In this charming and the virtues of departure from Lake real love. Aspiring Wobegon, writer Larry Wyler bestselling author leads a quiet, Garrison Keillor tells decent life with his a hilarious and do-gooder wife, Iris, heartwarming tale in St. Paul, of ambition, Minnesota, but he success and failure, wants more. When

his literary debut becomes a hit, he departs for a Manhattan apartment, a job at the New Yorker, and three- martini lunches with the great editor, William Shawn. But when his second novel bombs and he finds himself in the grip of writer's block, Wyler discovers that success—and the New York publishing scene—is a fickle mistress, indeed. Creatively barren, nearly destitute, and longing for Iris, he accepts a job writing "Ask Mr. Blue," a column doling out advice to the lovelorn. It may not be glamorous work, but through it Wyler discovers what's really important and sets

out to win back the woman he left behind. Leaving Glorytown Lerner Publications At approximately 8:45 a.m. on 6 December 1917, the Belgian Relief vessel IMO struck the munitions-laden freighter Mont-Blanc in Halifax Harbour. The Mont-Blanc exploded in a devastating 2.9 kiloton blast, which killed 2,000 people and injured 9,000. More than 6,000 people were made homeless, and an additional 12,000 were left without shelter. Bearing Witness tells the story of the

Explosion, and the catastrophic damage it caused, through the eyes and words of more than two dozen journalists and record keepers who experienced it first hand. Their accounts reveal a unique perspective, offering new detail about the tragedy and providing insight into the individuals who struggled to articulate the magnitude of the shocking event to the rest of the world. In addition to the original work by journalists and record keepers, Michael Dupuis provides over 30

photographs and illustrations, several previously unseen, and a detailed timeline of journalistic activities from the time of the Explosion on December 6 to December 16.

The Cowkeeper's Wish Lerner Classroom
In this addition to the Scientists in the Field series, readers join scientists as they tackle something unusual in the world of ecosystems: colonization.

Not a colonization by people, but one of cells, seeds, spores, and other life forms that blow in, fly in, float in, and struggle to survive on the beautiful but harsh new island of Surtsey.

Unending war leads to the discovery of uneasy truths when two teens question the status quo in this riveting thriller. For as long as Tessa can remember, her country has been at war. When local golden boy Gideon Thrall is awarded a medal for courage, it's a rare bright spot for everyone in Tessa's town—until Gideon refuses the award, claims he was a coward, and runs away. Tessa is bewildered, and she can't help but follow Gideon to find out the truth. But Tessa is in for more than she bargained for. Before she knows it, she has stowed away on a rogue airplane and is headed for enemy territory. But all that pales when she

discovers a shocking truth that rocks the foundation of everything she's ever believed—a truth that will change the world. Is Tessa strong enough to bring it into the light?

Bearing Witness

Macmillan

In 1917, the port of Halifax, Nova Scotia, was crowded with ships leaving for war-torn Europe. On December 6th, two of them—the Mont Blanc and the Imo—collided in the Narrows, a hard-to-navigate stretch of the harbor. Ablaze, and with explosions on her deck filling the sky, the Mont Blanc grounded against the city's docks. As thousands rushed to their windows and into the streets to watch, she exploded with such force that

the 3,121 tons of her iron hull vaporized in a cloud that shot up more than 2,000 feet; the explosion was so unusual that Robert Oppenheimer would study its effects to predict the devastation of an atomic bomb. The blast caused a giant wave that swept over parts of the city, followed by a slick, black rain that fell for ten minutes. Much of the city was flattened, and not one in 12,000 buildings within a 16-mile radius left undamaged. More than 1,600 Halifaxians were killed and 6,000 injured; and within twenty-four hours, a blizzard had isolated Halifax from the world. Set vividly against the background of World War I, *Curse of the Narrows* is the first

major account of the world's largest pre-atomic explosion, the epic relief mission from Boston, and the riveting trial of the Mont Blanc's captain and pilot. Laura M. Mac Donald is as adept at describing the dynamics of a chain reaction explosion as she is at chronicling unforgettable human dramas of miraculous survival, unfathomable loss, and the medical breakthroughs in pediatrics and eye surgery that followed the disaster. Using primary sources—many of which haven't been read in decades and—with a wonderful feel for narrative history, Mac Donald chronicles one of the most compelling and dramatic events of the 20th century.

