In Hansons Marathon Method, the coaches of the Hansons-Brooks Distance Project reveal the methods they've used to turn their runners into race winners, national champions, and Olympians. Hansons Marathon Method offers a radical overhaul of marathon training that promises to turn any runner into a true marathoner and help experienced marathoners set new personal bests. Hansons Marathon Method does away with mega-long runs and high-mileage weekends--two outdated traditions that make most runners miserable. Instead, runners using the Hansons method will gradually build up to the moderate-high mileage required for marathon success, spreading those miles more sensibly throughout the week. Running easy days mixed with precisely

---

paced speed, strength, and tempo workouts, runners will steel their bodies and minds to run the hardest miles of the marathon. Both Beginner and Advanced training programs feature the unique Hansons 16-mile long run which, as part of the Hansons program, is ideal for preparing the body for the marathon. Humphrey explains how runners should set their goal race pace and shows how to customize the Hansons method to their own needs, like adding extra racing, running more miles, and handling training interruptions. Detailed nutrition and hydration chapters help runners pinpoint their personal energy and hydration needs so they know precisely how much to eat and drink during workouts, race week, race day, and for recovery. The Hansons approach to pacing and nutrition means marathoners will never hit the wall. Hansons Marathon Method lays out the smartest marathon training program available from one of the most accomplished running groups in the nation. Using this innovative approach, runners will mold real marathon muscles, train their body to never hit the wall, and prepare to run their fastest marathon.

"After a decade-long addiction to crack cocaine and alcohol, Charlie Engle hit rock bottom after a near-fatal six-day binge ended in a hail of bullets. Then he found

running, and it has helped keep him sober, focused and alive. He began to take on the most extreme endurance races, such as the 155-mile Gobi March, and developed a reputation as an inspirational speaker. However, after he made the documentary *Running the Sahara*, narrated by Matt Damon, which followed him on a 4500-mile crossing of the desert and helped raise \$6 million, he was sent to prison after failing to complete his mortgage application properly. It was while he was in jail that he became known as 'The Running Man' as he pounded the prison yard, and soon his fellow inmates were joining him, finding new hope through running. Now, in his brilliantly written and powerful account, Engle tells the story of his life and how running has brought him so much pleasure and peace. Like such classics as *Born to Run* and *Running with the Kenyans*, this is a book that anyone who has ever found solace in the

freedom of running will enjoy"--Google Books. **Hansons Marathon Method** Rodale

A science writer and recreational runner explores the science behind popularly held beliefs about shoes, injuries, nutrition, "runner's high," and more. Conventional wisdom about running is passed down like folklore (and sometimes contradicts itself): the right kind of shoe prevents injury--or running barefoot, like our prehistoric ancestors, is best; eat a high-fat diet--and also carbo load before a race; running cures depression--but it might be addictive; running can save your life--although it can also destroy your knee cartilage. Often it's hard to know what to believe. In *Running Smart*, Mariska van Sprundel, a science journalist and recreational runner who has had her fair share of injuries, sets out to explore the science behind such claims. In her quest, van Sprundel reviews the latest developments in sports science, consults with a variety of experts, and visits a sports lab to have her running technique analyzed. She learns, among other things, that according to evolutionary biology, humans are perfectly adapted to running long distances (even if our hunter-gatherer forebears suffered plenty of injuries); that running sets off a shockwave that spreads from foot to head, which may or may not be absorbed by cushioned shoes; and that a good sports bra

controls the ping pong-like movements of a female runner's breasts. She explains how the body burns fuel, the best foods to eat before and after running, and what might cause "runner's high." More than fifty million Americans are runners (and a slight majority of them are women). This engaging and enlightening book will help both novice and seasoned runners run their smartest.

If you're overweight or obese...If you're constantly tired, bloated, constipated, achy, sluggish, depressed, or anxious...If you're diabetic or pre-diabetic...If your doctor keeps warning you about the risk of cancer, heart disease, or other lifestyle-reversible calamity...If you're constantly worried about your blood

pressure, weight, insomnia, eating habits... But you still find it next to impossible to stick to a healthy diet, exercise, and lifestyle plan... Then you might be going about things the wrong way. Let's face it - despite a flood of information and advice, we're getting sicker and fatter all the time. That's because the vast majority of "conventional" advice is outdated, wrong-headed, and just plain ineffective. Within this storm of bad news and bad advice, there's a growing tribe of outliers who have managed to lose hundreds of pounds, reverse "impossible to cure" diseases, and even - to their own shock and delight - become fit and high-performing athletes. Their stories don't get a lot of media attention, because they aren't selling anything. No pills, powders, or potions. No expensive workout gadgets. No late night infomercial

magic formulas. They simply rediscovered some basic, natural truths about the human animal. What we're designed to eat. How we're designed to move. And how we're meant to think and feel. When we get away from our natural heritage, we suffer. When we return to it, we thrive. Read *Sick To Fit* to discover how Josh LaJaunie went from a 420-pound food addict to the cover of *Runner's World* magazine, as well as live appearances on *Good Morning America* and *The Today Show*. Discover the simple secrets for a healthy life that have transformed dozens of members of the Missing Chins Run Club and clients of WellStart Health from sick and sad to fit and fulfilled. In *Sick To Fit*, you'll learn:

