Important improvements have been made to the bank resolution, safety net and crisis management framework since the last FSAP. The resolution framework has been strengthened with the creation, within the Banco Central do Brasil (BCB), of a new Resolution Department, and requirements for recovery and resolution planning have been established. The early intervention powers of the BCB are robust and flexible. Notwithstanding this progress, the current framework has limitations that are broadly acknowledged by the authorities. Resolution powers are incomplete and no formal inter-agency arrangements for crisis management are in place. The BCB has taken the lead in preparing a comprehensive draft law (the "Draft Law") that seeks to introduce a new resolution regime in line with international best practices. This FSAP takes place therefore at a critical juncture. It provides recommendations on the design features of the new resolution regime, examining the existing framework as well as the areas not addressed in the Draft Law.

This 2017 Article IV Consultation highlights that the Russian economy stabilized in 2016, contracting by just 0.2 percent of GDP, after being hit in 2014 by the dual shocks of lower oil prices and sanctions. The more stable oil prices and improved financial conditions will support a return to growth in 2017, with an expected increase in real GDP of 1.4 percent. Growth is forecast to continue at 1.4 percent in 2018. With adverse demographics, and barring significant structural reforms that lifts productivity, potential growth is likely to stay at about 1.50 percent over the medium term. The main risk to the outlook remains a fall in oil prices.

In the late 1930's, convinced that the Nazis would annihilate all Europeans who challenged their belief in Aryan supremacy, Eduard Seventer uses his influential investment bank in Amsterdam to transfer Jewish refugee funds to safety in England and America. The lightning-fast German invasion of the Netherlands in May of 1940 catches Seventer on a business trip in London, unable to return to his young wife in Amsterdam. Within days, the Germans complete their occupation of the country. The newly-arrived head of the Gestapo in Amsterdam, Heinrich Wanstumm, begins his search for enemies of the Reich. By 1942, he streamlines the deportation of Jews, and in their abandoned homes, he finds foreign bank statements for accounts which he knows the deportees will never return to claim. At the end of the war, Seventer makes a terrible discovery, and vows to bring Wanstumm to justice. The Dutch authorities also begin their search for war criminals, with Wanstumm high on their list, but

Wanstumm has vanished. Over time, the leads grow cold until Wanstumm's greed causes him to make a fatal mistake. The FBI, Scotland Yard, Interpol and French and Swiss police follow different and confusing tracks which converge - just when Seventer also picks up the scent of his quarry

This Technical Note discusses the findings and recommendations made in the Financial Sector Assessment Program for the Russian Federation in the areas of bank resolution and a crisis management framework. The findings reveal that the experiences of past financial crises have strengthened the Russian bank resolution framework. The resolution framework has been effective in preserving financial stability. Since January 2014, 28 banks have been placed in open bank resolution, and three were resolved by purchase and assumption transactions. The effectiveness of bank resolution could be improved. Introduction of the full range of resolution powers and safeguards recommended by the Financial Stability Board Key Attributes would improve the framework's effectiveness.

Within an environment made difficult by the continuing economic crisis, the Italian model for crisis management and resolution has helped to avoid many difficulties faced by intermediaries across the globe.
