Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary "theory" on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: "I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect." -- from <http://www.jstor.org> (Sep. 12, 2014).

CHINA CEO: A Case Guide for Business Leaders in China Some Western business leaders are moving into China without any clear knowledge of the many pitfalls they will encounter: the weak rule of law, forceful governmental intervention, a scarcity of managerial talent, the likelihood of counterfeiting, the fast paced business environment and surprisingly aggressive local competitors. This book uses case studies to both illuminate and examine these key managerial challenges. Each case focuses on a specific topic and is complemented with commentaries from professors and executives who have extensive front-line experience in China. The cases are the product of three-year research and are well-tested in MBA and executive courses. The authors' philosophy is that readers can learn most effectively through the experience of others captured in real cases! The book includes a broad range of companies, such as Emerson, Eli Lilly, General Motors, Peugeot, Carrefour, Daimler-Chrysler, Picanol. It also includes more personal experiences concerning the many challenges of expatriate-living in China, some of whom have started their own businesses. The book provides concise but insightful analysis to help readers to get the most from the case studies. As a result, this book will help you get better prepared to face the varied challenges you will find in China. These cases complement the material presented in a previous work, *China CEO: Voices of Experience* from 20 International Business Leaders, also published by John Wiley & Sons.

Published in 1994, this book is the result of the collaborative work undertaken at the Liverpool-based Geography INSET Primary Project (GIPP) over three years. It presents a series of chapters for primary teachers seeking to implement the Statutory Orders for Geography in the National Curriculum. Steering a middle course between the sophistications of a theoretical/methodological text and the over-simplifications of a 'tips-for-teachers' approach, the authors highlight the positive opportunities offered by the National Curriculum. At the same time they are critical of many aspects of the Statutory Orders, without losing sight of their objective to help teachers to improve the quality of primary geography teaching. The book is especially useful for INSET work for teachers who have already grappled with National Curriculum Geography and who will be adjusting to the post-Dearing rearrangements.
