The Boeing B-29 was one of the most sophisticated aircraft of WWII. It featured many innovations including guns that could be fired by remote control and pressurized crew compartments. It was also the heaviest production plane of the war with terrific range and bomb carrying capabilities.

Carrying a crew of ten, the Superfortress devastated Japan in a series of gigantic raids in 1944-45. In the end it would be the B-29s "Enola Gay" and "Bock's Car" that dropped the atomic bombs and effectively ended the conflict. Originally printed by the United States Army Air Force in January of 1944, the B-29 Bomber Pilot's Flight Operating Manual taught pilots everything they needed to know about the "Superfort" Originally classified "Restricted," the manual was declassified long ago and is here reprinted in book form. This affordable facsimile has been reformatted, and color images appear as black and white. Care has been taken however to preserve the integrity of the text.

Whether it's bungee jumping in Queenstown or visiting the Guinness factory in Dublin, where we travel - and what we do when we get there - has changed significantly in the past twenty years. This innovative textbook explores what is possibly the most unrecognized of international service industries, placing tourism in the context of contemporary globalization and trade-in services. It provides new perspectives on tourism as a form of international business, and the implications for firms, the state and individuals. Split into four separate sections, with introductions outlining the key themes in each, it examines important topics such as: the role of governance and regulation in tourism services the effects of increased global mobility on tourism entrepreneurship how tourism businesses are becoming internationalized why other business sectors are increasingly interested in tourism. Case studies are used throughout to highlight important issues, from developments in the aviation industry to the rise of working holidays. This book gets to the core of a crucial service industry, and is essential reading for any researcher or student of tourism or international business.

The F-89 Scorpion was the first multi-seat, all-weather jet interceptor in the U.S. Air Force. It also became the first aircraft ever equipped with a nuclear air-to-air weapon - the 1.5 kiloton Genie missile. The F-89 made its debut in 1948, joined the Air Force in 1950, and then served as the mainstay of Air Defense Command for 17 years. Over 1,000 F-89s were produced, including 350 of the J model equipped with pylons to carry the Genie. (One F-89 did fire the missile as part of Operation Plumbob in 1957.) Originally printed by Northrop and the USAF, this F-89 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified 'Restricted', the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.

"I thought life was pretty much over." Paul Herman "I was afraid people wouldn't see me for who I still was." Cathy Green "I didn't need this to be a better person." Susan Douglas "I wasn't sure I wanted to live 'this way.'" Kevin Wolitzky The above four

people and 49 more just like them went on to find high levels of success and lead satisfying lives. Together they tell 53 stories of moving forward to meet all the challenges, fears, obstacles, and problems common to the life-altering circumstances after spinal cord injury, and doing it without benefit of wealth, large settlements or solid health coverage. Ranging in age from 21 to 67, disabled from three to 48 years they share 931 years of disability experience. Roll Models is a valuable new resource for recently injured people and their families, and for nurses, therapists, psychologists and all other professionals who treat, work with and care for people with spinal cord injury. Straight from the horse's mouth, survivors explore their experiences with disability and answer many questions those in rehab are asking: Early Thoughts What were your thoughts immediately following injury? What were your initial thoughts and reactions regarding SCI and the future? The First Years What were your biggest fears during that first year or so? How did you get past those early fears? Changes, Obstacles and Solutions How much different are you now, compared to how you were before injury? What's been the biggest obstacle? How did you address these obstacles? Finding What Works What have been the most difficult things for you to deal with since injury? What's the worst thing about having an SCI and using a chair? What's been your biggest loss due to injury? Is SCI the worst thing that ever happened to you? Tell me something about your problem solving skills. How do you deal with stress? What do you do to relieve stress? Salvations, Turning Points and More Was there any one thing that was your "salvation" or key to your success? Was there a turning point for you when you began to feel things were going to get better? What personal factors, habits and beliefs have helped you the most? SCI and Meaning Do you find any meaning, purpose or lessons in your disability? Did any positive opportunities come your way because of your injury? What's your greatest accomplishment? What are you most proud of? "A wonderful roadmap with many alternate routes to living and thriving with SCI." Minna Hong, SCI survivor and Peer Support Coordinator/Vocational Liaison, Shepherd Center "Avoids the trap of providing a 'one size fits all mentality' and provides solutions as varied as the individuals used as examples. Accentuates the positives while not sugar coating the difficulties. Essential reading." Jeff Cressy SCI survivor and Director of Consumer and Community Affairs, SCI Project, Rancho Los Amigos "A great resource for people as they venture out into the world, or search for meaning and a deeper, richer life. Filled with examples of real people and their real experiences." Terry Chase, ND, RN; SCI survivor; Patient & Family Education Program Coordinator, Craig Hospital "A wonderful tool for the newly spinal cord injured individual, as well as the therapists and counselors working with them. This certainly hits the mark in capturing important survival strategies." Jack Dahlberg, SCI survivor, Past President of the National Spinal Cord Injury Association "Artfully crafted and organized, Roll Models sensitively portrays life following spinal cord injury. Informative, creative, sensitive, as well as infused with humor and a kind heart. Recommended with my highest accolades." This study analyzes airpower doctrine from the viewpoint of Clausewitzian friction. The result of the analysis is the conclusion that American airpower doctrine has changed very little since the 1930s and that it is fundamentally flawed. Lieutenant Colonel Barry D. Watts has been teaching and writing about military theory since he joined the Air Force Academy faculty in 1974. During the Vietnam War he saw combat with the 8th Tactical Fighter Wing at Ubon, Thailand, completing 100 missions over North Vietnam in June 1968. Subsequently, Lieutenant Colonel Watts flew F-4s from Yokota AB, Japan, and Kadena AB, Okinawa. More recently, he has served as a military assistant to the Director of Net Assessment, Office of the Secretary of Defense, and with the Air Staff's Project CHECKMATE.

