A wealth of restoration tips and
techniques covering E12, E24, E28, E34,
5 and 6 Series BMWs built between 1972
and 1995. Covers all models from 518 to
M6. Advice is given on acquiring a good
BMW 5 & 6 Series model, plus tips on
restoring, engines, bodywork, trim,
electrics, suspension & much more. If you
have a car like this then you can save
thousands as you bring it back up to
specification - for your safety or as a
restoration project this is the book you
need. It is now 40 years since the first
BMW 5 Series went down the production
lines at Dingolfing. Back in 1972, only the

BMW executives with the greatest of
foresight could have predicted that in
2012, the 5 Series would still be in
production and still be the class leader -
and it's amusing to note that the latest
model - the F10 520i - is also a two litre
four cylinder just as those first Fives
were. BMW occupies a unique position in
the hearts of car buyers and enthusiasts
for no other marque of car has such a
wide fan base. From what are probably the
finest range of cars in the world to an
enjoyable secondhand car, through to
concours events, track days to drifting
championships plus huge clubs and
countless forums, no other manufacturer
has such a huge and diverse following as
BMW. The large numbers of the first three
generations of the 5 Series that still
survive attest to that, and this book is
aimed at owners wanting to know more

and pick up some useful maintenance, repair and restoration tips.
