From Pulitzer Prize winner Ed Yong,  
a groundbreaking, wondrously  
informative, and vastly  
entertaining examination of the  
most significant revolution in  
biology since Darwin—a  
“microbe’s-eye view” of the

world that reveals a marvelous,  
radically reconceived picture of  
life on earth. Every animal,  
whether human, squid, or wasp,  
is home to millions of bacteria  
and other microbes. Pulitzer  
Prize-winning author Ed Yong,  
whose humor is as evident as his  
erudition, prompts us to look at  
ourselves and our animal  
companions in a new light—less  
as individuals and more as the  
interconnected, interdependent  
multitudes we assuredly are. The  
microbes in our bodies are part  
of our immune systems and  
protect us from disease. In the  
deep oceans, mysterious  
creatures without mouths or guts

---

depend on microbes for all their energy. Bacteria provide squid with invisibility cloaks, help beetles to bring down forests, and allow worms to cause diseases that afflict millions of people. Many people think of microbes as germs to be eradicated, but those that live with us—the microbiome—build our bodies, protect our health, shape our identities, and grant us incredible abilities. In this astonishing book, Ed Yong takes us on a grand tour through our microbial partners, and introduces us to the scientists on the front lines of discovery. It will change both our view of nature and our sense of where we belong in it.
