Book of 2017 An ode to Put the Damn
Guns Down, this is New York Times
bestselling author Jason Reynolds's
electrifying novel that takes place in sixty
potent seconds—the time it takes a kid to
decide whether or not he's going to murder
the guy who killed his brother. A cannon. A
strap. A piece. A biscuit. A burner. A
heater. A chopper. A gat. A hammer A tool
for RULE Or, you can call it a gun. That's
what fifteen-year-old Will has shoved in the
back waistband of his jeans. See, his
brother Shawn was just murdered. And Will
knows the rules. No crying. No snitching.
Revenge. That's where Will's now
heading, with that gun shoved in the back
waistband of his jeans, the gun that was his
brother's gun. He gets on the elevator,
seventh floor, stoked. He knows who he's
after. Or does he? As the elevator stops on
the sixth floor, on comes Buck. Buck, Will
finds out, is who gave Shawn the gun
before Will took the gun. Buck tells Will to
check that the gun is even loaded. And
that's when Will sees that one bullet is
missing. And the only one who could have
fired Shawn's gun was Shawn. Huh. Will
didn't know that Shawn had ever actually
USED his gun. Bigger huh. BUCK IS
DEAD. But Buck's in the elevator? Just as
Will's trying to think this through, the door
to the next floor opens. A teenage girl gets
on, waves away the smoke from Dead
Buck's cigarette. Will doesn't know her,
but she knew him. Knew. When they were
eight. And stray bullets had cut through the

playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Reveals the life of Lakota healer

Nicholas Black Elk as he led his tribe's battle against white settlers who threatened their homes and buffalo herds, and describes the victories and tragedies at Little Bighorn and Wounded Knee. Reprint.

The Wretched of the Earth Penguin UK

There are currently two major theories about the role of the hippocampus, a distinctive structure in the back of the temporal lobe. One says that it stores a cognitive map, the other that it is a key locus for the temporary storage of episodic memories. A. David Redish takes the approach that understanding the role of the hippocampus in space will make it possible to address its role in less easily quantifiable areas such as

memory. Basing his investigation on the study of rodent navigation--one of the primary domains for understanding information processing in the brain--he places the hippocampus in its anatomical context as part of a greater functional system. Redish draws on the extensive experimental and theoretical work of the last 100 years to paint a coherent picture of rodent navigation. His presentation encompasses multiple levels of analysis, from single-unit recording results to behavioral tasks to computational modeling. From this foundation, he proposes a novel understanding of the role of the hippocampus in rodents that can shed light on the role of the hippocampus in

primates, explaining data from primate studies and human neurology. The book will be of interest not only to neuroscientists and psychologists, but also to researchers in computer science, robotics, artificial intelligence, and artificial life.

A Year Without a Name Pearson Higher Ed
Winner of the 1974 National Book Award "A screaming comes across the sky. . ." A few months after the Germans' secret V-2 rocket bombs begin falling on London, British Intelligence discovers that a map of the city pinpointing the sexual conquests of one Lieutenant Tyrone Slothrop, U.S. Army, corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial

superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in The New Republic as “the most profound and accomplished American novel since the end of World War II.”

Obsolete English names of North American birds and their modern equivalents Verso Books

Always reflective of the latest research and thinking in the field, Patricia Miller’s acclaimed text offers an ideal way to help students understand and distinguish the major theoretical schools of child development. This fully updated new edition includes a new focus on biological theories of development, and offers new instructor resource materials.

The Way of Kings Jones & Bartlett Publishers

Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have

lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, *The Emperor of All Maladies* provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

Long Way Down Simon and Schuster
A program that focuses attention on schoolwide wellness during four weeks of the school year. Helps schools incorporate coordinated activities that will enable them to meet national standards and guidelines for physical activity and nutrition.

Math Mind Benders: Warm up Calvin and Hobbes
Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important

opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We

also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts. *Everything I Never Told You* Human Kinetics The sixtieth anniversary edition of Frantz Fanon's landmark text, now with a new

introduction by Cornel West First published in 1961, and reissued in this sixtieth anniversary edition with a powerful new introduction by Cornel West, Frantz Fanon's *The Wretched of the Earth* is a masterful and timeless interrogation of race, colonialism, psychological trauma, and revolutionary struggle, and a continuing influence on movements from Black Lives Matter to decolonization. A landmark text for revolutionaries and activists, *The Wretched of the Earth* is an eternal touchstone for civil rights, anti-colonialism, psychiatric studies, and Black consciousness movements around the world. Alongside Cornel West's introduction, the book features critical essays by Jean-Paul Sartre and Homi K. Bhabha. This sixtieth anniversary edition of Fanon's most famous text stands proudly alongside such pillars of anti-colonialism and anti-racism as Edward Said's *Orientalism* and *The Autobiography of Malcolm X*.

The Giver Quartet Penguin

A New York Times Book Review Notable Book of the Year • A New York Times Book Review Editors' Choice • Winner of the Alex Award and the Massachusetts Book Award • Named a Best Book of the Year by NPR, San Francisco Chronicle, Entertainment Weekly, The Huffington Post, BuzzFeed, Grantland Booklist, St. Louis Post-Dispatch, Shelf Awareness, Book Riot, School Library Journal, Bustle, and Time Our New York The acclaimed debut novel by the author of *Little Fires Everywhere* and *Our Missing Hearts* "A taut tale of ever deepening and quickening suspense." —O, the Oprah Magazine "Explosive . . . Both a propulsive mystery and a profound examination of a mixed-race family." —Entertainment Weekly "Lydia is dead. But they don't know this yet." So begins this exquisite novel about a Chinese American family living in 1970s small-town Ohio. Lydia is

the favorite child of Marilyn and James Lee, and Caribbean, but what in reality did we find?" her parents are determined that she will fulfill the dreams they were unable to pursue. But when Lydia's body is found in the local lake, the delicate balancing act that has been keeping the Lee family together is destroyed, tumbling them into chaos. A profoundly moving story of family, secrets, and longing, *Everything I Never Told You* is both a gripping page-turner and a sensitive family portrait, uncovering the ways in which mothers and daughters, fathers and sons, and husbands and wives struggle, all their lives, to understand one another.

