The Love Gap John Wiley & Sons
While the achievement gap has dominated policy discussions over the past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, Closing the Opportunity Gap will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive.

downturns. But many businesses fail because of poor management and inadequate leadership. Can leaders revitalize struggling businesses and organizations before they collapse? If so, they can play a vital role in preserving and creating jobs, thereby sustaining families and entire communities. In Bridge the Gap, author and CEO Michael Rodenberg reveals how leaders can restore broken companies by addressing foundational issues that many executives overlook. "From its very beginning, in June 1842, the Protestant Mission in Gabon included men and women of African descent--African Americans, Americo-Liberians, and West Africans--all teachers and advanced students from the Cape Palmas (Liberia) Mission, who transferred with the mission to its new location on the Gaboon estuary. All came voluntarily and wholeheartedly. They served as teachers, evangelists, preachers, and printers, building the early foundation of

Christianity in Gabon. Many eventually returned to their homelands, but others stayed for the duration of their lives, assimilating into the local community. This book celebrates the contribution of persons of African descent who served with the mission from 1834 until 1891, a time of complex and controversial race relations in America, which seeped into mission relations overseas. Private missionary correspondence and journals reveal the interrelationships, roles, and contributions of these individuals, and also the underlying perceptions of nationality, race, and gender. One must grieve the injustices evident in the stories, yet marvel at the giftedness, faith, determination and commitment of those who served, often with no official recognition. I introduce you to Mr. B. V. R. James, Lavinia Sneed, Charity Sneed Menkel, Mary Harding, and others--may their stories inspire you! "--Publisher.

Bridging the Communication Gap is a book about improving communication between customers, business analysts, developers and testers on software projects, especially by using specification by example and agile acceptance testing. These two key emerging software development practices can significantly improve the chances of success of a software project. They ensure that all project participants speak the same language, and build a shared and consistent understanding of the domain. This leads to better specifications, flushes out incorrect assumptions and ensures that functional gaps are discovered before the development starts. With these practices in place you can build software that is genuinely fit for purpose.

There is a widening divide between the data, tools, and knowledge that international relations scholars produce and what policy practitioners find relevant for their work. In this first-of-its-kind conversation, leading academics and practitioners reflect on the nature and size of the theory-practice divide. They find the gap varies by issue area and over time. The essays in this volume use data gathered by the Teaching, Research, and International Policy (TRIP) Project over a fifteen-year period. As a whole, the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so. Individual chapters explore these questions in the areas of trade, finance, human rights, development, environment, nuclear weapons and strategy, interstate war, and intrastate conflict. Each substantive chapter is followed by a response from a policy practitioner, providing their perspective on the gap and the possibility for academic work to have an impact. **Bridging the Theory-Practice Divide** in International Relations provides concrete answers and guidance about how and when scholarship can be policy relevant.

Parents: Does your teen withdraw to his or her

room at every opportunity? Does she talk with you about her friends? Does he participate in discussions at meals? Does your teen want you to see projects from school? When is the last time you actually went into your teen's room and looked at what's hanging on the walls and sitting on the shelves? Teens: Do your parents hide behind the newspaper? Do they always have to work when you've got a game, a recital, or an open house at school? Is there anything you do together anymore? When was the last time they took a walk, a bike ride, or even a trip to get ice cream with you? When did that sudden gap divide your home into territories staked and claimed, with music blasting through the halls and fists banging on doors to turn down the stereo/TV/video game? Teens, when did you start seeing your parents as your enemies instead of your heroes? And parents, when did you start seeing your teens as crazy little demons instead of your loving children? Finally, there is a solution for both sides, and one that will not only bridge that gap but show parents and teens alike how to prevent it. Jay McGraw is the ideal person to write a book for both parents and teens. A bestselling author by the age of twenty-one and son of number one New York Times bestseller Phillip C. McGraw, Ph.D., known to millions worldwide as Dr. Phil, Jay has seen the parent-teen battle from all angles. In this groundbreaking work, he introduces a new plan for both teens and their parents to work through the issues that divide them and, in the process, rediscover the love that initially defined their relationship. Jay works from both sides -- sharing the perspectives of parent and teen as the former struggles for control, the latter for independence. He explains to parents how their teenagers wish to be treated, cared for, and even disciplined, and he shows teens how gaining power can come only from earning respect. In this entertaining, informative, and life-changing book, Jay gives instructions to both sides of the familial gap on: Dos and Don'ts for Parents and Teens Parent and Teen Myths Discovering Your Needs Tuning In to the Needs of Others Ten Ways to Bridge the Gap and Reconnect In finding a common ground and, even more important, a common respect for each other, parents and teens can break down the walls, unlock the doors, and welcome each other back into one another's lives again.

This book provides theoretical clarity about the concepts of failed and fragile states, which have emerged strongly since the 9/11 attacks. Recent contributions often see the fragile state as either a problem of development or of security. This volume argues that that neither perspective on its own is a sufficient basis for good policy. In a wide-ranging treatment, drawing on large samples as well as case studies, the authors create an alternative model of the fragile state emphasizing the multidimensional, multifaceted nature of the "fragile state problematique". On the basis of their model and empirical evidence, they then derive a number of policy-relevant insights regarding the need for contextualized and

ongoing country analysis, the perils and pitfalls of unstructured development assistance, and the need to move whole-of-government approaches from the realm of rhetoric to reality. In offering both a synthesis of existing research and an innovative approach to understanding the fragile state, this volume will be of great interest to students of war and conflict studies, risk, conflict management, and international relations in general. It will also be of use to practitioners in policy circles and to NGOs.

This popular book helps students make the transition from their undergraduate experience to law school learning. Unlike other "introduction to law school" texts, *Bridging the Gap* offers a different approach because it: explains the "why" of law, providing students with the context necessary to understand why law school is taught in a certain manner; explains the "how" of the law, setting out a step-by-step process that will help students adapt to the law school setting; explains the "what" of the law, giving students the opportunity to practice the problem-solving process by providing numerous exercises in a variety of subject matter areas. Rather than giving only general advice, or black letter law and some practice problems for a specific subject, *Bridging the Gap* provides the context, the process, and the problems. Written by two

former law school professors who used these techniques with thousands of students, *Bridging the Gap* is a guide to what really works in law school.
