It is a guide coat, in a rattle can from 3M. A black lacquer that sprays in little dots. Then as you block sand, any low places won't have the guide coat sanded off, so you know to deal with that area. The 'old' solution was to use different colors of primer and sand the top color down to the underneath color.

### **How to Block-sand a primer coat to prepare for auto body ...**

There are dry rub on guide coats and aerosol spray versions, but they both work the same way. By spraying a contrasting

color over the primer, when sanded the guide coat quickly come off the high spots, and stays in the low spots guiding where you need to further block. Guide coat is like no build paint, sanding off with the least effort possible. Sanding verses Shaping. Both sanding and shaping are done using sand paper of different grits.

### **How to get Perfect Body Panels with Block Sanding ...**

Using a small sanding block on a wavy panel will simply make the block ride over these waves. The panel will indeed become smoother but it will still be wavy. Therefore, instead of using a short sanding block, use a long sanding board. This will bridge the high and low spots of the panel, smoothing out the wavy panel texture.

On flat surfaces, Jeff uses a standard sanding block. He sands in various directions to make sure he sands evenly and reduces the risk of sanding too much in one spot of the clearcoat. This step...

Guide coat when sanding clear. -  
autobodystore.com

Cut the peel down so that only the pits are left using the 600-800 and then dry guidecoat and use p1000 to remove all of the guidecoat. After 1000 it's on to 1500 and 2000 and then buff. The guidecoat doesn't work on unsanded clear as it doesn't stick to anything in my experience. Quick NavigationGeneral DiscussionTop.

How To Correctly Do Auto Sanding On Bodywork Repairs

My next coat, the Primer Sealer, calls for the primer to be sanded to 400 or 600 grit. Check your product to see what grit you should finish with. I think 180 was plenty

good to start with (no need to start block sanding with a 60 or 100 grit.), and the step from 180 to 400 was fine, with no between grits necessary. You could do all this leveling by feel, or buy a spray-can of SEM 38203 Guide Coat (black).
