Terrence Malick's stunning film The Tree of Life is a modern Job story, an exploration of suffering and glory, an honest look at strife within a Texas family in the 1950s. In Shining Glory, Peter J. Leithart examines the biblical and theological motifs of the film and illuminates how Malick exploited the visual poetry of film to produce one of the most spiritually challenging and theologically sophisticated films ever made.

Bridge the Love Gap Springer Nature

The Tiber Bridge tells the story of Ancus Marcius, Romes fourth

king, a man of power and ability haunted by the ghosts of his past, and of Vel Prasanai, a cast-out Etruscan who becomes his bridge builder. Conflict between gods and mortals intensifies over the sacrilege of spanning the Tiber in this spellbinding tale of war, political rivalry, love, and ambition set in the fabled years of early Rome. The many accomplishments of legendary King Ancus remain tarnished and unrewarding, as he faces endless war, endures the enmity of his predecessors son, is thwarted by Romes pontifex, and suffers the cruel suspicions of his wife. Engineers, priests, vestal virgins, generals, queens, and a family of shepherds all play a part in this sweeping tale of courage and endurance in the shadow of the first bridge built in Rome.

Self-Leadership and Personal Resilience in Health and Social Care Lexington Books

What is presidential leadership and why have some presidents been considered "great" - or rather "transformational" - while others are not? What are the drivers which distinguish these presidents from the rest? Presidential Leadership in the Americas since Independence answers these questions through a systematic study of leadership across the Americas over 200 years, from independence to the present day. Having surveyed who the most cited presidents are in the Americas, Guy Burton and Ted Goertzel examine the experience of presidents from across the western hemisphere: the US, Argentina, Brazil, Chile, Colombia, Mexico, Peru and Venezuela. They study the relationship between these men and women's actions within the constraints they faced during four political periods: independence, national consolidation during the nineteenth century, state-building from the late nineteenth to mid twentieth

centuries and neoliberalism since the 1970s-80s. The most "transformational" presidents are found to be those who are not only able to innovate and build new political consensus at a time of crisis, but also consolidate them so that the reforms becoming lasting - and extending beyond an individual president's own political (even biological) lifetime.

It is easy to help your child by finding solutions. However, empowering them to develop the ability to discover solutions to their own problems is what will make them independent and confident individuals. This month's edition is called "Every Problem Has a Solution—Discover It." Dear parents, I often appeal to parents who love helping their children unconditionally that it is easy to help their children by finding solutions to the problems they face. However, empowering them to develop the ability to discover solutions to their own problems is what will make them independent and confident individuals. -Animesh, Editor in Chief

This collection presents twenty-seven new essays in Japanese aesthetics by leading experts in the field. Beginning with an extended foreword by the renowned scholar and artist Stephen Addiss and a comprehensive introduction that surveys the history of Japanese aesthetics and the ways in which it is similar to and different from Western aesthetics, this groundbreaking work brings together a large variety of disciplinary perspectives—including philosophy, literature, and cultural politics—to shed light on the artistic and aesthetic traditions of Japan and the central themes in Japanese art and aesthetics. Contributors explore topics from the philosophical groundings for Japanese aesthetics and the Japanese aesthetics of imperfection and insufficiency to the Japanese love of

and respect for nature and the paradoxical ability of Japanese art and culture to absorb enormous amounts of foreign influence and yet maintain its own unique identity. *New Essays in Japanese Aesthetics* will appeal not only to a wide range of humanities scholars but also to graduate and undergraduate students of Japanese aesthetics, art, philosophy, literature, culture, and civilization. Masterfully articulating the contributors' Japanese-aesthetical concerns and their application to Japanese arts (including literature, theater, film, drawing, painting, calligraphy, ceramics, crafts, music, fashion, comics, cooking, packaging, gardening, landscape architecture, flower arrangement, the martial arts, and the tea ceremony), these engaging and penetrating essays will also appeal to nonacademic professionals and general audiences. This seminal work will be essential reading for anyone interested in gaining a deeper understanding of Japanese aesthetics.

This book examines how the persistent and deepening casualization and precarity of acting work, coupled with market pressures, has affected the ways in which actors are trained in the US and UK. It reviews the existing state of training, looking at various theories of what the actor does, debates about casting, and the impact of reality television and social media. In the increasing effort to find ways to overcome the precarious labour market for actors and other performers, the traditional emphasis on theatrical character has been replaced by the celebration of the persona – a public image of the performer as a personal brand. As a result, a physiocratic elite, that literally incorporates the collective labour of cultural workers into the star or celebrity body, has formed. This book explores how the star or celebrity's appearance and comportment are positioned as the rule of nature, formed and abiding outside capitalism as a mode of production. This book will be of interest to those studying theatre studies and performance, contemporary stardom and celebrity and the impact of technology on the formation of identity.

