We must follow the direction of Jesus Christ who said, "Search the Scriptures, for in them ye think ye have eternal life, for they are they which testify of me," (John 5:39). Jesus knew the Scriptures must be searched in order to find the hidden things of God. The writings of Moses and other prophets came together in 1611 A.D. in the center of the world, in London, England under the guidance of King James 1st. The words of the New Testament were also directed by the Lord God, and the OLD and the NEW Testaments together would become 1 Bible with 66 books. The most mysterious verse of Scripture in the entire Bible is found in Revelation 13:18, where mankind has sought out its meaning since 1611 A.D. This verse of Scripture has been a mystery to every Biblical student since it was first written in 96 A.D. Its meaning is now explained in the book, "Letters From God," and it will bring the truth of this Scripture to the minds of Spiritual men. Soon the antichrist will appear on the earth, where he will fight with the saints of God and prevail against them, (Daniel 7:25). He will have 42 months in which to do this. Satan has taken many secret steps to arrange for himself to be recognized as an equal to Jesus Christ, which is something he can never be. The secret things Satan has done to prepare for his entry into the world as the antichrist are listed in this book, and will astound those who have been watching for his emergence. He will come from the most unexpected place, carrying out the most secret underhanded plot ever in the history of the world. The antichrist is the Great Deceiver and he will deceive many in the span of 42 months before he is defeated by Jesus Christ.

In 1986, after owning eleven BMWs in three years, Rob Siegel sent an unsolicited article to Roundel, the magazine of the BMW Car Club of America. Little did he know that it would kick off 35 years of do-it-yourself automotive writing, and that his monthly column *The Hack Mechanic?* would attract a community of like-minded enthusiasts who, like Rob, try to come up with creative workarounds to keep their cars running without taking them to the dealer every time they hiccup. More than just "use 10mm wrench on bolt B" instructions, though, the columns have always been small journeys into passion and problem solving, philosophy lessons disguised as a repair articles, and short stories about getting into and hopefully out of automotive trouble. *The Best Of The Hack Mechanic?* is a selection of these pieces, including ones on how to buy a vintage BMW and not get burned, the most creative way possible to lock your keys in a running car, why car folks will do just about anything to avoid buying a family minivan when the money obviously would be so much better spent on "something fun," why a car nut really does need seven cars, why the odds of having a car start is often inversely proportion to the number of cars in the driveway, why finding one of his father's tools is enough to make Rob cry, and why working on your car feels so damned good, all written in Rob's *Hack Mechanic* voice that hovers somewhere between J.D. Salinger, Bill Bryson, and David Sedaris. Informative, irreverent, and poignant, *The Best Of The Hack Mechanic?* will have you hoping Rob has another 35 years of columns in him.
