The day that you gave your life to Christ, you received a priceless gift.

This gift is immediately available the moment you receive Christ as your personal savior. When people give gifts, they give gifts that are representative of themselves. God provided this awesome gift because He wants you to realize He is an awesome God. You should expect supernatural experiences when you are in relationship with a supernatural God. This gift must be opened and used. It takes faith to use this gift. As you begin to use this gift, you will appear strange to some and unrealistic to others. Yes, some have missed great opportunities because they were afraid or didn't

know how to use the gift. Some have lived defeated lives because they did not know that the use of the gift would cause them to be victorious. Your mind can convince you that the gift only works in certain situations. Some have used the gift for a few days and decided it does not work; not realizing that this gift is extremely effective in both the spiritual and earthly realm; not realizing that the gift begins to work the moment it is put to use. As you open your gift, I hope you will not be too quick to give up on the gift. Its value is beyond comprehension. Its power is not easily articulated because you don't always

know how much is being changed and resolved through the use of this gift. Read on to discover the peace, joy, and miracles that were experienced by those who believed in the power of the Awesome Gift. Belief combined with application brings about supernatural results. MES Guide for

Executives Butterworth-Heinemann
Historians of the Civil War often speak of "wars within a war"--the military fight, wartime struggles on the home front, and the political and moral battle to preserve the Union and end slavery. In

this broadly conceived book, Thavolia Glymph provides a comprehensive new history of women's roles and lives in the Civil War--North and South, white and black, slave and free--showing how women were essentially and fully engaged in all three arenas. Glymph focuses on the ideas and ideologies that drove women's actions, allegiances, and politics. We encounter women as they stood their ground, moved into each other's territory, sought and found common ground, and fought for vastly different principles. Some women used all the tools and powers they could muster to prevent the radical transformations the war increasingly imposed, some fought with equal

might for the same transformations, and other women fought simply to keep the war at bay as they waited for their husbands and sons to return home. Glymph shows how the Civil War exposed as never before the nation's fault lines, not just along race and class lines but also along the ragged boundaries of gender. However, Glymph makes clear that women's experiences were not new to the mid-nineteenth century; rather, many of them drew on memories of previous conflicts, like the American Revolution and the War of 1812, to make sense of the Civil War's disorder and death.

Are you having trouble demonstrating to management what a

execution system (MES) is and what it can do for you? Or do you simply need to justify why you even need a MES? Perhaps you are the executive decision maker and just need some answers. Bianca Scholten, the author of the best-selling book, *The Road to Integration: Applying ISA-95 in Manufacturing*, shares her expertise on the topic in her latest easy-to-read guide to MES. In recent decades, says Scholten, industrial companies have invested much time and money in not only machine and production line automation but also in ERP (Enterprise Resource Planning) systems. The MES falls between these two layers. Many of the preparatory activities (e.g., detailed production scheduling and

recipe management), but also retrospective activities (e.g., data collection, reporting, and analysis) are primitive at best. Ideal for CEOs, CFOs, and managers, Scholten sheds some light on how to get out of this outdated situation using real-world examples and the knowledge gleaned from IT, production managers, and other colleagues who have been through the MES experience. She covers MES selection, company expectations during implementation and initial use of the MES, advice on developing and maintaining a multi-site MES template, and return on investment. She also adds a bird's-eye view of the ISA-95 standard for better communication between systems and their applications.