Perfect Sight Without Glasses Lexington Books

If only life were as simple as choosing between shaken or stirred. Sage Jeffries grew up an overachiever. She studied, excelled, and became a mechanical engineer for a firm in San Francisco. Yet much to her family's surprise, at age thirty, she made a bold move to Los Angeles and became a bartender at The Yard. Now, she spends her time mixing drinks and trying new things. Her life is good, fun . . . except for two teeny tiny challenges—she's in love with her best friend's older brother, and her sister bought her a book, *Nice to Naughty in Ten Easy Steps*, and dares her to master every step. Sage never backs down from a challenge. Garrett Rye is Ryeland Farms. He grew up under his father's wing and has now taken over operations. Working the fields was nothing compared to the hassle of managing, but keeping the farm running without hiccups is what's expected. His brother and sister may run The Yard, but Ryeland Farms is the rock of their family. No matter how many changes swirl around him, Garrett intends to keep it that way. It's New Year's Eve and Sage, who's had too much tequila, is realizing it's easier to read about "naughty" than actually put it into practice. Instead of a wild night, she ends up tucked into Garrett's truck, spilling her heart. Now, Garrett is finding it impossible to concentrate on keeping things business as usual when the woman he's only noticed behind the bar suddenly wants to raise the bar. Both stirred and shaken, Sage and Garrett will have to decide whether to keep mixing things up or if they should put their feelings on ice. Almost all of the essays collected in this volume were written for and first published as monthly instalments in *Next Future*, the e-journal of the Sri Aurobindo Society Pondicherry. The 47 instalments ended with the passing of Dr. Nadkarni in September 2007, and cover *Savitri* Book by Book, *Canto* by *Canto*, from the beginning up to the climactic point in the middle of *Book Eleven*, where *Savitri* is offered

four boons of merger with the Supreme, and asks instead for the Supreme Peace, Oneness, Energy and Bliss 'for Earth and Men'. Dr. Nadkarni has written other essays on *Savitri* as well as giving many other talks, but this collection represents a masterly 'Introduction' (as he modestly called it) to the revelatory poem which he loved so much and understood so well. It has been compiled and published at the request of his family, and we feel sure that it will be welcomed by *Savitri* readers and students all over the world, and to a certain extent make up for the great loss that his many admirers experienced when he passed away in September 2007 at the age of 74.

An Instant #1 New York Times Bestseller From the New York Times bestselling author and MSNBC and podcast host, a powerful wide-angle reckoning with how the assault from attention capitalism on our minds and our hearts has reordered our politics and the very fabric of our society "An ambitious analysis of how the trivial amusements offered by online life have degraded not only our selves but also our politics." —New York Times "Brilliant book... Reading it has made me change the way I work and think."—Rachel Maddow We all feel it—the distraction, the loss of focus, the addictive focus on the wrong things for too long. We bump into the zombies on their phones in the street, and sometimes they're us. We stare in pity at the four people at the table in the restaurant, all on their phones, and then we feel the buzz in our pocket. Something has changed utterly: for most of human history, the boundary between public and private has been clear, at least in theory. Now, as Chris Hayes writes, "With the help of a few tech firms, we basically tore it down in about a decade." Hayes argues that we are in the midst of an epoch-defining transition whose only parallel is what happened to labor in the nineteenth century: attention has become a commodified resource extracted from us, and from which we are increasingly alienated. *The Sirens' Call* is the big-picture vision we urgently need to offer clarity and guidance. Because there is a breaking point. *Sirens* are designed to compel us, and now they are going off in our bedrooms and kitchens at all hours of the day

and night, doing the bidding of vast empires, the most valuable companies in history, built on harvesting human attention. As Hayes writes, "Now our deepest neurological structures, human evolutionary inheritances, and social impulses are in a habitat designed to prey upon, to cultivate, distort, or destroy that which most fundamentally makes us human." *The Sirens' Call* is the book that snaps everything into a single holistic framework so that we can wrest back control of our lives, our politics, and our future.

The Cure of Imperfect Sight by Treatment Without Glasses "O'Reilly Media, Inc."

