The Art of BMW

Motorcycles presents the rolling sculptures that are BMW motorcycles in studio portraits, each bike accompanied by a short history of the machine. All the classic bikes are here--pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it

blitzkrieged its way across Europe; the R75M that accompanied Rommel's Panzers in North Africa; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; and the GS (Gelände Sport) series that launched a dual-sport revolution. All the bike families are covered: the side-valve machines from the early years, the early overhead-valve performance bikes, the postwar Airheads and Oilheads, the four-cylinder and six-cylinder touring bikes, the early pushrod singles, the modern overhead-cam singles, the latest parallel twins, and inline-four cylinder sport bikes. From the first model, the R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) model, the World Super Bike dominating S1000RR,

this book captures nearly a century of motorcycling excellence.

BMW F800 & F650 Twins Haynes Publishing

A faithful reproduction of the 1967 Floyd Clymer publication of the official factory BMW (Bayerische Motoren Werke) Workshop Manual for the R50, R50S, R60 and R69S twin cylinder motorcycles. It also includes the supplement issued by the factory for the USA versions R50US, R60US and R69US. --- There are exhaustive tables of technical data, tolerances and fits and all of the expected data from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components, making it an invaluable resource for collectors and restorers of these classic

BMW motorcycles. --- There are 257 illustrations and each procedure is explained in a step-by-step method using an appropriate illustration. The translation from German to English is, at times, a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done! --- True to the original, this reproduction is published in four languages, English, German, French and Spanish making this a universal publication and required reading for any owner. Out-of-print and unavailable for many years, this book is highly sought after on the secondary market and we are pleased to be able to offer this reproduction as a service to all BMW enthusiasts worldwide.

Motorcycle Owner's Manual

BMW began its life in aero-engineering--as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book, the best of the best get their due, with brilliant, full-color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary

marque. From the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II, to the latest bikes with the revamped opposed-twin-cylinder "boxer" engines that brought BMW its first fame--these are the bikes that made history, and, better yet, gave the most demanding riders a taste for flight.

The entire history of the BMW motorcycle production, from the original R32 of 1932, through the war years and into the 21st century, is covered in this in-depth look. Particular attention is given to the groundbreaking motorcycles BMW produced in the 1970s. Those include the R90S and the R100RS -- the first mass-produced motorcycle to come equipped with a full, frame-mounted fairing -- and the innovative and popular motorcycles BMW offers today, including the exotic R1200C cruiser and the K1200LT luxury, touring bike. Both of which proved so popular they sent Honda back to the drawing board with its mighty Gold Wing.

210 pages and more than 350 illustrations and charts, size 8.25 x 10.75 inches. This publication is a reproduction of the August 1969 BMW factory workshop manual part number 01 51 9 099

051. This manual is applicable to all 1969 through 1973 BMW R50/5 R60/5 and R75/5 motorcycles. At the time of Floyd's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication. This BMW motorcycle manual is one of those previously unpublished, Floyd Clymer publications. Dated August 1969, this manual was obviously intended to be a 'follow up' from his previous 1967 BMW R50 & R26 series manual. The original 1969 'proof' copy that was included in the Floyd Clymer archives was likely finalized in early 1970. However, as the BMW /5 series of motorcycles remained in production through 1973, we are pleased to present a newly prepared edition of Floyd's work as a service to all BMW motorcycle enthusiasts worldwide. Unfortunately, owners of the 1969-1973 BMW /5 series models are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the

various manuals that have recently flooded the marketplace. We encourage you to exercise caution when purchasing a manual for your motorcycle or automobile as many of the reprints found on internet websites are from 'bedroom sellers' at enticingly low prices by individuals that really have no idea what they are selling. Many are nothing more than poor quality, comb-bound photocopies that are scanned and printed complete with greasy pages and thumbprints and, as such, are deceptively described as 'pre-owned', 'used' or even 'refurbished'. In addition, they are often advertised for the incorrect series and/or model years.
