It’s Aya’s wedding day.

Her third. Her current two  
husbands aren’t too fussed.

In a society in which there  
are few women, that’s just  
what happens. But as the  
household prepares for the  
wedding feast, a stranger  
arrives – one who threatens  
to challenge everything they  
believe in. Against a

backdrop of modern rural  
India, Sharmila Chauhan  
weaves an extraordinary tale

of love and wonder. From  
the preparation of luxury  
food and the sacrifice of the  
lamb to the dressing of the  
bride and the dance to end  
all dances, this will be an  
exuberant, joyful and  
challenging piece of theatre.

‘In parts of India, polyandry  
has become a necessity.

Gendercide, as a  
consequence of the ancient  
preference for boys, the  
modern desire for smaller  
families and the increasing  
availability of ultrasound  
techniques to detect the  
gender of a baby still in the  
womb means that the  
number of females is  
declining. I wrote *The  
Husbands* both as a response  
to this but also as an  
exploration of the  
complexity of love, intimacy  
and trust between one  
woman and three men where  
gender differences and  
expectations are amplified.

In a sense this play is as  
much a warning as an  
allegory for the fate of  
women in The West today.’

“Darlison elucidates the zodiac’s significant place in the Gospels, most specifically in the Book of Mark . . . An intriguing leap into faith” (Kirkus Reviews). For millennia the world has been driven by the differences between the great patriarchal religions. Western civilization—or Christendom,

as it was once called—received its values and its confidence from a belief in God, the Father, and Jesus, his only son. But what if this conviction were founded on an error? Who is the man in the factually inconsistent Gospel stories? And who is the man who makes a brief appearance carrying a jar of water? This extraordinary study by a Unitarian minister suggests that Jesus never existed historically; he was simply a representation of an astrological theology—a representation, simply put, of the zodiac sign of Aquarius. In *The Gospel & the Zodiac*, Rev. Bill Darlison demonstrates that all the other signs are present too, in perfect zodiacal order. The Gospel story is not the product of historians or eyewitnesses, but an older, mystical text produced by an ancient, esoteric school as a guide to the Age of Pisces. Every bit as revelatory and

---

controversial as it sounds, *The Gospel & the Zodiac* will shake up the religious status quo, and in doing so, provide both a new look at a religious icon and a deeper understanding of the faith that binds millions together.

“Darlison begins by looking at different scholarly approaches to the gospels, then outlines his astrological interpretation logically and lucidly, matching the zodiacal signs to the narrative of Mark.” —*Fortean Times*

The current exponential growth in graph data has forced a shift to parallel computing for executing graph algorithms.

Implementing parallel graph algorithms and achieving good parallel performance have proven difficult. This book addresses these challenges by exploiting the well-known duality between a canonical representation of graphs as abstract collections of vertices and edges and a sparse adjacency matrix representation. This linear algebraic approach is widely accessible to scientists and engineers who may not be

---

formally trained in computer science. The authors show how to leverage existing parallel matrix computation techniques and the large amount of software infrastructure that exists for these computations to implement efficient and scalable parallel graph algorithms. The benefits of this approach are reduced algorithmic complexity, ease of implementation, and improved performance.
