

explains how they benefit developing math minds for long-term learning. Real Classroom Examples: Shumway compiled her classroom observations from around the country. She includes conversations among students who practice number sense routines to illustrate them in action, how children's number sense develops with daily use, and math strategies students

learn as they develop their numerical literacy through self-paced practice. Assessment Strategies: Number Sense Routines demonstrates the importance of listening to your students and knowing what to look for. Teachers will gain a deeper understanding of the underlying math skills and strategies students learn as they develop numerical literacy.

Shumway writes, As you read, you will step into various classrooms and listen in on students' conversations, which I hope will give you insight into the power of number sense routines and the impact they have on students' number sense development. My hope is that going into the classroom, into students' conversations, and into their thought processes, you will

come away with new
ideas and tools to
use in your own
classroom.
