*N WITH ...*

A document management system is a system used to receive, track, manage and store documents and reduce paper.

Most are capable of keeping a record of the various versions created

and modified by different users. In the case of the management of digital documents such systems are based on computer programs. The term has some overlap with the concepts of content management

---

systems. It is often viewed as a component of enterprise content management systems and related to digital asset management, d
