*Visual Basic 2008* McGraw-Hill Science, Engineering & Mathematics

PROFESSOR MICHAEL HUDSON is one of the foremost critics of contemporary finance capitalism and the worldwide power "the 1%" wields because of government tax breaks and other favorable legislation. In *THE BUBBLE AND BEYOND*, he illuminates how the expansive and successful forces of 19th and 20th century industrial capitalism have been subverted by today's predatory finance capitalism, putting the entire world in a financial mess - and what can be done about it. A confusing labyrinth of geo-political issues impacts economic health and growth, and few are studied in the classroom or given space in the press. There is a way out of the labyrinth, however, as Professor Hudson demonstrates across 20 readable topics. PROFESSOR HUDSON'S most controversial claim is that "Debts that can't be paid, won't be," leaving in question whether or not debt non-payment will lead to worldwide foreclosures - including sell-offs of public domain assets by debt-strapped local and national governments. This is already happening locally and globally - exactly what some of the 1% would like - creating a newly-poor feudalistic society with the 1% collecting all the usage "fees." Alternatively, he suggests that the debts be written down in line with the ability to pay, as has been done by corporations via Chapter 11 bankruptcies and reorganizations throughout a more enlightened modern economic history as well as biblical record. In Professor Hudson's bold view, debt write-downs versus privatization and sell-offs of public domain assets are the economic issues that will dominate politics over the next generation. *THE BUBBLE AND BEYOND* is a compendium and brief history of economic thought and why it matters not only to Americans, but to people all over the world. You will find that you refer to it again and again as a fount of information, much of which has been out of favor for decades and/or suppressed by the financial interests. Professor Hudson provides chapter and verse, names names, and explains the mistakes and outright fraud that have often been committed in the name of political ideology - by both the right and the left. You will encounter all of the heroes and miscreants of economics, industry, and politics from the Bible and Babylon to present day banksters, misguided Fed policy-makers, and captains of the finance/insurance/real estate (FIRE) sector and the military-industrial complex. In one chapter after another, Professor Hudson tells who did what to whom - as well as who wins and who loses. This updated edition makes it plain where money goes versus where it might go - and ought to go. UPDATED EDITION with a NEW INDEX, LIST OF 47 EXHIBITS (illustrations, charts, graphs and models), a BONUS CHAPTER and BONUS SUMMARY, contemporary quotes, and author pull-out quotes.

Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

By using a series of studies of contemporary mainstream Hollywood movies - "Blue Velvet, Wall Street, Crimes and Misdemeanors, When Harry Met Sally, Sex Lies and Videotape, Do the Right Thing" - Norman Denzin explores the tension between ideas of the postmodern, and traditional ways of analyzing society. The discussion moves between two forms of text: social theory and cinematic representations of contemporary life. Denzin analyzes the ideas of society embedded in poststructuralism, postmodernism, feminism, cultural studies and Marxism through the ideas of key theorists like Baudrillard, Barthes, Habermas, Jameson, Bourdieu and Derrida. He relates these to the problematic of the postmodern self as exposed in cinema centering on the decisive performance of race, gender and class.
