Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave

heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as... THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

Depression is a multi-faceted disorder with symptom clusters that are highly variable between individuals. In spite of efforts utilizing neuroscientific and genetic techniques in research to determine its etiology, practical clinical settings still rely on traditional verbal consultation method to devise treatment for the depressed. This book discusses the importance of focus on causality and the need to discuss issues which lead to depressive symptom manifestation and progress.

Electrical Engineer's Reference Book, Fourteenth Edition focuses on electrical engineering. The book first discusses units, mathematics, and physical quantities, including the international unit system, physical properties, and electricity. The text also looks at network and control systems analysis. The book examines materials used in electrical engineering. Topics include conducting materials, superconductors, silicon, insulating materials, electrical steels, and soft irons and relay steels. The text underscores electrical metrology and instrumentation, steam-generating plants, turbines and diesel plants, and nuclear reactor plants. The book also discusses alternative energy sources. Concerns include wind, geothermal, wave, ocean thermal, solar, and tidal energy. The text then looks at alternating-current generators. Stator windings, insulation, output equation, armature reaction, and reactants and time-constraints are described. The book also examines overhead lines, cables, power transformers, switchgears and protection, supply and control of reactive power, and power systems operation and control. The text is a vital source of reference

"Kinzie soars . . ." --Kirkus Reviews  
From top-selling author L E Kinzie comes her first collection of poems. Regardless of the subject matter, Kinzie's poetry reflects an unmatched ability to create works of palpable emotion. Kirkus Reviews agrees, saying Ignite is "a compilation of verse that's popular in the best sense of the word," and referring to it as "this sumptuous collection." Throughout the collection, readers will find remarkably relatable themes of daily life. Simply put, this book is for anyone who has ever felt and held any emotion so intensely it threatens to explode inward if not released through music, words, paint, or some other creation. It's for anyone who has marveled at how inner turmoil can be expressed as something unspeakably beautiful. It's for anyone who has ever created anything and loved it. It's for anyone who has ever created anyone and loved him or her. Ignite examines the sparks that alight threads of commonality between mankind.

Freedom. It's the ability to do whatever you want, whenever you want. It's the ultimate reward of selling your business. But selling a company can be confusing, and one wrong step can easily cost you dearly. The Art of Selling Your Business: Winning Strategies & Secret Hacks for Exiting on Top is the last in a trilogy of books by author John Warrillow on building value. The first, Built to Sell, encouraged small business owners to begin thinking about their business as more than just a job. The Automatic Customer tagged recurring revenue as the core element in a valuable company and provided a blueprint for transforming almost any business into one with an ongoing annuity stream. Warrillow completes the set with The Art of Selling Your Business. This essential guide to monetizing a business is based on interviews the author conducted on his podcast, Built to Sell Radio, with hundreds of successfully cashed-out

founders. What's the secret for harvesting the value you've created when it's time to sell? The Art of Selling Your Business answers important questions facing any founder, including— • What's your business worth? • When's the best time to sell? • How do you create a bidding war? • How can you position your company to maximize its attractiveness? • Who will pay the most for your business? • What's the secret for punching above your weight in a negotiation to sell your company? The Art of Selling Your Business provides a sleeves-rolled-up action plan for selling your business at a premium by an author with consummate credibility.

Launched in 1991, The Asian Yearbook of International Law is a major refereed publication dedicated to international law issues as seen primarily from an Asian perspective, under the auspices of the Foundation for the Development of

---

International Law in Asia (DILA). It is the first publication of its kind edited by a team of leading international law scholars from across Asia. The Yearbook provides a forum for the publication of articles in the field of international law, and other Asian international law topics, written by experts from the region and elsewhere. Its aim is twofold: to promote international law in Asia, and to provide an intellectual platform for the discussion and dissemination of Asian views and practices on contemporary international legal issues. Each volume of the Yearbook contains articles and shorter notes; a section on State practice; an overview of Asian states participation in multilateral treaties; succinct analysis of recent international legal developments in Asia; an agora section devoted to critical perspectives on international law issues; surveys of the activities of international organizations of special relevance to Asia; and book review, bibliography and documents sections. This volume offers Asian perspectives on topics including : treaty-making power in China; the crime of aggression, illegal fishing and the destruction of environment in armed

conflicts.

The Cuba Review Independently Published

As early as the first millennium A.D., the Philippine archipelago formed the easternmost edge of a vast network of Chinese, Southeast Asian, Indian, and Arab traders. Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite. *Raiding, Trading, and Feasting* presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies. By combining archaeological evidence with historical sources, Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms. Most importantly, she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies, rather than foreign contacts, that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history. A broad spectrum of historical and ethnographic sources, ranging from tenth-century Chinese tributary trade records to turn-of-the-century accounts of chiefly "feasts of merit," highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago. The political ascendance of individual polities, the emergence of more complex

---

forms of social ranking, and long-term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age (late first millennium B.C.) to the colonial period. The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long-term dynamics of chiefly political economy in a single region. Reaching beyond the Philippine archipelago, this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states. It attempts to address the question of why Philippine polities, like early historic kingdoms elsewhere in Southeast Asia, have a segmentary political structure in which political leaders are dependent on prestige goods exchanges, personal charisma, and ritual pageantry to maintain highly personalized power bases. *Raiding, Trading, and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature. It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms.

Pwc 2003 Infinity Publishing

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers

provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO<sub>2</sub> emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport

---

applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

BOOK ONE: THE BOY AND HIS DEPRIVATION

(1909-1932) William Branham is one of the greatest healing evangelists in Church history. From the minute he was born, William Branham was set apart from the ordinary. Plagued by poverty and rejection, he became a nervous child. Unusual things kept happening to him, mystifying and spiritual things...but he did not start thinking about God until he was 14, when he nearly lost both legs in a shotgun accident. As he lay dying in a pool of blood, he saw a terrifying vision of hell - saw himself falling constantly deeper into that region of lost and drifting souls. He cried out to God for mercy and miraculously was given a second chance - a chance which later he almost failed to grasp. [Click Here To Purchase](#)..BOOK TWO: THE YOUNG MAN AND HIS DESPERATION (1933-1946) As a young pastor, William Branham struggled to understand his peculiar life. Why was he the only minister in town who saw visions? When God first called him into nation-wide evangelism in 1936, he refused, only to

pay dearly for his mistake by losing his wife and daughter to tuberculosis. The visions continued. Ministers told him that these visions came from Satan. Desperation finally drove him to seek a supernatural being. The angel gave him a commission from God to take a gift of Divine healing to the peoples of the world. When William Branham questioned whether the people would believe an angel had really met him, the angel said he would be given two supernatural signs to prove his calling. Then they would have to believe. And believer they did!BOOK THREE: THE MAN AND HIS COMMISSION (1946-1950) Soon after the angel visited William Branham and told him he was ordained to take a gift of healing to the peoples of the world, the first sign appeared - a physical reaction in his hand that happened only when he touched the hand of someone suffering from a germ-caused disease. Within two months of his commission, William Branham's extraordinary gift had gained national attention. People by the thousands flocked to his meetings, where he preached salvation and Diving healing in the Name of Jesus Christ. Miracles abounded. The world had not seen anything like it since the days when Jesus walked through Galilee, casting out demons and healing all who were sick and afflicted. Even so, some people still questioned whether an angel had really met this humble man. Then the

second sign appeared...and they had to believe!	187
