The first volume in a pioneering account of Oliver

Cromwell--providing a major new interpretation of one of the greatest figures in history Oliver Cromwell (1599-1658)--the only English commoner to become the overall head of state--is one of the great figures of history, but his character was very complex. He was at once courageous and devout, devious and self-serving; as a parliamentarian, he was devoted to his cause; as a soldier, he was ruthless. Cromwell's speeches and writings surpass in quantity those of any other ruler of England before Victoria and, for those seeking to understand him, he has usually been taken at his word. In this remarkable new work, Ronald Hutton untangles the facts from the fiction. Cromwell, pursuing his devotion to God and cementing his Puritan support base, quickly transformed from obscure provincial to military victor. At the end of the first English Civil War, he was poised to take power. Hutton reveals a man who was both genuine in his faith and deliberate in his dishonesty--and uncovers the inner workings of the man who has puzzled biographers for centuries.

The forgotten story of how ordinary families managed financially in the Victorian era--and struggled to survive despite increasing national prosperity "A powerful story of social realities, pressures, and the fracturing of traditional structures."--Ruth Goodman, Wall Street Journal "Deeply researched and sensitive."--Simon Heffer, Daily Telegraph, "Best History Books of 2020" Nineteenth century Britain saw remarkable economic growth and a rise in real wages. But not everyone shared in the nation's wealth. Unable to earn a sufficient income themselves,

working-class women were reliant on the 'breadwinner wage' of their husbands. When income failed, or was denied or squandered by errant men, families could be plunged into desperate poverty from which there was no escape. Emma Griffin unlocks the homes of Victorian England to examine the lives - and finances - of the people who lived there. Drawing on over 600 working-class autobiographies, including more than 200 written by women, Bread Winner changes our understanding of daily life in Victorian Britain.

From Jewish clothing merchants to Bangladeshi curry houses, ancient docks to the 2012 Olympics, the area east of the City has always played a crucial role in London's history. The East End, as it has been known, was the home to Shakespeare's first theater and to the early stirrings of a mass labor movement; it has also traditionally been seen as a place of darkness and despair, where Jack the Ripper committed his gruesome murders, and cholera and poverty stalked the Victorian streets. In this beautifully illustrated history of this iconic district, John Marriott draws on twenty-five years of research into the subject to present an authoritative and endlessly fascinating account. With the aid of copious maps, archive prints and photographs,

and the words of East Londoners from seventeenth-century silk weavers to Cockneys during the Blitz, he explores the relationship between the East End and the rest of London, and challenges many of the myths that surround the area.

"In *The Four Nations*, Frank Welsh offers a lively narrative history of the four component parts of the British Isles - England, Ireland, Scotland, and Wales. Moving from the Roman period, which first defined many of the current internal boundaries, through the present day, Welsh describes the history of each nation, their interactions, and the impacts of crises ranging from the Norman Invasion to the Protestant Reformation to the two world wars of the twentieth century. Along the way, Welsh questions many cherished illusions and poses some awkward questions: to what extent were Scotland, Ireland, and Wales victims of predatory English aggression? How serious is the frequently invoked specter of national fragmentation?"--BOOK

The first history of London to show how immigrants have built, shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken. But the history of London has always been a history of immigration. Panikos Panayi explores the rich and vibrant story of London— from its founding two millennia ago by Roman invaders, to Jewish and German immigrants in the Victorian period, to the Windrush generation invited from Caribbean countries in the twentieth century. Panayi shows how migration has been fundamental to London's economic, social, political and cultural development. "Migrant City sheds light on the various ways in which newcomers have shaped London life, acting as cheap labour, contributing to the success of its financial sector, its curry houses, and its football clubs. London's economy has long been driven by migrants, from earlier continental financiers and more recent European Union citizens. Without immigration, fueled by globalization, Panayi argues, London would not have become the world city it is today.

A new history that overturns the received wisdom that science displaced magic in Enlightenment Britain--named a Best Book of 2020 by the Financial Times In early modern Britain, belief in prophecies, omens, ghosts, apparitions and fairies was commonplace. Among both educated and ordinary people the absolute existence of a spiritual world was taken for granted. Yet in the eighteenth century such certainties were swept away. Credit for this great change is usually given to science - and in particular to the scientists of the Royal Society. But is this justified? Michael Hunter argues that those pioneering the change in attitude were not scientists but freethinkers. While some scientists defended the reality of supernatural phenomena, these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and, by extension, of magic and other forms of superstition. Even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti-magical views, slowly change did come about. When it did, this owed less

to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place.
