Lexington Books

This monograph provides a coherent and systematic explanation of China ' s regional economic development from the perspective of regional government competition. It gives an almost unknown exposition of the mechanisms of China's regional economic development, with numerous supporting cases drawn from both China and elsewhere. This book is an invaluable resource for anyone interested to learn more particularly the development and transformation of China ' s regional economy from both the Chinese and global perspectives.

Springer Nature

Breaking Through Your Own Glass Ceiling offers simple, proven prosperity practices to address power dynamics faced by BIPOC (Black, Indigenous, and People of Color) and other underrepresented communities. You can begin today to identify and uproot unhealthy patterns and replace them with consistent thoughts and behaviors to embrace a full-hearted life—even in environments that do not support your well-being. Many people attempt to navigate glass ceilings by reading self-help and motivational books that send the message that vision boards, meditation apps, and affirmations will compensate for exclusionary policies and laws. This book rejects the “ one size fits all ” approach to career development and self-care that leads people to internalize their own glass ceiling. If you are ready to have a full-hearted breakthrough, this book can be your

daily guide and inspiration.

Reimagining Civic Education
Routledge

We are in the midst of what may well be the most confusing, turbulent period in the history of modern medicine. This book seeks to cut through the fog and confusion that enshrouds the health care industry to provide clarity on where the industry stands today and where it is headed. The book defines the major challenges in health care through the journey of Northwell Health, one of the largest provider organizations in the country. The central issues in what is nearly one-fifth of the United States economy are played out daily within this not-for-profit organization. Northwell is New York state's largest workers, and \$11 billion in annual revenue. The book candidly portrays key leaders within Northwell on the most vexing challenges in health care: How to provide primary and specialty care spending; how to create and sustain an internal system of continuous learning to enable employees at all levels to stay current in an industry that is changing at warp speed; how to provide emergency services in a world where natural disasters and acts of terrorism are

inevitable; how to identify new revenue streams to offset reductions from Medicare and Medicaid; and how to push outside the walls of hospitals and clinics to improve the overall health of individuals and communities by working on determinants of health beyond the typical medical practice. The book exists at the intersection of medicine, business, social and public policy. Harvard's Michael Porter has written widely on health care arguing that it is time "for a fundamentally new strategy," but what, exactly? Where is the industry headed? What do the changes and the turbulence mean for patients, doctors, nurses? This book is the product of a learning journey both humbling and rewarding. Over time, lessons learned, improvements made, innovations conceived, have advanced Northwell Health in ways that, some years ago, might not have seemed possible. Northwell has become a national leader not because it is perfect, but because it remains steadfast in its journey to remain humble enough to know that whatever success may be achieved, the journey is about continuous learning and improvement. The goal of the book is to provide a deeper, clearer understanding of what is

happening in health care and why; to help illuminate a pathway forward for patients and caregivers most of all, but also for policy-makers and the employers and others who pay for care.

The Forces of Change Simon and Schuster

This volume surveys the new global landscape for democratic civic education. Rooted in qualitative research, the contributors explore the many ways that notions of democracy and citizenship have been implemented in recent education policy, curriculum, and classroom practice around the world. From Indonesia to the Spokane Reservation and El Salvador to Estonia, these chapters reveal a striking diversity of approaches to political socialization in varying cultural and institutional contexts. By bringing to bear the methodological, conceptual and theoretical perspectives of qualitative research, this book adds important new voices to one of education's most critical debates: how to form democratic citizens in a changing world.

Continuing to Disrupt the Status Quo? Young and New Women Professors of Educational Leadership was conceptualized as a follow-up to *Breaking Into the All-Male Club: Female Professors of Educational Administration* (Mertz, 2009), a book about and by many women who were the first women faculty admitted into departments of

educational administration primarily in the 1970's and 1980's. This book offers narratives of those women new to the field of educational leadership and makes comparisons to those stories shared by the veteran women in the field to highlight both similarities and differences. *Continuing to Disrupt the Status Quo? Young and New Women Professors of Educational Leadership* is a literary way to preserve and continue the tradition of the sharing/addition of voices to the field of educational leadership that was begun with *Breaking Into the All-Male Club*. It begs the question, "If the women from *Breaking Into the All-Male Club* are "firsts," "pioneers," and "groundbreakers," then who are we, the young and new women of the field? If the entrance of women into the field of educational leadership was threatening enough for the veteran women (and still is for many of the young and new women), then the addition of age and ethnicity as confounding factors has likely created a cacophony of dissonance forty years later! *Continuing to Disrupt the Status Quo?* represents a decade of stories (2002-2012) from young and new women to the field of educational leadership.

