following types of puzzles and logical problems: Lateral thinking: challenges that are seemingly impossible or require a lot of mathematical knowledge, but which really conceal a solution outside the box (in an indirect or creative way). Logical thinking: challenges that must be solved with logic, making inferences until finding the solution or, sometimes, eliminating the other alternatives. Mathematical knowledge: it will be necessary to know mathematical (and sometimes physical) principles to solve certain puzzles. Paper and pencil: challenges in which drawing schemes is necessary to reach the solution of certain mental games (although the most daring will continue to solve them in the head only). Spatial vision: challenges in which one must be able to imagine figures that are intertwined in two or three dimensions. *Brain Games Relax & Solve Word Search* Teacher Created Resources Regular Word Search Puzzles Too Easy?
