The main feature of Mono Motronic system is the existence of a single valve for all engine cylinders. This valve is mounted on the throttle body (part like a carburetor). The throttle body integrates other components that in the Motronic system are scattered around the engine, like Idling actuator and butterfly potentiometer, among other.

Re: Mono Jetronic A2.2 and Digiplex 2  
Another thing about the matching of ECUs to injection units and ignition systems - the original breakerless (and possibly other digital ignition systems used) system which would have been on the 1.0 and 1.1 - doesn't take an ignition input, it decided on the fuelling without that.  
*Free Download Here*  
Jetronic is a trade name of a fuel injection technology for automotive petrol engines, developed and marketed by Robert Bosch GmbH from the 1960s onwards. Bosch licensed the concept to many automobile manufacturers. There are several variations of the technology offering technological development and refinement.  
**Bosch Mono Jetronic A2 2**  
Bosch Mono-Jetronic A2.2 system The Mono-Jetronic A2.2 system is a single-point fuel injection system incorporating a catalytic converter in the exhaust system. The fuel pump, located in the fuel tank, pumps the fuel through a filter to the single fuel injector. The electronic control unit (ECU), which is triggered by the ignition circuit, sends *LE-Jetronic - Bosch Mobility Solutions* Mono-jetronic (Bosch Technical Instruction Series) by Robert Bosch | Jan 1, 1991. In the LE-Jetronic system, the injection valves spray the fuel simultaneously, what is to say, they are all driven at the same time. In this system, the injection command unit controls only the fuel system. The LE-Jetronic system is analog, and therefore it does not keep in memory possible damage that may occur.
