The Art of Strategy: A Game Theorist's Guide to Success in Business and Life Rowman & Littlefield

"I am hard pressed to think of another book that can match the combination of practical insights and reading enjoyment."—Steven Levitt Game theory means rigorous strategic thinking. It's the art of anticipating your opponent's next moves, knowing full well that your rival is trying to do the same thing to you. Though parts of game theory involve simple common sense, much is counterintuitive, and it can only be mastered by developing a new way of seeing the world. Using a diverse array of rich case studies—from pop culture, TV, movies, sports, politics, and history—the authors show how nearly every business and personal interaction has a game-theory component to it. Mastering game theory will make you more successful in business and life, and this lively book is the key to that mastery.

Captain Bunn founded SOAR to develop effective methods for dealing with flight anxiety. Therapists who have found this phobia difficult to treat will find everything they need to give their clients success. Anxious flyers who have "tried everything" to no avail can look forward to joining the nearly 10,000 graduates of the SOAR program who now have the whole world open to them as they fly anxiety free wherever they want. This approach begins by explaining how anxiety, claustrophobia, and panic are caused when noises, motions—or even the thought of flying—trigger excessive stress hormones. Then, to stop this problem, Captain Bunn takes the reader step-by-step through exercises that permanently and automatically control these feelings. He

also explains how flying works, why it is safe, and teaches flyers how to strategically plan their flight, choose the right airlines, meet the captain, and so on. Through this program, Captain Bunn has helped thousands overcome their fear of flying. Now his book arms readers with the information they need to control their anxiety and fly comfortably.

Though U.S. leaders try to convince the world of their success in fighting al Qaeda, one anonymous member of the U.S. intelligence community would like to inform the public that we are, in fact, losing the war on terror. Further, until U.S. leaders recognize the errant path they have irresponsibly chosen, he says, our enemies will only grow stronger. According to the author, the greatest danger for Americans confronting the Islamist threat is to believe—at the urging of U.S. leaders—that Muslims attack us for what we are and what we think rather than for what we do. Blustering political rhetoric.
