In *Life Takes Wings*, Captain Lynn Rippelmeyer soars with inspiration from a starry-eyed farm girl gazing at the sky to flight attendant to first female pilot of the revolutionary Boeing 747. More than just a story of one woman's love affair with the skies, *Life Takes Wings* combines lessons in tenacity, humility, humor, perseverance, and partnership with the exhilaration of defying social norms, and the rewards of being true to oneself. Inspired to become a commercial airline pilot in an age when it was not an option for girls, serendipitous relationships lead Lynn to her first flying lessons in a seaplane, then to becoming flight instructor and charter pilot while also working as a flight attendant. Perceived as being incapable of flying, women were relegated to the cabin.

Ignoring the pilots' negative comments, Lynn became a number of aviation's female firsts – member of first all-female commercial airline crew, first flight attendant-to-pilot, and first female pilot of the Boeing 747. Through laughter and tears, *Life Takes Wings* shows the sky is no limit for those who follow their dreams.

Captain John A. Moktadier graduated and received his Bachelor's Degree from Embry-Riddle Aeronautical University in Daytona Beach, Florida. He has been flying for the past 35 years and currently holds both a Gold Seal Flight Instructor and Advanced Ground Instructor licenses from the FAA. Capt. Moktadier has four type ratings which include: Airbus 330, Airbus 320, Boeing 747 and Boeing 727. He has logged over 24,000 hours flight time with the majority of his hours in jet transport and wide body aircraft. He has flown around the world. Captain Moktadier served as a Boeing 727 Check Airman (TRE) and conducted rating rides, proficiency checks, instructions and simulator checks and line checks for over 10 years with a commercial airline in the United States. He has trained hundreds of pilots with no failures and well above average results. The pilots he has trained have lots of respect for Capt. Moktadier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional instructor and TRE. This is his second book that he has published. The first one was *Boeing 727 Flight Master* which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on a Boeing 727.

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.
