Children and adolescents with emotional and behavioural problems who are referred to mental health services for assessment often have undiagnosed mild learning disabilities, and this guide is written for clinicians involved in making such assessments. It provides full guidance on common developmental disorders and their assessment, focusing on mild to moderate disabilities in the school-aged child. It covers intellectual disabilities, dyslexia, dyscalculia (mathematical disability), autism spectrum disorders, speech and language impairment, developmental coordination disorder, and emotional and personality development. Each chapter includes an account of normal development, including developmental milestones, an overview of the disorder, and its clinical assessment. This important professional guide will be invaluable for all child health and mental health professionals and trainees, including paediatricians, psychiatrists, mental health workers, clinical psychologists and educational psychologists.

Information theory and inference, taught together in this exciting textbook, lie at the heart of many important areas of modern technology - communication, signal processing, data mining, machine learning, pattern recognition, computational neuroscience, bioinformatics and cryptography. The book introduces theory in tandem with applications. Information theory is taught alongside practical communication systems such as arithmetic coding for data compression and sparse-graph codes for error-correction. Inference techniques, including message-passing algorithms, Monte Carlo methods and variational approximations, are developed alongside applications to clustering, convolutional codes, independent component analysis, and neural networks. Uniquely, the book covers state-of-the-art error-correcting codes, including low-density-parity-check codes, turbo codes, and digital fountain codes - the twenty-first-century standards for satellite communications, disk drives, and data broadcast. Richly illustrated, filled with worked examples and over 400

exercises, some with detailed solutions, the book is ideal for self-learning, and for undergraduate or graduate courses. It also provides an unparalleled entry point for professionals in areas as diverse as computational biology, financial engineering and machine learning.

Creativity in Transition Cambridge Scholars Publishing

In an era of intensifying globalization and transnational connectivity, the dynamics of cultural production and the very notion of creativity are in transition. Exploring creative practices in various settings, the book does not only call attention to the spread of modernist discourses of creativity, from the colonial era to the current obsession with 'innovation' in neo-liberal capitalist cultural politics, but also to the less visible practices of copying, recycling and reproduction that occur as part and parcel of creative improvization.

Developmental Assessment of the School-Aged Child with Developmental Disabilities Cambridge University Press

This academic inquiry attempts to explore the state of relations between the German Christian missionaries and the Christian English government before and after World War I in India; the unpleasant consequences on German Missionaries and their families by the unwarranted attack of the German Cruiser SMS Emden on the Madras Presidency, aggravated further by the act of a former soldier in the guise of a missionary. It uncovers the involvement of the German military, Nachrichtenstelle für den Orient (NfO) and the Hindu revolutionaries in causing unrest in India to derail the economy and tarnish the image of the British Government. It exposes the joining forces of diametrically opposite ideologies, the German Christian Government, German Christian missionary

in NFO and the Indian Hindu revolutionaries, on a common platform. Likewise, it uncovers the manipulation of the selfsame Scripture by the doctrinally similar Christian denominations to whip up their clashing nationalistic passions. Further, this research narrates the bitter experiences of separated missionary spouses, scattered family members, the plight of children, deportation, gruelling voyages, seasickness, experiences of missionaries as Prisoners of War (POW), etc. The following three methods were combined for this research: a World War I historiographical approach coupled with a collective biographical approach and an entanglement approach. I used archived and published English, German, and Tamil sources. The main archives were the Political Archives of the Foreign Office (PAAA) in Berlin, the archives of the Franckeshe Foundations in Halle, the Mission Society in Leipzig, the British Library in London, and the United Theological College Bangalore, the Gurukul Lutheran Theological College, Chennai and Avanakappakam (National Archives), Chennai, the materials in the Political Foreign Office (PAAA) in Berlin concerning the correspondence between the Intelligence Service for the Orient and the Indian revolutionaries; the archive of the Franckeshe Foundation in Halle contained in the two-volumes in one file from the Indian Mission during the war (1914 -1916) and The Leibniz Centre for Modern Orient archives Berlin.

