The Overview of the Topic was the following: "One of the most active areas of research in molecular microbiology has been the study of how bacteria modulate their genetic activity and its consequences. The prokaryotic world has gained a lot of interest. In addition to the above, the invention is based on the subject-matter of the present invention, which is incorporated herein by reference in its entirety. All of these processes are fundamental to the operation of a genetic entity and condition their lifestyle. Further, the discoveries in the bacterial world have been of ample use in eukaryotes. [Article in German]

Hansen, Hansen, H. (2003). In addition to the fundamental interest in understanding modulation of prokaryotic lifestyle by DNA binding proteins, As it is well-known the antibiotic-resistance strains of pathogenic bacteria are a major world problem, so that there is an urgent need of innovative technologies to tackle it. Most of the patients are infected with the virus. It is an imperative of finding new alternatives to the 'classical' way of treatment of bacterial infections and these new alternatives. Nevertheless, These new alternatives will find a dead-end if we are unable to obtain a better understanding of the basic processes modulating bacterial gene expression. Our goal is to achieve our understanding of protein-DNA interactions. First, the topic will bring together a lot of very active research in the study of gene replication, gene regulation, the strategies. We therefore want to acquire an in-depth knowledge of some of the

mechanisms of gene regulation, gene transfer, and gene replication. Further, the readers of the papers will realize the importance of the topic and will learn the most recent thinking, results, and approaches in the area ". We are fully confident that we have exceeded our expectations. Now we are proud to present the final output of the topic, which is the eBook. It includes 24 articles contributed by 118 authors. As of today, March, 16th, January 2017, the total number of readings has reached 19,284, 14,921 article views, and 2,944 article downloads.

Surviving the Peace Houghton Mifflin Harcourt

Surviving the Peace is a monumental feat of ground-level reporting describing two decades of postwar life in Bosnia, specifically among those fighting for refugee rights of return. Unique in its breadth and profoundly

humanitarian in its focus, *Surviving the Peace* situates digestible explanations of the region's bewilderingly complex recent history among interviews, conversations, and tableaux from the lives of everyday Bosnians attempting to make sense of what passes for normal in a postwar society. Essential reading for students of the former Yugoslavia and anyone interested in postwar or post-genocide studies, *Surviving the Peace* is an instant classic of long-form reporting, an impossible accomplishment without a lifetime of dedication to a place and people.

This new edition is the most comprehensive reference on both the clinical and scientific aspects of diabetes, and is truly global in perspective with the inclusion of epidemiology and the nature and care of diabetes in different parts of the world. Following a similar format to the previous editions, the primary philosophy of the book is to comprehensively cover the basic science of metabolism, linking this closely to the pathophysiology and clinical aspects of the disease. A valuable resource for the whole diabetes community, the new edition offers:

- * Fully revised, updated and expanded chapters
- * Comprehensive coverage of all aspects of diabetes
- * 116 extensively referenced chapters
- * Full colour throughout
- * Available in print and online

The International Textbook of Diabetes Mellitus, Third Edition is also available online

via Wiley InterScience. With the flexibility afforded by the powerful search and navigation capabilities of Wiley InterScience, you can search the Textbook by subject, article and keyword. New and revised articles added regularly ensure that both professionals and students working within diabetes are kept abreast of rapidly developing areas such as genetics, treatment and epidemiology. This excellent work is an essential reference tool for all members of diabetes and endocrine teams, medical students, medical schools and libraries, and provides a valuable resource for pharmaceutical companies and industries which have an interest in this important field.

FROM REVIEWS OF THE SECOND EDITION: "The scope is extraordinarily wide and truly international...a must for all libraries and any individuals who are seriously interested in the diabetes epidemic..." (Diabetologia) "...a cornerstone in the field of diabetes..." (The European Journal of Medicine) "...This multi-authored textbook provides a wealth of information spanning virtually all aspects of diabetes..." (Trends in Endocrinology and Metabolism)

Non-communicable diseases (NCDs) are chronic diseases of long duration and generally slow progression, including cardiovascular diseases, cancers, chronic respiratory diseases, and diabetes. Morbidity and mortality due to non-communicable disease has

risen tremendously over the years globally. **Healthful Eating As Lifestyle (HEAL): Integrative Prevention for Non-Communicable Diseases** highlights the importance of HEAL as an intervention for the prevention and cure of NCDs, as well as the prevention and treatment of its risk factors like hypertension, high cholesterol, obesity, smoking, increased alcohol intake, and insufficient physical activity. It provides motivational strategies for users of all ages, gender, and strata for healthful eating, both in developed and developing countries. The book is composed of evidence-based information and illustrations by 32 experts, including renowned researchers from academia, government, and non-governmental organizations in the field of NCDs and nutrition from 11 countries across five continents. Furthermore, the book discusses the dose-response relationship of healthful food with NCDs and its risk factor. It also includes nutritional home remedies for prevention and control of NCDs along with safety concerns and case studies at the end of all chapters for translating theory into practice.
