In 1902, the Pearse monoplane  
(which would later become one of  
the first aircraft to achieve flight)  
was powered by a flat-twin  
engine. Amongst the first  
commercially produced aircraft to  
use a flat engine is the 1909  
Santos-Dumont\_Demoiselle  
range of airplanes, which was

powered by boxer-twin engines..  
Several boxer-four engines have

## Adventure Rider

Unlike most flat-twin, flat-four and flat-six engines, flat-twelve engines typically use the crankshaft configuration of a 180° V engine instead of a boxer engine. Therefore most flat-twelve engines have each pair of pistons sharing a crankpin, instead of the boxer design of each piston having its own crankpin.. Compared with a V12 engine, a flat-twelve has a lower center of gravity, however a ...