Job seekers would learn how to upload their portfolios and highlight their skills and achievements and connect with prospective employers and collaborators. Book Reviews "I have been a regular user of the book

by Prof. Nira Konar and found it a very reliable resource. The chapters on 'Group Discussion and Body Language' are particularly helpful. Besides, the chapter on 'Communication Theory' has been relevantly and effectively explained keeping in mind the needs of the students. Overall, the book is very accessible by all levels of students. It is a part of recommended reading for my students." - Nandini Mukherjee Course Coordinator, Department of Communicative English, St. Xavier's College, Kolkata "An extremely concise, lucidly written and reader-friendly book, that serves as a handy reference manual for all in-service English language teachers of degree engineering colleges. The B.Tech Communicative English syllabus has been closely followed, with detailed sections on grammar, writing and comprehension. The chapters on vocabulary take an insightful look at etymology, word origins, synonymy and antonymy. Detailed word lists and practice exercises make the section extremely helpful for practicing teachers. The sections on grammar are fairly detailed, offering a thorough analysis of Verbs, Tenses, Voice, Narration, Transformation of Sentences and Error Correction. There are plenty of practice exercises for the teacher to choose from. Reading skills are well discussed and technical writing is given all the importance and predominance it usually occupies in any course on technical communication. The section on report writing is extremely useful as a guide for teachers for teaching students the formatting and writing essentials in documenting reports. There is a section on professional speaking too, which enriches the content of the book. On the whole, the book is of continuing usefulness and relevance in any technical English course and will be used by teachers and students alike for many years to come." - Dr Indrajit Bose Assistant Professor of English, GNIT, Kolkata "Dr. Konar's book acts as a comprehensive guide to the students of professional, technical as well as basic courses to hone their language skills. The language of the book is persuasive, fluid and student-friendly which makes it useful even to the first generation learners of English. The scope of this book extends from word-building to report writing and covers almost all the thrust areas of language training in a nutshell. Hence, it deserves a shelf-space in the library of any institution." - Ayushman Banerjee, Assistant Professor in English, Haldia Government College, Kolkata "This is one of the best books on 'Communication' available in the market. Dr. Nira Konar is a brand by herself whenever English Language Teaching (ELT) comes into discussion. This compact edition discusses in detail the various aspects of language ranging from Vocabulary, Grammar, Syntax to effective communication in business. The book gives a clear reading of LSRW skills such as writing, reading, listening, and public speaking. It further confers different means of effective communication, situational dialogues, body language, and group discussions. The book

follows the present MAKAUT curriculum of English for B.Tech 1st year 2nd Semester (HM-HU 201 & HU 291) thoroughly. It not only gives an overview of the Theory syllabus but also provides details of Language Laboratory activities as well. "Communication Skills for Professionals" enables the readers to express themselves clearly and communicate effectively at the workplace. This book not only deals with the rudiments of communication but also gives insights into the body language and provides important tips on how to be successful at interviews and group discussions. Primarily intended for students of engineering and technology, the book will also be useful for Management students and the students of all disciplines who want to acquire the skill in corporate communication and excel in their respective professional areas." - Sohini Datta Assistant Professor, Department of Management, IEM, Sector V, Salt Lake, Kolkata

"Easy and in-depth writing on the subject is the aim of this book. The author has put in here the fruits of teaching the students from the wide-ranging and first-hand knowledge of business speaking and writing, and listening in a friendly way. It is enriched with extensive references. On every page of the book the students will see how a simpler style of English is balanced with their need." - Dalia Sen Assistant Professor, Bengal Institute of Technology (Under Techno India Group), Kolkata

Architectural Actions on the Religious Heritage after Vatican II PHI Learning Pvt. Ltd.

The U.S. military has been continuously engaged in foreign conflicts for over two decades. The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation – their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

This book serves to shed some light on several controversial questions about

contemporary interventions on religious heritage buildings. In the mid-1960s, a process of renewal of Catholic churches began, which sought to respond to the liturgical modifications implemented during the Vatican II (1962-65). Fifty years later, this process continues to be problematic in buildings with a high heritage or historical value. From an operational point of view, it is stimulating to revisit the most relevant architectures at the international level, those high-impact works that were generated thanks to an open and serene dialogue between principals, architects, users, artists and patrimonial leaders. Thus, it is essential to know the criteria that have supported interventions, whether legal (both ecclesiastical and civil), architectural, artistic, liturgical or pastoral. In this sense, what references could be used at a time like ours? How can we reform what has already been reformed?

A unique narrative structure brings the history of race science in mid-twentieth-century India to vivid life. There has been a recent explosion in studies of race science in the twentieth and twenty-first centuries, but most have focused either on Europe or on North America and Australia. In this stirring history, Projit Bihari Mukharji illustrates how India appropriated and repurposed race science to its own ends and argues that these appropriations need to be understood within the national and regional contexts of postcolonial nation-making—not merely as footnotes to a Western history of "normal science." The book comprises seven factual chapters operating at distinct levels—conceptual, practical, and cosmological—and eight fictive interchapters, a series of epistolary exchanges between the Bengali author Hemendrakumar Ray (1888–1963) and the protagonist of his dystopian science fiction novel about race, race science, racial improvement, and dehumanization. In this way, Mukharji fills out the historical moment in which the factual narrative unfolded, vividly revealing its moral, affective, political, and intellectual fissures.

