OCA: Oracle Certified Associate Java SE 8 Programmer I Study Guide McGraw-Hill Education

Portable, powerful, and a breeze to use, Python is the popular open source object-oriented programming language used for both standalone programs and scripting applications. It is now being used by an

increasing number of major organizations, including NASA and Google. Updated for Python 2.4, The Python Cookbook, 2nd Edition offers a wealth of useful code for all Python programmers, not just advanced practitioners. Like its predecessor, the new edition provides solutions to problems that Python programmers face everyday. It now includes over 200 recipes that range from simple tasks, such as working with dictionaries and list

comprehensions, to complex tasks, such as monitoring a network and building a templating system. This revised version also includes new chapters on topics such as time, money, and metaprogramming. Here's a list of additional topics covered: Manipulating text Searching and sorting Working with files and the filesystem Object-oriented programming Dealing with threads and processes System administration Interacting with databases Creating

user interfaces Network
and web programming
Processing XML
Distributed programming
Debugging and testing
Another advantage of The
Python Cookbook, 2nd
Edition is its trio of
authors--three well-
known Python
programming experts,
who are highly visible on
email lists and in
newsgroups, and speak
often at Python
conferences. With scores
of practical examples and
pertinent background
information, The Python

Cookbook, 2nd Edition is
the one source you need
if you're looking to build
efficient, flexible,
scalable, and well-
integrated systems.

[JAVA Developer's Journal](#)

A study was made of the
labor market issues facing
professionals and
employers in the new
media industry, an industry
that combines elements of
computing technology,
telecommunications, and
content to create products
and services that can be
used interactively by
consumers and business

owners. The study was
carried out through a Web-
based survey of members
of five intermediary
associations that serve
workers in the industry.
The study focused on a
group of highly
accomplished professionals
in New York City to identify
lessons for success in a
project-oriented
environment with highly
complex skill demands and
rapidly changing
technology. The study
found that the professionals
surveyed earned an average
of \$99,000 from new media
work in 1999, far more than
the national average for

people employed in this area. Yet they faced significant challenges in acquiring new skills, managing their careers, and establishing employment and income security. They spent an average of 13.5 hours per week in unpaid time learning new skills and more than 6 hours per week in looking for employment. The researchers concluded that challenges for the industry include establishing criteria for evaluating job skills and creating ways for professionals to acquire more training and find jobs or projects in less time.

Research methodology is appended. (Contains 14 references, 13 figures, and 7 tables.) (KC)
F & S Index United States Annual Apress Special Edition Using the Internet and Web covers multiple individual end-user activities-it's like having a dozen activity-specific books under a single cover! The book is organized by activity-how people spend their time online. Each chapter describes a

specific activity, and shows users the best ways to engage in that activity online-complete with real-world tips and advice for getting the most of that time online. Topics range from getting connected-and getting connected faster-to online shopping and downloading MP3 files. In short, whatever users want to do online, they'll find in this book-without having to wade through hundreds of pages of software-

specific instruction.
Software Testing Career Package Pearson
