The core idea for the story was born many
years ago when I was reading a book by famed
science fiction writer Arthur C. Clarke. At the
end of one of his books, he posited an
interesting thought which was: how could
human beings ever hope to communicate
with an extraterrestrial race if we haven't
even yet managed to communicate with the
second-most intelligent species on the planet,
or dolphins.

Breakthrough by Michael C. Grumley is a
futuristic novel that, though positing science that
does not yet exist, reads as though it could have
been ripped from today ' s headlines. The
futuristic technology, and alien contact, though
thrilling, pale beside the story of bureaucratic
bumbling and political maneuvering that is so
similar to things that happen in our present day.