- the one food rule that banishes confusion, eliminates the need to count calories or restrict portion size, and makes you impervious to the marketing and clickbait BS perpetrated by the

food industry- how to honor your culture and heritage without suffering from the diseases that are killing your people (coming from the Bayou of South Louisiana, Josh knows a thing or two about being a foodie)- how to use social and family pressure to get stronger and more committed- how to prevent self-sabotage after initial success- how to start exercising safely if you're overweight (by 20 or 200 pounds)- the four-question FAST Assessment (the "Swiss Army Knife" of sustainable behavior change)- how to master life's stressors so they don't turn into binges- how to never "fall off the wagon" again - even if you've failed at dozens of diets before- and much more...Written with behavioral health expert Howard Jacobson, PhD, Sick To Fit combines Josh's journey with cutting edge nutritional, exercise, neurological, and

habit science. Sick To Fit is your roadmap to better health and a more joyful life."Sick To Fit is a captivating, inspiring and practical story of an epic transformation. And don't be deceived by how entertaining this page-turner of a book is. What you're about to have fun reading is scientifically proven, and it just might change your life."Ocean Robbins, Author, 31-Day Food Revolution CEO, Food Revolution Network <http://foodrevolution.org>"A diet book with lots of information leaves you with lots of information. But a book that teaches you how to change your dietary and lifestyle habits - and do it in a way that is compelling, engaging, and eminently practical - a book like that can change your life."Sick to Fit takes everything that we know about what makes people change in business and life, and applies it to eating and lifestyle habits.

happiness, and your mental, emotional, physical, and spiritual health and well-being. Positive Thinking works—and in *The Power of Positive Living*, Dr. Peale demonstrates how to use these techniques to conquer the fears and crippling adversity that may be holding you back from realizing your true potential in life. Self-confidence is the key and this book shows us how we can do it! With the “get-it-done twins,” patience and perseverance, any believer can be an achiever! Dr. Peale provides inspiring success stories from his own extensive experience as a counselor—such as a department store executive who turned his store into one of the chain’s most profitable by focusing on his past successes

rather than his failures, and a woman who recovered her self-confidence and joy and purpose in living when she started volunteering with cancer survivors after her own breast cancer diagnosis cut short her modeling career. The wisdom, guidance, and practical advice provided in *The Power of Positive Living* will give you faith in yourself and in your power to achieve absolutely anything!

list event like the Boston Marathon, or competing in beautiful and challenging locales such as Rome or Death Valley. Whatever race you choose, there is no one better to guide you on your journey than Bart Yasso, chief running officer at Runner's World magazine. Over the past 40 years, Yasso has run more than 1,000 races, across all seven continents, at every conceivable distance, from local 5Ks to grueling ultramarathons and Ironman triathlons. He's truly done it all, and in *Race Everything*, he shares the secrets of how he trained, the particularities of each course, and the specific insights he has gleaned to help you run your best no matter the distance. This book offers tried-and-true advice on how

to train and what to do on race day to make the best use of your training. It provides everything you need to know to succeed at the most popular race distances, including general training principles, targeted training plans for beginners and experienced runners alike, and insider tips based on Yasso's own experiences and those of other top runners he has known and run with. The goal is to inform and inspire runners eager to challenge themselves by tackling the world's signature races. You will also learn Yasso's methods for winning the greatest race of all, longevity, so that you can remain healthy, fit, and able to race for decades to come. Whether your goal is to complete a 5K or 10K race in your hometown or

to conquer the Antarctica Marathon, *Runner's World Race Everything* will be your guide. *The Beginning Runner's Handbook* Hachette Digital, Inc. This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the

---

future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. The Big Book of Endurance Training and Racing Are you a triathlete, runner, cyclist, swimmer, cross-country skier? Learn how to stay healthy, achieve optimal athletic potential, and be injury-free. Dr. Philip Maffetone's approach to endurance offers a truly "individualized" outlook and unique system that emphasizes building a strong aerobic base for increased fat burning, weight loss,

sustained energy, and a healthy immune system. Good nutrition and stress reduction are also key to this commonsense, big-picture approach. In addition, Dr. Maffetone dispels many of the commonly held myths that linger in participatory sports—and which adversely impact performance—and explains the "truths" about endurance, such as: The need to train slower to race faster will enable your aerobic system to improve endurance Why expensive running shoes can actually cause foot and leg injuries The fact that refined carbohydrates actually reduce endurance energy and disrupt hormone balance And more. If you are looking to increase your endurance and maximize your athletic potential, The Big Book of Endurance Training and Racing is your one-stop guide to training and racing effectively.