Harvard Business Press

As consumers wrestle with tightening credit, inflation, economic slowdown and uncertainties, unemployment, debt, the housing crises, global unrest, mortgage foreclosures, and prognostications of doom and gloom, doing something different is more important than ever. Repositioning, reengineering, renewing, rejuvenating and reenergizing are all rising in priority as they relate to improving businesses, careers, hopes, dreams, personal development and life in general. As a result, Life improvement, battling status quo, ambition, the pursuit of happiness, dealing with change, or exploring the possibilities, are all or in part, on the mind of many today. All of these are related to change, improvement, doing things again or different or re-_____ (insert your Re: word of choice here). This book is the response to the point in time, life and history that our generation is in. It boils down to Re-newing, Re-viving, Re-inventing, Re-engineering, Re-positioning, Rejuvenating

your business and life.

Proven strategies and methods from leading business consultants and NextGeneration Benefits Advisers to control and reduce healthcare costs and improve employee benefits

From Status Quo to Creativity Cambridge University Press

This book is not a critique of digital ethics but rather a hack. It follows the method of hacking by developing an exploit kit on the basis of state-of-the-art social theory, which it uses to breach the insecure legacy system upon which the discourse of digital ethics is running. This legacy system is made up of four interdependent components: the philosophical mythology of humanism, social science critique, media scandalization, and the activities of many civil society organisations lobbying for various forms of regulation. The hack exposes the bugs, the sloppy programming, and the false promises of current digital ethics, and, because it is an ethical hack, redesigns digital ethics so that it can address the problems of the global network society. The main idea of the book is that the social world of meaning is based on information, which, because of its relational nature, must be understood more as a common good than as private property. A digital ethics that relies upon humanistic individualism cannot address the issues arising from the global network society based upon information. This demands a complete revision of the philosophical foundations of current digital ethics by means of a redesign of ethics as a

theory of governance by design.

Anti-Oppressive Social Work Practice is the first text to fully integrate concepts of anti-oppressive practice with generalist practice course content. This comprehensive approach introduces concepts of social justice and offers detailed insight into how those principles intersect with the practice of social work at the micro, mezzo, and macro levels. The book covers ethics, values, and social work theory, and discusses the fundamentals of working with individuals, families, groups, organizations, and communities. The book also highlights policy and social movement activism and practice within a global context. Maintaining an integrative approach throughout, authors Karen Morgaine and Moshoula Capous-Desyllas effectively bridge the gap between anti-oppressive principles and practice, and offer a practical, comprehensive solution to schools approaching reaccreditation under the mandated CSWE Standards. ? "Provides an important step in the ongoing evolution of generalist practice in social work. It continues a rich tradition [that] challenges the profession to become more and more explicit about the revolutionary aspect of practice." —Christian Itin, Metropolitan State University of Denver "Offers a fresh perspective of social work practice interventions." —Terrence Allen, North Carolina Central University

This book addresses the importance of human factors in optimizing the learning and training process. It reports on the latest research and best practices relating to the application of behavioral and cognitive science, and new

technologies in the design of instructional and training content. It proposes innovative strategies for improving the learning and training experience and outcomes in different contexts, including lower and higher education, and different industry sectors. A special emphasis is given to digital and distance learning, gamification, and virtual training. Gathering contributions to the AHFE 2021 Conference on Human Factors in Training, Education, and Learning Sciences, held virtually on July 25-29, 2021, from USA, this book offers extensive information and a thought-provoking guide for both researchers and practitioners in the field of education and training.

Reimagining the Landscape of Innovation

Wanderlust Port Press

Breaking Down Joker offers a compelling, multi-disciplinary examination of a landmark film and media event that was simultaneously both celebrated and derided, and which arrived at a time of unprecedented social malaise. The collection breaks down Joker to explore its aesthetic and ideological representations within the social and cultural context in which it was released. An international team of authors explore Joker's sightlines and subtexts, the affective relationships, corrosive ideologies and damning if ambivalent messages of this film. The chapters address such themes as white masculinity, identity and perversion, social class and mobility, urban loneliness, movement and music, and questions of reception and activism. With contributions from scholars from screen studies, theatre and performance studies, psychology and psychoanalysis, geography, cultural studies and sociology, this fully interdisciplinary collection offers a uniquely multiple operational cross-examination of this pivotal film text, and will be of great importance to scholars, students and researchers in these areas.

How Innovative Companies Are Changing the Benefits Game to Help Their Clients and Boost Their Bottom Line "O'Reilly Media, Inc."

One chance encounter. Two opposites. And a connection that could change everything. Heath Palmer—presumed CEO and heir to a billion-dollar