The development of international arbitration

as an autonomous legal order comprises one of the most remarkable stories of institution building at the global level over the past century. Today, transnational firms and states settle their most important commercial and investment disputes not in courts, but in arbitral centres, a tightly networked set of organizations that compete with one another for docket, resources, and influence. In this book, Alec Stone Sweet and Florian Grisel show that international arbitration has undergone a self-sustaining process of institutional evolution that has steadily enhanced arbitral authority. This judicialization process was sustained by the explosion of trade and investment, which generated a steady stream of high stakes disputes, and the efforts of elite arbitrators and the major centres to construct arbitration as a viable substitute for litigation in domestic courts. For their part, state officials (as legislators and treaty makers), and national judges (as enforcers of arbitral awards), have not just adapted to the expansion of arbitration; they have heavily invested in it, extending the arbitral order's reach and effectiveness. Arbitration's very success has, nonetheless, raised serious questions about its legitimacy as a mode of transnational governance. The book provides a clear causal theory of judicialization, original data collection and analysis, and a broad, relatively non-technical overview of the evolution of the arbitral order. Each chapter compares international commercial and investor-state arbitration, across clearly specified measures of judicialization and governance. Topics include: the evolution of procedures; the development of precedent and the demand for appeal; balancing in the public interest; legitimacy debates and proposals for systemic reform. This book is a timely assessment of how arbitration has risen to become a key component of international economic law and why its future is far from settled.

The purpose of this book is to provide the most comprehensive, easy-to-use, and informative guide on light microscopy. *Light and Video Microscopy* will prepare the reader for the accurate interpretation of an image and understanding of the living cell. With the presentation of geometrical optics, it will assist the reader in understanding image formation and light movement within the microscope. It also provides an explanation of the basic modes of light microscopy and the components of modern electronic imaging systems and guides the reader in determining the physicochemical information of living and developing cells, which influence interpretation. Brings together

of mathematics, physics, and biology to provide a broad and deep understanding of the light microscope. Clearly develops all ideas from historical and logical foundations. Laboratory exercises included to assist the reader with practical applications. Microscope discussions include: bright field microscope, dark field microscope, oblique illumination, phase-contrast microscope, photomicrography, fluorescence microscope, polarization microscope, interference microscope, differential interference microscope, and modulation contrast microscope.

This book is intended to assist individuals in dealing with change occurring externally to the person, as well as change that the individual attempts to bring about in themselves. The approaches taken attempt to organize the concepts of change within a broad framework, a continuum (or gradient) which will enable the person to see changes in life as existing on a spectrum from those change phenomena which are external to the individual (e.g., economic or environmental events) to those within the person (e.g., stopping smoking or changing one's behavior). Within an overarching framework of general systems theory, which emphasizes a holistic view of change, the book describes a number of conceptual structures or what are conceived as "models." The volume focuses on helping the reader to recognize the way these models appear in the person's environment, as well as in the individual's own functioning. Further, the book indicates how the person can apply these models in his or her own efforts to deal with life and change. Thus, each chapter describes the essential idea of a particular model and then provides a section on the applications of that model. The beginning chapters describe several abstract "models" followed by a chapter which presents John Bowlby's attachment theory and his concept of "internal models," which reflect individuals' core perceptions of themselves and others; finally, the book includes a discussion of James Prochaska's stages of change model which describes the ways in which individuals proceed to make changes in their own behavior and functioning. The book presents a unified view of change in life as it occurs external to, and within, the person and concludes with a discussion of ways the individual can consider these various concepts in efforts to make change. The book is appropriate for three audiences. First, the volume is suitable for mental health professionals for whom the book can provide a unique view of the change process in the treatment they offer and they might request that their patients read the book. Second, the book is

relevant for individuals interested in a process of self-change, whether they are contemplating or are in a psychotherapeutic relationship or simply want to make changes in themselves on their own. Third, the book is also relevant for managers in organizations who deal with the concepts of change in the individuals they supervise. *Subject Guide to Books in Print* Elsevier Health Sciences

This book covers various experimental and theoretical aspects of multiparticle production in high energy interactions from lepton-lepton, lepton-hadron, hadron-hadron, hadron-nucleus and heavy ion collisions. This is the first time that data from CERN LEP, FNAL, DESY, BNL AGS, CERN SPS and BNL RHIC have been collected in a single volume. Not only accelerator-induced reactions but also cosmic ray interactions of very high energy are discussed, and the up-to-date theoretical interpretations are summarized.
