This book explores the significant body of architectural photographs produced in Czechoslovakia in the period of the 1920s and 1930s. In these important years, both architects and photographers saw

themselves as participants in the creation of a new world, pursuing beliefs in social and technological utopias. Practitioners in the two fields shared and stimulated each other's vision, fostering interplay that consisted of mutual influences, parallels, and affinities. The process of modernization as well as the creation of nation states and the rise of the middle class started later in Central Europe than in Western Europe. With its young middle class, Czechoslovak state eagerly embraced modern ideas and recognized in architecture a powerful tool for expressing its goals and ideals. For this reason, Czechoslovakia became one of the centers of the modern movement in architecture in the 1920s and 1930s. -- From

A historian examines how everyday people reacted to the president ' s assassination in this " highly original, lucidly written book " (James M. McPherson, author of *Battle Cry of Freedom*). The news of Abraham Lincoln ' s assassination on April 15, 1865, just days after Confederate surrender, astounded a war-weary nation. Massive crowds turned out for services and ceremonies. Countless expressions of grief and dismay were printed in newspapers and preached in sermons. Public responses to the assassination have been well

chronicled, but this book is the first to delve into the personal and intimate responses of everyday people—northerners and southerners, soldiers and civilians, black people and white, men and women, rich and poor. Exploring diaries, letters, and other personal writings penned during the spring and summer of 1865, historian Martha Hodes captures the full range of reactions to the president's death—far more diverse than public expressions would suggest. She tells a story of shock, glee, sorrow, anger, blame, and fear. " 'Tis the saddest day in our history," wrote a mournful man. It was "an electric shock to my soul," wrote a woman who had escaped from slavery. "Glorious News!" a Lincoln enemy exulted, while for the black soldiers of the Fifty-Fourth Massachusetts, it was all "too overwhelming, too lamentable, too distressing" to absorb. Longlisted for the National Book Award, *Mourning Lincoln* brings to life a key moment of national uncertainty and confusion, when competing visions of America's future proved irreconcilable and hopes for racial justice in the aftermath of

the Civil War slipped from the nation's grasp. Hodes masterfully explores the tragedy of Lincoln's assassination in human terms—terms that continue to stagger and rivet us today.

Time = the fourth dimension and a measure in which events can be ordered from the past through the present into the future But what happens when two of those dimensions collide? Six stories of love past and present: from the breathtaking fjords and conquering Vikings of Norway to the lush green isles of Ireland and its ever-battling lairds; from the white sand dunes and sculptures of Egypt and the vanquishing Rome to a simpler life in the early USA, including the iconic Route 66. Introduction to Data Compression Frederick Warne Publishers
In August 2009, former madam Dalia Dippolito conspired with a hit man to arrange her ex-con husband's

murder. Days later, it seemed as if all had gone according to plan. The beautiful, young Dalia came home from her health club to an elaborate crime scene, complete with yellow tape outlining her townhome and police milling about. When Sgt. Frank Ranzie of the Boynton Beach, Florida, police informed her of her husband Michael's apparent murder, the newlywed Dippolito can be seen on surveillance video collapsing into the cop's arms, like any loving wife would—or any wife who was pretending to be loving would. The only thing missing from her performance were actual tears. ... And the only thing missing from the murder scene was an actual murder. Tipped off by one of Dalia's lovers, an undercover detective posing as a hit man met with Dalia to plot her husband's murder while his team planned, then staged the murder scenario—brazenly inviting the reality TV show Cops along for the ride. The Cops video went viral, sparking a media frenzy: twisted tales of illicit drugs, secret boyfriends, sex-for-hire, a cuckolded former con man, and the

defense's ludicrous claim that the entire hit had been staged by the intended victim for reality TV fame. In *Poison Candy*, case prosecutor Elizabeth Parker teams with bestselling crime writer Mark Ebner take you behind and beyond the courtroom scenes with astonishing never-before-revealed facts, whipsaw plot twists, and exclusive photos and details far too lurid for the trial that led to 20 years in state prison for Dalia Dippolito.

This book contains state-of-the-

art contributions in the field of evolutionary and deterministic methods for design, optimization and control in engineering and sciences. Specialists have written each of the 34 chapters as extended versions of selected papers presented at the International Conference on Evolutionary and Deterministic Methods for Design, Optimization and Control with Applications to Industrial and Societal Problems (EUROGEN 2013). The conference was one of the Thematic Conferences of the European Community on Computational Methods in Applied Sciences (ECCOMAS). Topics treated in the various chapters are classified in the following sections: theoretical and numerical methods and tools for optimization (theoretical methods and tools; numerical methods and tools) and engineering design and societal applications (turbo machinery; structures, materials and civil engineering; aeronautics and astronautics; societal applications; electrical and electronics applications), focused particularly on intelligent systems for multidisciplinary

design optimization (mdo) problems based on multi-hybridized software, adjoint-based and one-shot methods, uncertainty quantification and optimization, multidisciplinary design optimization, applications of game theory to industrial optimization problems, applications in structural and civil engineering optimum design and surrogate models based optimization methods in aerodynamic design.

The Message in the Bottle

The Problem with Survey

Research makes a case against survey research as a primary source of reliable information. George Beam argues that all survey research instruments, all types of asking—including polls, face-to-face interviews, and focus groups—produce unreliable and potentially inaccurate results. Because those who rely on survey research only see answers to questions, it is impossible for them, or anyone else, to evaluate the results. They cannot know if the answers correspond to respondents' actual behaviors (objective phenomena) or to their true beliefs and opinions (subjective phenomena). Reliable information can only be acquired by observation, experimentation, multiple sources of data, formal model building and testing,

document analysis, and comparison. In fifteen chapters divided into six parts—Ubiquity of Survey Research, The Problem, Asking Instruments, Asking Settings, Askers, and Proper Methods and Research Designs—The Problem with Survey Research demonstrates how asking instruments, settings in which asking and answering take place, and survey researchers themselves skew results and thereby make answers unreliable. The last two chapters and appendices examine observation, other methods of data collection and research designs that may produce accurate or correct information, and shows how reliance on survey research can be overcome, and must be. *Specifications for Public Buildings* "Lady Emily's Exotic Journey is a fun tale of desire,