business—might have shoulders broad enough to bear the responsibility of keeping his family out of the press, but that doesn't mean he can't dream of a night off. After a potential PR disaster forces him to attend his family's New Year's Eve masquerade gala, he decides to don the disguise of a valet, leading to a chance meeting at midnight with a woman he could never forget. Maia Weaver has worked the Palmer gala as a server since she was old enough to carry a silver platter, but this New Year's Eve is different. This year, she's going to find a story worth writing. Something to kick-start her career as a journalist. When she figures out the masked valet with the soulful, dark eyes is actually Heath Palmer, she gets the opportunity she was looking for—even if she would trade it all for a New Year's kiss. When the moment is interrupted, Heath fears he's lost the feisty beauty who made him feel alive, but he knows he can't afford another distraction. Not when the stakes for taking control of the company are this high. So when Maia turns up as a stewardess on his family's yacht, he has two choices: admit to wearing a disguise to his own family's party or lie and pretend they've never met. Maia's keeping secrets too, and when Heath surprises her by asking for her help as a translator on a trip across Europe, she accepts—but with an agenda of her own. As the secrets between them continue to mount, can these two opposites really expect to work together as a team? Especially when the secret they're both keeping is the one that could ruin everything—that this just might be love. Status Quo is the first book in a series of stand-alone contemporary romances. If you like glittery locales and destinations, grumpy billionaires afraid to admit their feelings, and plenty of slow-burn sexual tension and banter, then you'll love this first installment in Nina Hatch's new travel-themed series. Pre-order Status Quo to sail away with this opposites attract romance soon!

Kill the Company Morgan James Publishing

The way we solve problems is broken—we're trapped by techniques and assumptions of a prior era.? Challenges are emerging at an ever-accelerating rate—and we struggle to find the imaginative answers we crave. And, even when we do, biology and culture conspire to obstruct our progress.? Thinking Wrong: How to Conquer the Status Quo and Do Work That Matters teaches you how to use

our radical problem solving system to reliably produce surprising, ingenious, and seemingly magical answers to your most wicked questions. The book provides you with the new language, frameworks, and tools you'll need to conquer the status quo and drive change. Inside? Think Wrong, designers and innovators John Bielenberg, Mike Burn, and Greg Galle show how pioneering teams have cultivated ways to challenge both their brains and the culture at large. These game-changers learned to think wrong, and so can the rest of us. An introduction offers the fundamental groundwork of? Think Wrong. The subsequent chapters present six practices developed by the authors? Be Bold, Get Out, Let Go, Make Stuff, Bet Small, and Move Fast. Using first hand case studies of success, and offering Think Wrong Drills that readers may use,? Think Wrong? is a field guide for applying this highly effective problem-solving system to challenges big and small. In addition to the drills provided in the book, Think Wrong readers are provided access to free online resources.

How The Behavioral Innovation™ Approach Drives Your Company Forward

Rowman & Littlefield Offers advice on how to lead an organization into change, including establishing a sense of urgency, developing a vision and strategy, and generating short-term wins.

The Libertarian Party and Other Minor Political Parties in the United States McFarland

Victorian science changed language from a tool into a natural phenomenon, evolving independently of its speakers. Will Abberley explores how science and fiction interacted in imagining different stories of language evolution. Popular narratives of language progress clashed with others of decay and degeneration. Furthermore, the blurring of language evolution with biological evolution encouraged Victorians to re-imagine language as a mixture of social convention and primordial instinct.

Abberley argues that fiction by authors such as Charles Kingsley, Thomas Hardy and H. G. Wells not only reflected these intellectual currents, but also helped to shape them. Genres from utopia to historical romance supplied narrative models for generating thought experiments in the possible pasts and futures of language. Equally, fiction that explored the instinctive roots of language intervened in debates about language standardisation and scientific objectivity. These textual readings offer new perspectives on twenty-first-century discussions about language evolution and the language of science.

Putting Theory Into Action CRC Press

In Goodbye, Status Quo, visionary scientist and leading entrepreneur Dr. Joan Fallon equips readers with the tools to overcome obstacles and become agents of change—as entrepreneurs, leaders, and individuals. In Goodbye, Status Quo, Dr. Joan Fallon equips her readers with the tools to be agents of change: as entrepreneurs, leaders, and individuals. No matter where you come from or who you are, you can be an agent of change. If you are setting out to change the world—great, she affirms—just keep in mind that change must start with you. As a company founder, Dr. Fallon faced many obstacles. Some of the greatest ones came from how other people saw her. A woman in her fifties with a warm, approachable manner, she didn't fit the typical entrepreneur profile. Now as a respected business leader, doctor, and academic who sits on the boards of numerous non-profits and is frequently asked to mentor others, Joan is driven to share what she has learned and the perspectives that brought her success. She is also fascinated by the subject of change. What are the impediments that keep leaders and individuals from changing the world, or even just changing themselves, and how can they be overcome? What is it about you that holds you,

your job, or your company back from changing? Joan Fallon believes that deductive reasoning in addition to the typical inductive reasoning and other science-based approaches allow us to move past the reactive responses that leave us stuck, unable to innovate and make change. Fear-based thinking rules in many sectors today—in business, politics, even relationships. And fear is the fundamental factor that holds us back from embracing change. Goodbye, Status Quo blends lessons from Joan's own entrepreneurial experiences and scientific observations to give readers informative and actionable advice on the topics of entrepreneurship, innovation, and making change. Each chapter offers pithy advice that taps into business, medicine, philosophy, and even baseball. No matter your background, experience, or personal struggles, you can change the world—if you are willing to first change yourself.

Outsmart Your Instincts Routledge

Challenging the Status Quo offers the latest cutting-edge scholarship in the subfield of sociology of diversity and inclusion.
