The Century Dictionary and Cyclopedia: The Century dictionary ... prepared under the superintendence of W.D. Whitney Using psychological theory and the author's direct experience working with at-risk youth, this book answers the questions on the minds of anyone shocked and appalled by the events of the Boston Marathon bombings. The shock of the 2013 Boston Marathon bombings was soon followed by a revelation initially disturbing and mystifying: two apparently unremarkable

brothers—one a teenager, the other a young adult; both well-liked immigrants and longtime U.S. residents—had allegedly triggered the bombs. Why were these two seemingly "normal" individuals driven to commit such acts of coldblooded violence? This book examines not only the lives, motivations, and key influences of these infamous brothers, but those of other young, unexpected terrorists worldwide, comparing factors that contributed to their decisions to become terrorists and identifying methods used to recruit them into that deadly fold. The chapters teach readers warning signs that youths are being drawn in to terrorism and serve to spur meaningful conversations among citizens, politicians, and policymakers about what we can do to prevent such recruitment of youths and young adults, including other U.S. residents who might consider emulating the

Tsarnaev brothers. The book also addresses larger, related questions, such as whether humans are naturally violent, who benefits when young individuals engage in terrorism, and why minors are recruited to become killers. The Secrets to Breaking Soul Ties
