The Approval Server comes with the BMC Action Request System platform and is installed independently of the BMC Remedy ITSM suite applications.  
Recommendation: You must also be a registered as an active Process Administrator with Full Admin authority or an AR System Administrator to access the BMC Approval Server administration console. Typically, these permissions are needed

---

only if you are extending or customizing the out-of-the-box approval server configurations.

*Knowledge Management permissions - BMC Documentation*

Administration change guidelines for BMC Helix ITSM and BMC Remedy ITSM In general, changes to administrative actions might cause changes to the structure of the production environment. Because of these structural changes, you must adopt a change control process and ensure that the changes are managed and tested before introducing them into the production environment.
