The purpose of safety wiring fasteners is to prevent fasteners from becoming loose during use. Thus, standard safety wiring patterns should be used to apply clockwise force to fasteners and secure them against inadvertent rotation in a counterclockwise direction.

Boeing: The Boeing Company

1. Benefits of high-strength alloy steel. 2. Importance of proper inspection and rework. 3. Guidelines for reworking high-strength alloy steel components. any landing gear, flap track, flap carriage, and other flap actuating components on Boeing airplanes are made of high-strength alloy steels, such as 300M, Hy-Tuf, 4340M, and 4330M.

We are adopting a new airworthiness directive (AD) for all The Boeing Company Model 757 airplanes. This AD was prompted by reports of fractured rudder

pedal pushrod connecting bolts in a rudder pedal assembly.

Chapter 20 - Standard Practices

This document proposes the supersedure of an existing airworthiness directive (AD), applicable to all Boeing Model 737-100, - 200, -200C, -300, -400, and -500 series airplanes, that currently requires repetitive inspections to find cracks, fractures, or corrosion of each carriage spindle of the...

BOEING SOPM PDF - ZBVC

Boeing SOPM guidelines should be followed for the rework of any component and for all types of plating or

coating. Rework or overhaul of components should not introduce stress concentrations, or otherwise increase stresses, which can reduce the service life of a component below that of the original design configuration. *Boeing Commercial Airplanes (BCA) Terms and Conditions - 6XXX* Enterprise One is an ERP tool specifically tailored to the air transport industry. It's a set of integrated software modules that can help you optimize major support functions such as maintenance planning and

scheduling, engineering operations, logistics management, document management, and configuration control.
