Technology Acceptance of Connected Services in the Automotive Industry Bentley Publishers

INTRODUCTION There comes a time when the elastic snaps. When you push yourself to breaking point, and everything crashes down. My breaking point came on a gloomy Monday morning commute in 2015. Sitting in my car, waiting for the lights to change, I looked at two guys in their cars on either side of me. They looked as miserable as I felt. At that moment, I burst into tears. “ What the fuck was I doing with my life? ” I was unhappy in my personal life and hated my job. I couldn ’ t see a way out. I was too invested in my career; too old to start again. Looking back, I didn ’ t know jack shit about building a fitness business. Corporate marketing is one thing. Doing everything from scratch alone in a different industry is another. I didn ’ t have a creative agency or a multimillion-pound budget. All I had was a Personal Trainer certificate and the ironparadisefitness.com domain name. Nevertheless, I started building my online empire. Or, as I now refer to it, pissing in the wind for two years. I would write lousy articles, post selfies, and wonder why clients weren ’ t beating down my virtual door. Desperate to carve a way out of corporate life, I vowed not to quit. My business was my obsession. Going out, meeting friends, and taking a break were a rarity. I thought it was the only way to be successful. I became a hermit. A recluse. Like the creepy guy kids fear in horror

movies. “ That ’ s Old Man Mitchell from No. 29. He never leaves the house. ” “ Some say he only goes outside to dispose of the dead bodies. ” I wasn ’ t that bad, but my social life went on ice. I studied nutrition and learned the intricacies of exercise mechanics. I read books and invested in courses on social media, copywriting, and web design. Iron Paradise Fitness had consumed my entire life, and I loved it. It was the fire in my belly I ’ d been missing. The passion I needed. Although, it did make for awkward conversations on Tinder dates. “ What do you like to do in your spare time? ” The innocent question would come. “ Well, I ’ m building my own business right now, so that ’ s my main focus. ” “ Ah, cool. But what do you like to do for fun? ” “ Work on my business. ” “ Yeah, but what about when you ’ re not doing that? ” “ I ’ m either working on my business, thinking about working on my business, or eating. ” “ Oh!... ”

#### Code/Space Chilton Book Company

An analysis of the ways that software creates new spatialities in everyday life, from supermarket checkout lines to airline flight paths. After little more than half a century since its initial development, computer code is extensively and intimately woven into the fabric of our everyday lives. From the digital alarm clock that wakes us to the air traffic control system that guides our plane in for a landing, software is shaping our world: it creates new ways of undertaking tasks, speeds up and automates existing practices, transforms social and economic relations, and offers new forms of cultural activity, personal empowerment, and modes of play. In Code/Space, Rob Kitchin and Martin Dodge examine software from a spatial perspective, analyzing the dyadic relationship of software and space. The production of space, they argue, is increasingly dependent on code, and code is written to produce space. Examples of code/space include airport check-in areas, networked offices, and caf é s that are transformed into workspaces by laptops and wireless access. Kitchin and Dodge argue that software, through its ability to do work in the world, transduces space. Then Kitchin and Dodge develop a set of conceptual tools for identifying and understanding the interrelationship of software, space, and everyday life, and illustrate their arguments with rich empirical material. And, finally, they issue a manifesto, calling for critical scholarship into the production and workings of code rather than simply the technologies it enables—a new kind of social science focused on explaining the social, economic, and spatial contours of software.
