*Book review: Michael Grumley's  
'Breakthrough' - JD Lasica*

Breakthrough by Michael C.  
Grumley is a futuristic novel  
that, though positing science  
that does not yet exist, reads  
as though it could have been  
ripped from today's headlines.  
The futuristic technology, and  
alien contact, though  
thrilling, pale beside the  
story of bureaucratic bumbling  
and political maneuvering that  
is so similar to things that  
happen in our present day.

The core idea for the story was  
born many years ago when I was  
reading a book by famed science  
fiction writer Arthur C. Clarke.  
At the end of one of his books, he  
posited an interesting thought  
which was: how could human beings  
ever hope to communicate with an  
extraterrestrial race if we  
haven't even yet managed to

communicate with the second-most  
intelligent species on the planet,  
or dolphins.

With that said, the author,  
Michael C Grumley has a natural  
talent for sucking the readers  
into his stories. The characters  
are believable as well as the  
plots. The outcomes and events are  
realistic as well. Catalyst. The  
Catalyst is the third book in the

Michael C. Grumley's BREAKTHROUGH combines, fascinating fictional science, an alien visitation, an out-of-control governmental bureaucrat and a seemingly unavoidable end of the world scenario to give us a start to finish science fiction tale that is a mind-boggling and magnetic read for those of us who enjoy the "what-if" scenarios.