Speak Out brings together the writings of Brixton Black Women's Group for the first time, in a landmark collection. Established in response to the lack of interest in women's issues experienced in male-dominated Black organisations, the Brixton Black Women's Group's aim was to create a distinct space where women of African and Asian descent could meet to focus on political, social and cultural issues as they affected black women. BBWG published its own newsletter, *Speak Out*, which kept alive the debate about the relevance of feminism to black politics and provided a black women's perspective on immigration, housing, health and culture.

Cosmos Rockefeller Univ. Press
Newbery Award-winning and New York Times bestselling author Matt de la Peña's *Mexican WhiteBoy* is a story of friendship, acceptance, and the struggle to find your identity in a world

of definitions. Danny's tall and skinny. Even though he's not built, his arms are long enough to give his pitch a power so fierce any college scout would sign him on the spot. Ninety-five mile an hour fastball, but the boy's not even on a team. Every time he gets up on the mound he loses it. But at his private school, they don't expect much else from him. Danny's brown. Half-Mexican brown. And growing up in San Diego that close to the border means everyone else knows exactly who he is before he even opens his mouth. Before they find out he can't speak Spanish, and before they realize his mom has blond hair and blue eyes, they've got him pegged. But it works the other way too. And Danny's convinced it's his whiteness that sent his father back to Mexico. That's why he's spending the summer with his dad's family. Only, to find himself, he may just have to face the demons he refuses to see--the demons that are right in front of his face. And open up to a friendship he never saw coming. Matt de la Peña's critically acclaimed novel is an intimate and moving story that offers hope to those who least expect it. "[A] first-rate exploration of self-identity."-SLJ "Unique in its gritty realism and honest portrayal of the complexities of life for inner-city teens...De la Peña poignantly conveys the message that, despite obstacles, you must believe in yourself and shape your own future."-The Horn Book Magazine "The baseball scenes...sizzle like Danny's fastball...Danny's struggle to find his place will speak strongly to all teens, but especially to those of mixed race."-Booklist "De la Peña blends sports and street together in a satisfying search for personal identity."-Kirkus Reviews "Mexican WhiteBoy...shows that no matter what obstacles you face, you can still reach your dreams with a positive attitude. This is more than a book about a baseball player--this is a book about life."-Curtis

be useful to ornithologists, serious birders,
historians, and collectors of natural history
books. Includes the scientific names of the
birds listed, as well as sources used for
compiling the index.

The Emperor of All Maladies Macmillan

In Permanent Present Tense Suzanne Corkin
tells the incredible story of the amnesiac Henry
Gustave Molaison - known only as H.M. until
his death in 2008 - and what he taught medical

science, neuroscience and the world. In 1953,
at the age of twenty-seven, Molaison
underwent an experimental psychosurgical
procedure intended to alleviate his debilitating
epilepsy. The outcome was devastating - when
Molaison awoke he was unable to form new
memories and for the rest of his life would be
trapped in the moment. But Molaison's tragedy
would prove a gift to humanity, illuminating
functions and structures of the brain and
revolutionizing the neuroscience of memory.
His amnesia became a touchstone for memory
impairment in other patients. For nearly five
decades, distinguished neuroscientist Suzanne
Corkin studied Molaison and oversaw his care.
Her account of his life and legacy in Permanent
Present Tense reveals an intelligent man who,
despite his profound amnesia, was altruistic,
friendly, open, and humorous. She explores
how his case transformed an entire field,
helping to address eternal questions. How do

we store and retrieve memories? How do we know that there are different kinds of memory, controlled by different brain circuits? Is our identity bound up with remembering? If you can recall people or events for only a few seconds and cannot learn from the past or plan the future, can you still live a meaningful life? Permanent Present explores the astonishing complexity of the human brain with great clarity, sensitivity, and grace, showing how one man's story challenged our very notions of who we are. Suzanne Corkin is Professor of Behavioral Neuroscience and head of the Corkin Lab at MIT. The author of nine books, Corkin lives in Charlestown, Massachusetts. 'A fascinating account of perhaps the most important case study in the history of neuroscience, rich with implications for our understanding of the brain, our experience, and what it means to be human' Steven Pinker, author of 'How the Mind Works' and 'The Stuff of Thought' 'The best way to understand memory is to witness the ways it can disassemble. In this remarkable book, Suzanne Corkin gifts us with a rare insider's view, revealing how a man who could not remember his immediate past so profoundly influenced science's future' David Eagleman, neuroscientist and New York Times-bestselling author of 'Incognito: The Secret Lives of the Brain' 'Suzanne Corkin has written an enjoyable and sensitive story of H.M.'s life and what it has taught us about memory. Millions of patients have been the source of advances in science but few are celebrated as individuals. We learn through H.M. that 'Our brains are like hotels with eclectic arrays of guests-homes to different kinds of memory, each of which occupies its own suite of rooms' Philip A. Sharp, Institute Professor, Massachusetts Institute of Technology, and winner of the Nobel Prize in Physiology or Medicine 'Drawing

on her unique investigations over more than
four decades, neuroscientist Suzanne Corkin
relates the fascinating story of how one
severely amnesic man transformed our
understanding of mind, brain, and memory'
Howard Gardner, author of 'Multiple
Intelligences'