Mystery Fish

Penguin

What if you could live again and again, until you got it right? On a cold and snowy night in 1910, Ursula Todd is born to an English banker and his wife. She dies before she can draw her first breath. On that same cold and snowy night, Ursula Todd is born, lets out a lusty wail, and embarks upon a life that will be, to say the least, unusual. For as she grows, she also dies, repeatedly, in a variety of ways, while the young century marches on towards its second cataclysmic world war. Does Ursula's apparently infinite

number of lives give her the power to save the world from its inevitable destiny? And if she can -- will she?

Darkly comic, startlingly poignant, and utterly original: this is Kate Atkinson at her absolute best.

The Always War
Perfection

Learning

In this absorbing memoir, by turns humorous and heartbreaking, Eduardo Calcines recounts his boyhood and chronicles the conditions that led him to wish above all else to leave behind his beloved extended family and his home for a

chance at a better future. Eduardo F.

Calcines was a child of Fidel Castro's Cuba; he was just three years old when Castro came to power in January 1959. After that, everything

changed for his family and his country. When he was ten, his family applied for an exit visa to emigrate to America and he was ridiculed by his schoolmates and even his teachers for being a traitor to his country. But even worse, his father was sent to an agricultural reform camp to do hard

labor as punishment for daring to want to leave Cuba. During the years to come, as he grew up in Glorytown, a neighborhood in the city of Cienfuegos, Eduardo hoped with all his might that their exit visa would be granted before he turned fifteen, the age at which he would be drafted into the army.

HarperCollins
On December 6, 1917, the French munitions ship Mont Blanc and the Norwegian war-relief vessel Imo collided in the harbour at Halifax,

Nova Scotia. That accident sparked a fire and an apocalyptic explosion that was the largest man-made blast prior to the 1945 dropping of the atomic bomb on Hiroshima. Together with the killer tsunami that followed, the explosion devastated the entire city in the wink of an eye and instantly killed more than two thousand people. While much has been written about the disaster, there is still more to the story, including the investigation of the key figures involved, the histories of the ships that collided and the confluence of

circumstances that brought these two vessels together to touch off one of the most tragic man-made disasters of the twentieth century. The Halifax Explosion is a fresh, revealing account that finally answers questions that have lingered for a century: Was the explosion a disaster triggered by simple human error? Was it caused by the negligence of the ships' pilots or captains? Was it the result of shortcomings in harbour practices and protocols? Or was the blast—as many people at the time insisted—the result of sabotage carried out by

<p>wartime German agents? December 6, 2017, marks the centennial of the great Halifax explosion. unforgettable story told in John U. Bacon's *The Great Halifax Explosion: a ticktock account of fateful decisions that led to doom, the human faces of the blast's 11,000 casualties, and the equally moving individual stories of those who lived and selflessly threw themselves into urgent rescue work that saved thousands. The shocking scale of the disaster stunned the world, dominating global headlines even amid the calamity of the First World War. Hours after the blast, Boston sent trains and ships filled with doctors, medicine, and money. The explosion would revolutionize pediatric medicine; transform U.S.-Canadian relations; and provide physicist J. Robert Oppenheimer, who studied the Halifax explosion closely when developing the atomic bomb, with history's only real-world case study demonstrating the lethal power of a weapon of mass destruction. Mesmerizing and inspiring, Bacon's deeply-researched narrative brings to life the tragedy, bravery, and surprising afterlife of one of the most dramatic events of modern times.*