From its ancient incarnation as a song to recent translations in modern languages, Homeric epic remains an abiding source of inspiration for both scholars and artists that transcends temporal and linguistic boundaries. The Cambridge Guide to Homer

examines the influence and meaning of Homeric poetry from its earliest form as ancient Greek song to its current status in world literature, presenting the information in a synthetic manner that allows the reader to gain an understanding of the different strands of Homeric studies. The volume is structured around three main themes: Homeric Song and Text; the Homeric World, and Homer in the World. Each section starts with a series of 'macropedia' essays arranged thematically that are accompanied by shorter complementary 'micropedia' articles. The Cambridge Guide to Homer thus traces the many routes taken by Homeric epic in the ancient world and its continuing relevance in different periods and cultures.

Understanding Reading revolutionized reading research and theory when the first edition appeared in 1971 and continues to be a leader in the field. In the sixth edition of this classic text, Smith's purpose remains the same: to shed light on fundamental aspects of the complex human act of reading--linguistic, physiological, psychological, and social--and on what is involved in learning to read. The text critically examines current theories, instructional practices, and controversies, covering a wide range of disciplines but always remaining accessible to students and classroom teachers. Careful attention is given to the ideological clash that continues between whole language and direct instruction and currently permeates every aspect of theory and research into reading and reading instruction. To aid readers in making up their own minds, each chapter concludes with a brief statement of "Issues." **Understanding Reading: A Psycholinguistic Analysis of Reading and Learning to Read, Sixth Edition** is designed to serve as a handbook for language arts teachers, a college text for basic courses on the psychology of reading, a guide to relevant research on reading, and an introduction to reading as an aspect of thinking and learning. It is matchless in integrating a wide range of topics relative to reading while, at the same time, being highly readable and user-friendly for instructors, students, and practitioners.

The principal audience for this book seems to be deliberately and most certainly an academic one; that said, those practitioners from a business management or central/local government support-agency background might also find the text a useful resource. Intrinsically, those employed teaching and researching within the fields of entrepreneurship or regional economic development will find this publication an invaluable and indispensable reference tool. . . After an excellent, cohesive and informative introductory chapter, which places the book firmly in the field of regional entrepreneurship theory development, the reader is effortlessly prepared for the intellectually challenging read ahead. . . this book is well laid out and it is easy for the reader to pick up the thread of the argument, even after a lay-off. The endnotes after each chapter are useful and comprehensive, adding richness to the text through the additional information. The bibliography is as comprehensive as it is exhaustive. . . Professor Julien has given us a book that presents both an interesting and alternative perspective to the field of entrepreneurial cross-disciplinary research. Paul J. Ferri, International Journal of Entrepreneurial Behaviour and Research . . . it is my view that this book gives a very important contribution for the understanding of development of local entrepreneurship, through its cross-disciplinary approach. I see the book is especially interesting from an entrepreneurship and a regional development perspective. . . this book should inspire research that takes a more holistic approach using different levels of analysis and applies it to economic development at a local/territorial level, when studying entrepreneurship. Einar Lier Madsen, International Small Business Journal
The reader who is interested in entrepreneurship and/or regional development will find this book a welcome contribution to the field. Rainer Harms, Entrepreneurship and Innovation For too long, researchers have regarded local dynamism as the result of the actions of certain entrepreneurs. If this were the case, how could we explain the simultaneous presence of winning , stagnating or declining areas with very similar socioeconomic profiles within the same region? Departing from this restrictive and somewhat inadequate approach, Pierre-André Julien considers entrepreneurship as a collective behaviour specifically related to the dynamism of the milieu in which it develops. The author introduces a complex, innovative theory of local entrepreneurship, demonstrating that the emergence of new ventures and the development of existing enterprises cannot be understood without taking into account certain factors: locale, social capital, networking and entrepreneurial culture within a given area are all crucial to entrepreneurial growth. Expanding upon this theory, the book demonstrates how entrepreneurship can be fostered in order to support collective development. Various forms of partnership among socioeconomic actors are then analysed to highlight the social conventions and entrepreneurial culture that connect and intensify the energies at the root of local dynamism. This highly original book represents a departure from entrepreneurship literature that is largely limited to the study of entrepreneurs behaviour. Its dynamic presentation of holistic theory will prove an extremely absorbing read for those with an academic or professional interest in

business and management, entrepreneurship
and regional development.
