"The Slaves" is nothing but Frederick Douglass's groundbreaking autobiography and his first book "Narrative of the Life of Frederick Douglass, An American Slave, written by Himself". We have renamed the title here as "The Slaves" to keep the title short as well as to establish that Frederick Douglass is no longer a name of a particular slave born in nineteenth-century America, but a name that represents slaves of the entire world and of all time. Even though, we do not wish anyone to be born into slavery anymore like Frederick was, we have taken him as a symbol of all the slaves as a wish that all who are still in slavery may have the spirit of Frederick Douglass and

fight their ways to the freedom and work to free other slaves to make the slavery history. The life of Frederick, is in one way or another, is the lives of all other slaves. Hence, we have named this version of his book "The Slaves".

Prepublication Reviews: “ In Leading

Technology-Rich Schools, the authors present a fascinating and exciting set of case studies that provide great insight into the ways leaders can support high-level innovation in schools. Importantly, their focus is on technology that enhances learning and teaching, rather than technology as an expensive school ornament. A must-read for those who study and practice educational leadership. ”

—Jeffrey S. Brooks, Associate Professor and Educational Leadership Program Coordinator, School of Education, Iowa State University, author of *Black School, White School: Racism and Educational (Mis)leadership* “ This book is a precious gift for the vast majority of administrators who desperately need concrete examples of

how to create, facilitate, and sustain technology-infused learning environments. ” —Scott McLeod, Associate Professor and Founding Director, CASTLE, University of Kentucky “ These rich illustrations of technology leadership in secondary schools show how a number of complex variables must come together to produce the key outcome of positioning educational technology as a support to teaching and learning. Examples of leadership practices that coordinate team members for interdependent work and invite teachers' involvement should prove to be a valuable resource to practitioners and also provide insight to policymakers for how they can create supportive conditions for such work. ” —Sara Dexter, Associate Professor,

Department of Leadership, Foundations, and Policy, Curry School of Education, University of Virginia “ Leading Technology-Rich Schools is a key advance in understanding how technology can best be integrated in today ’ s schools. These case studies of effective practice are sure to become required reading for those in leadership positions who are using technology for school improvement. ” —Glen L. Bull, Samuel Braley Gray Professor of Education, Curry School of Education, University of Virginia “ The rubber meets the road in this well-researched book with detailed stories of exemplary schools and school leaders that have leveraged technology as a key tool to make significant reforms stick. Through

these vivid case studies, Levin and Schrum illuminate a dynamic and complex set of lessons learned to help all school leaders undertake transformations of their schools. ” —L. Michael Golden, CEO, Educurious
