The not for profit world is a large and growing segment of economic activity globally. As economies grow and wealth accumulates, the urge to make a lasting, intergenerational contribution to human welfare is a deep part of our nature. Many enter this new world without a firm grasp of the financial structures that underpin

the not for profit world. Into this gaps steps Biswajeet Chatterjee, with his new book Best Practices for a Global Not for Profit Organization. The book describes in clear and simple terms the fundamental accounting principles and regulatory requirements of the not for profit world. Best Practices for a Global Not for Profit Organization

without reservation. William A Haseltine PhD Global Not for Profit Organization Pearson UK Familiarity with guarantees and how they function under various national jurisdictions are essential for principals, guarantors, and beneficiaries of international contracts. This enormously useful handbook provides a practical overview of the guarantee regimes in twenty-eight European countries, with country-by-country contributions from regional expert practitioners and academics. For easy

comparison, each country report follows the same structure, from preliminary discussion on the provisions of a guarantee to its negotiation, drafting, and enforcement. Focusing on specific issues to consider at every stage, each chapter provides detailed information and guidance on such aspects as the following: . who can issue guarantees; . limitations as to the type of obligations which may be subject to a guarantee; . issues relating to the protection of the contracting parties; . formal requirements which need to be complied with; . stamp duties or other

tax payable; . presence of implied terms; . legal framework applicable to joint and several obligations; . modification of the situation; . conditions for release and actions to be taken to ensure a valid release; . opening of bankruptcy proceedings against the principal; . court enforcement; and . incorporation of uniform rules. Each chapter includes references and model guarantee forms that readers can use to draft their own documents. Invaluable to corporate counsel and law firms with an international

practice, this peerless handbook will prove the first order of business in trade negotiations across Europe, among European nations themselves as well as with their global partners.

Banking and Capital Markets is a practical guide to a field that has seen a rapid rate of change in recent years. The text is divided into three parts: Part

I provides a clear and accessible explanation of the fundamentals behind drafting loan facility documentation; Part II provides a thorough examination of secured lending, which is probably the most legally complex area of the banking solicitors practice; and Part III provides a straightforward introduction to capital markets financing including the process of issuing a stand-alone bond. This new edition has been revised to

take account of recent legislative and procedural changes, including the conclusions of important cases in this area.

A solvency opinion provides assurance to a company's Board of Directors and/or the lenders that the transaction will not likely subject the Company and its unsecured and other creditors to undue financial distress. Houlihan will undertake a solvency opinion engagement for companies involved in highly leveraged transactions. Examples include leveraged buyouts,

leveraged recapitalizations, leveraged dividends or other such situations where there may be minimal equity involved. Houlihan has also completed solvency opinions for spin-off transactions in conjunction with capital restructuring and significant debt refinancing. The Federal Bankruptcy Code defines "insolvent" as the condition in which the total of a person's debts exceeds the value of its property at a fair valuation. Recent case law suggests that the fair valuation of property is its value on a going-concern basis. A solvency letter expresses an independent expert

opinion on a borrower's ability to remain solvent under the burden of additional liability, to pay debts as they mature, and to continue operations as a going-concern in dynamic economic conditions. In connection with a leveraged recapitalization, interested parties such as new secured lenders and sellers will often, due to fraudulent conveyance concerns, seek an independent determination and opinion as to the impact of the acquisition debt on working capital, cash flow, and equity value. Houlihan is highly familiar with the

Tests of Capitalization and Solvency and is able to efficiently and cost-effectively provide analysis that provides a layer of comfort to interested parties.

The Asian Infrastructure Investment Bank, first opened in 2016, is a 100 billion dollar multilateral development bank purpose-built to support infrastructure projects that enhance regional economic productivity. Its arms reach far: in its first two years,

AIIB has financed transport systems such as national motorways in Pakistan, railways in Oman, and rural roads in India; energy projects including natural gas pipelines in Azerbaijan and hydropower plants in Tajikistan; and the redevelopment of impoverished areas in Indonesia. Initiated by China, its membership is global, with regional powers from Korea to Saudi Arabia, and key players from Europe, Africa, and Latin America. In a text that will appeal to general readers and legal specialists alike,

Natalie Lichtenstein examines the Bank's mandate, investment operations, finance, governance, and institutional set up, as well as providing detailed analyses of the similarities and differences it has with other development banks - charting AIIB's story so far and anticipating its future.
