Boeing 737 Study Guide, 2021 Edition Moody Publishers

The Boeing 777 Study Guide is a compilation of notes taken primarily from flight manuals, but also includes elements taken from class notes, computer-based training, and operational experience. It is intended for use by initial qualification crewmembers, and also for systems review prior to recurrent training or check rides. The book is written in a way that organizes in one location all the buzz words, acronyms, and numbers the average pilot needs to know in order to get through qualification from an aircraft systems standpoint. The guide covers 777-200 and 777-300 series airplanes. The author is a retired Air Force Fighter pilot with flight experience in seven different aircraft types including the F-101, F-106 and F-15, and instructional experience in the T-33, F-101 and AT-38B aircraft. He also consulted on the acquisition and development of the F-22 and helped to write the F-22 operating manual. Transitioning to the airline world in 1990, he began writing and publishing transport category aircraft study materials and software guides. He holds type ratings in Boeing 727, 737, 757-767 and 777 aircraft as well as the Airbus A320 series aircraft. He has over 17,000 flight hours and has written seven titles which have sold a total of over 100,000 volumes. He retired with over 27 years work as an airline captain, certification as a flight engineer check airman, and management work in the area of managing operational specifications for a major airline.

Flying Blind Boeing 727 Study Guide Covering the 727-100 and 727-200 Versions

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.

Captain John A. Moktadier graduated and received his Bachelor's Degree from Embry-Riddle Aeronautical University in Daytona Beach, Florida. He has been flying for the past 35 years and currently holds both a Gold Seal Flight Instructor and Advanced Ground Instructor licenses from

the FAA. Capt. Moktadier has four type ratings which include: Airbus 330, Airbus 320, Boeing 747 and Boeing 727. He has logged over 24,000 hours flight time with the majority of his hours in jet transport and wide body aircraft. He has flown around the world. Captain Moktadier served as a Boeing 727 Check Airman (TRE) and conducted rating rides, proficiency checks, instructions and simulator checks and line checks for over 10 years with a commercial airline in the United States. He has trained hundreds of pilots with no failures and well above average results. The pilots he has trained have lots of respect for Capt. Moktadier's knowledge and his training style made them feel relaxed during the entire simulator session maximizing their learning due to his teaching ability, honesty and integrity. They have all commented that he is a true professional instructor and TRE. This is his second book that he has published. The first one was Boeing 727 Flight Master which received many outstanding and excellent reviews and positive feedback from the professionals in the airline industry who read the book and it soon became one of the best training books on a Boeing 727.

NEW YORK TIMES BUSINESS BEST SELLER • A suspenseful behind-the-scenes look at the dysfunction that contributed to one of the worst tragedies in modern aviation: the 2018 and 2019 crashes of the Boeing 737 MAX. An "authoritative, gripping and finely detailed narrative that charts the decline of one of the great American companies" (New York Times Book Review), from the award-winning reporter for Bloomberg. Boeing is a century-old titan of industry. It played a major role in the early days of commercial flight, World War II bombing missions, and moon landings. The planemaker remains a cornerstone of the U.S. economy, as well as a linchpin in the awesome routine of modern air travel. But in 2018 and 2019, two crashes of the Boeing 737 MAX 8 killed 346 people. The crashes exposed a shocking pattern of malfeasance, leading to the biggest crisis in the company's history—and one of the costliest corporate scandals ever. How did things go so horribly wrong at Boeing? *Flying Blind* is the definitive exposé of the disasters that transfixed the world. Drawing from exclusive interviews with current and former employees of Boeing and the FAA; industry executives and analysts; and family members of the victims, it reveals how a broken corporate culture paved the way for catastrophe. It shows how in the race to beat the competition and reward top executives, Boeing skimped on testing, pressured employees to meet unrealistic deadlines, and convinced regulators to put planes into service without properly equipping them or their pilots for flight. It examines how the company, once a treasured American innovator, became obsessed with the bottom line, putting shareholders over customers, employees, and communities. By Bloomberg investigative journalist Peter Robison, who covered Boeing as a beat reporter during the company's fateful merger with McDonnell Douglas in the late '90s, this is the story of a business gone wildly off course. At once riveting and disturbing, it shows how an iconic company fell prey to a win-at-all-costs mentality, threatening an industry and endangering countless lives.
