How the West Fuels War and Poverty in the Developing World Saint Martin's Griffin  
Down in Atlanta, tempers - and temperatures - are about to flare . . . As a mercenary who cleans up after magic gone wrong, Kate Daniels has seen her share of occupational hazards. Normally, waves of paranormal energy ebb and flow across Atlanta like a tide. But once every seven years, a flare comes, a time when magic runs rampant. Now Kate's going to have to deal with problems on a much bigger scale: a divine one. When Kate sets out to retrieve a set of stolen maps for the Pack, Atlanta's paramilitary clan of shapeshifters, she quickly realizes much more at stake. During a flare, gods and goddesses can manifest - and battle for power. The stolen maps are only the opening gambit in an epic tug-of-war between two gods hoping for rebirth. And if Kate can't stop the cataclysmic showdown, the city may not survive . . .

What Sells for what (in Every Category!) Houghton Mifflin Harcourt  
Globalization has created an interconnected world, but has not diminished violence and militarism. The Economics of Killing describes how the power of global elites, entrenched under globalization, has created a deadly cycle of violence. In this groundbreaking work, Vijay Mehta shows how attempts at peaceful national development are routinely blocked by Western powers. He centers the 2008 financial crisis in US attempts to block China's model of development. He shows how Europe and the US conspire with regional dictators to prevent countries from developing advanced industries, and how this system has fed terrorism. Mehata argues that a different world is possible, based on policies of disarmament, demilitarization, and sustainable development. This original and thought-provoking book will be of great interest to anyone concerned about the consequences of endless war fueled by the West.

Business magazine Consumers Union U.S.  
The No. 1 electrical reference, this book is the single most important reference in the electrical industry, outlining minimum standards for all types of electrical installations. It includes information on wiring methods and materials, wiring and protection, and equipment for general use. Tables.

CD Review  
Appropriate for Language Arts courses offered in education departments in universities and colleges across Canada. The Second Canadian edition of this popular core text for beginning teachers presents the content of the language arts curriculum and the most effective strategies for teaching it to kindergarten through Grade Eight students. The philosophy of the text reflects a constructivist approach to teaching and learning. The book's coverage focuses on the six language arts paired skills, and offers the strongest treatment available of the reading-writing connection.
