BMW is a company  
associated with  
motoring firsts. The  
very idea of a sports  
sedan was merely a  
novelty until BMW  
introduced the 5  
series in 1972. As

the 5 series has drawn  
features from the  
company's smallest and  
largest models,  
establishing a  
reputation for  
performance and  
practicality through  
multiple generations.  
This book covers the  
history of the 5  
series midsize sedan  
and the related X5 SUV  
from September 1972 to  
the e60's major  
makeover for 2008 and

the development of the  
e70 X5. Specific  
mechanical, electronic  
and cosmetic changes  
are described,  
including the time of  
and reasons for their  
introduction. Several  
aspects of BMW's  
corporate history and  
technically related  
models such as the  
6-series are also  
described, as are  
aftermarket  
modifications by  
Alpina, Hartge, and  
other specialist BMW  
tuners and speed shops.  
The book includes more  
than 200 photographs.

Designed to suit new regulations, after ground-effect cars were banned at the end of 1982, the BT52 was very distinctive, with short, angular sidepods and a dart-shaped profile. During the 1983 season, the innovative Brabham team, with now F1 supremo Bernie Ecclestone at the helm, introduced the first high-pressure fuel rig seen in F1, to speed up refuelling stops, and used 'ovens' to pre-heat tyres prior to pitstops. This manual provides a fascinating insight into the design, evolution, operation and maintenance of the Brabham BT52.