In *Tracing the Visual Language of Raphael's Circle to 1527*, Alexis Culotta examines how the Renaissance master's style – one infused with borrowed visual quotations from other artists both past and present – proved influential in his relationship with associate Baldassare Peruzzi and in the development of the artists within his thriving workshop. Shedding new light on the important, yet often-overshadowed, figures within this network, this book calls upon key case studies to convincingly illustrate how this visual language and its recombination evolved during Raphael's Roman career and subsequently served as a springboard for artistic innovation for these close associates as they collaborated in the years following Raphael's death.

If only life were as simple as making a reservation. Makenna Rye Conroy was living the dream—with an amazing husband and a beautiful new baby daughter—when one night changed everything. Almost six years after Adam's death, Makenna and her daughter Paige have built a solid, happy life together. Makenna manages her brother's trendy restaurant, The Yard, and helps out at Ryeland Farms, the family business, all while navigating the world of private school parenting. Sure, being a single mom has its challenges, but she hardly has time to pack her daughter's lunch in the morning, let alone think about dating. Travis McNulty, the middle child and biggest disappointment of the McNulty clan, is a chef at his best friend's new restaurant. He gave up apologizing for not being the football hero his family wanted a long time ago. In fact, Travis apologizes for very little these days. He loves creating great food—it's more of a passion than a job—and he lives life on his own terms with few complications. For the past couple years, Makenna and Travis have worked side by side at The Yard, bickering, teasing, and never taking each other very seriously. That is until

Makenna has her usual reoccurring dream; but this time, instead of her late husband as the featured man, Travis stands in his place. Travis may be attracted to his best friend's sister, but she's a widow and a mother, which tops the charts for complicated in his book. As the game changes, Makenna and Travis, with a little help from Paige, have to figure out what they are willing to risk to reserve a table for three. Stay Healthy, Be Happy, Live Longer, in Whatever Way Suits You Best. Prerna Publication

'Stay Healthy, Be Happy, Live Longer' addresses the reality that tens of millions of ordinary people are allowing heart disease, and other related conditions such as obesity, diabetes and blood pressure, to creep up on them and impact their lives detrimentally. Not because they don't know how to keep them at bay -we all know that already-, but because they cannot sustain the rigorous day-to-day lifestyle changes recommended by the medical profession and indeed, with the best of intentions, by most of the other books on the subject. It faces squarely the reality that old habits can be deep-rooted and new lifestyle changes difficult to make permanent. Uniquely it gently motivates the reader to make whatever degree of change they are able to habitualize. It provides the readers with a clear understanding of the benefits to be gained from making the changes, and a practical methodology of change that can ebb and flow in harmony with the readers' own natural tendencies and preferences.

Presidential Leadership in the Americas since Independence BRILL THE NEW NOVEL IN THE POPULAR VIDESSOS SERIES Rhavas was a good, holy, and pious man^{3/4}and the cousin of the Avtokrator. He would probably have become ecumenical patriarch of the Empire in the capital, Videssos the city . . . if his world had not suddenly and tragically fallen apart when the Empire of Videssos erupted into civil war and the Khamorth barbarians swarmed over the borders. As the home he loved was brutally sacked, Rhavas had to flee for his life, and then make his way through lands swarming with fierce nomads and with soldiers loyal both to his cousin and to the rebel. He may never see Videssos the city again, let alone preside in its High Temple. He has always followed Phos, the god of light and goodness, Videssos' god, and despised evil rival Skotos. Those who fall off the Bridge of the Separator during judgment in the afterlife tumble down to Skotos' ice forevermore. But when evil seems to have swallowed the whole world, what is a cleric who reverences logic as well as goodness supposed to believe It's a harder question than Rhavas wishes it were. FANTASY

We are active with our mobile devices; we play games, watch films, listen to music, check social media, and tap screens and keyboards while we are on the move. In Mood and Mobility, Richard Coyne argues that not only do we communicate, process information, and entertain ourselves through devices and social media; we also receive, modify, intensify, and transmit moods. Designers, practitioners, educators, researchers, and users should pay more attention to the moods created around our smartphones, tablets, and laptops. Drawing on research from a range of disciplines, including experimental psychology, phenomenology, cultural theory, and architecture, Coyne shows that users of social media are not simply passive receivers of moods; they are complicit in making moods. Devoting each chapter to a particular mood—from curiosity and pleasure to anxiety and melancholy—Coyne shows that devices and technologies do affect people's moods, although not always directly. He shows that mood effects are transitional; different moods suit different occasions, and derive character from emotional shifts. Furthermore, moods are active; we enlist all the resources of human sociability to create moods. And finally, the discourse about mood is deeply reflexive; in a kind of meta-moodiness, we talk about our moods and have feelings about them. Mood, in Coyne's distinctive telling, provides a new way to look at the ever-changing world of ubiquitous digital technologies.
