Bridging the Gap, Breaching Barriers Pearson UK

While the achievement gap has dominated policy discussions over the past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps.

They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, Closing the Opportunity Gap will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive.

Best-selling authors and veteran college writing instructors Laurie Kirsznner and Stephen Mandell believe that students learn to write best when they use their own writing as a starting point. In Writing First with Readings: Paragraphs and Essays, the authors take a simple yet effective approach to helping students improve their writing skills: visual writing prompts open every chapter and get students writing immediately. Then, throughout the chapter, students move between their own writing, writing models and instruction, and workbook-style mastery exercises so that they continually revise, rewrite, and improve their own writing. It is this formula that makes writing instruction meaningful and accessible for students. Thoughtful chapters on academic writing and success, research, and critical reading, along with high-interest essays, round out this new edition, making it the perfect introduction to college writing.

A research-based guide to navigating the newest dating phenomenon--"the love gap"--and a trailblazing action plan to help smart, confident, career-driven women find (and keep) their match. For a rising generation young women, the sky is the limit. Women can be anything and have everything. They are outpacing their male peers in higher education and earning the corner office at work. Smart, driven, assertive women are succeeding at just about everything they do--except romance. Why are so many men afraid to date smart women? Modern men claim to want smarts, success, and independence in romantic partners. Or so says the data collected by scientists and dating websites. If that's the case, why are so many independent, successful women winning in life, but losing in love? Journalist Jenna Birch has finally named the perplexing reason: "the love gap"--or that confusing rift between who men say they want to date and who they actually commit to. Backed by extensive data, research, in-depth interviews with experts and real-life relationship stories, The Love Gap is the first book to explore the most talked-about dating trend today. The guide also establishes a new framework for navigating modern relationships, and the tricky new gender dynamics that impact them. Women can, and should, have it all without settling.

International Approaches to Bridging the Language Gap Rodale

This popular book helps students make the transition from their undergraduate experience to law school learning. Unlike other "introduction to law school" texts, *Bridging the Gap* offers a different approach because it: explains the "why" of law, providing students with the context necessary to understand why law school is taught in a certain manner; explains the "how" of the law, setting out a step-by-step process that will help students adapt to the law school setting; explains the "what" of the law, giving students the opportunity to practice the problem-solving process by providing numerous exercises in a variety of subject matter areas. Rather than giving only general advice, or black letter law and some practice problems for a specific subject, *Bridging the Gap* provides the context, the process, and the problems. Written by two former law school professors who used these techniques with thousands of students, *Bridging the Gap* is a guide to what really works in law school.

In the age of information, an essential priority in the context of international education is the development of language learning and its inconsistencies. The gap between language and education has intermittently grown through time, with mistaken assumptions about how linguistic shortcomings are being solved around the world. Research on comparative educational approaches to teaching verbiage and the foundation of future language development are

instrumental in positively impacting the global narrative of dialectal education. *International Approaches to Bridging the Language Gap* is a collection of innovative research on the methods and applications of second language teaching as well as social developments regarding intercultural learning. While highlighting topics including curricular approaches, digital competence, and linguistic disparities, this book is ideally designed for language instructors, linguists, teachers, researchers, public administrators, cultural centers, policymakers, government officials, academicians, researchers, and students seeking current research on the latest advancements of multilingual education.

Two coaches to Fortune 500 companies and social enterprises show how to use the social-psychology of human connection and curiosity to drive meaningful workplace communication and collaboration In today's increasingly polarized world, we're struggling to fully understand and respect one other. As a result, we're losing sight of the importance of building and maintaining professional relationships; even forgetting to be curious and listen to each other. And that's bad for business. *Bridge the Gap* explores the intersection of how your biology and biography define, refine, and contribute to your presence and behavior in relationships where you struggle to connect. Focusing on personal responsibility and awareness, meta-cognition, and curiosity, the book provides you with a reliable and replicable framework to increase open communication and foster better relationships at work. The authors illuminate the raw power of the human brain and mind, and how they impact the way you connect, communicate, and collaborate with people. They offer a deep dive into how you can better cooperate with people at work, especially when you struggle with differences. *Bridge the Gap* helps you: • Master your biological reactions when pressure, stress, and anxiety hijack your efforts to connect • Understand how you and others can better communicate and collaborate • Lead with curiosity in all your communication strategies and learn how to give authentic feedback • Feel more comfortable working on diverse teams, embracing all cultural backgrounds Whether you're entry level staff or a C-Suite

executive, you'll learn how to communicate clearly with a broad spectrum of people and navigate a wide range of emotions in virtually any situation. Rather than focus solely on the mechanics of "difficult" conversations, the authors illustrate how your presence, curiosity, and language can foster better interactions and outcomes with others. Filled with practical exercises, memorable analogies, and colorful stories, *Bridge the Gap* provides everything you need to build solid workplace relationships in nearly any situation.

There is a widening divide between the data, tools, and knowledge that international relations scholars produce and what policy practitioners find relevant for their work. In this first-of-its-kind conversation, leading academics and practitioners reflect on the nature and size of the theory-practice divide. They find the gap varies by issue area and over time. The essays in this volume use data gathered by the Teaching, Research, and International Policy (TRIP) Project over a fifteen-year period. As a whole, the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so. Individual chapters explore these questions in the areas of trade, finance, human rights, development, environment, nuclear weapons and strategy, interstate war, and intrastate conflict. Each substantive chapter is followed by a response from a policy practitioner, providing their perspective on the gap and the possibility for academic work to have an impact. *Bridging the Theory-Practice Divide in International Relations* provides concrete answers and guidance about how and when scholarship can be policy relevant.

Closing the Gap in a Generation Bridging the Gap

"[A] wickedly funny Philadelphia picaresque about a secular Muslim's identity crisis in a country waging a never-ending war on terror." —O, The Oprah Magazine Ali Eteraz's much-anticipated debut novel is the story of M., a supportive husband, adventureless dandy, lapsed believer, and second-generation immigrant who wants nothing more than to host parties and bring children into the world as full-fledged Americans. As M.'s life gradually fragments around him—a wife with a chronic illness, a best friend stricken with grief, a boss jeopardizing a respectable career—M. spins out into the pulsating underbelly of Philadelphia, where he encounters others grappling with fallout from the war on terror. Among the pornographers and converts to Islam, punks and wrestlers, M. confronts his existential degradation and the life of a second-class citizen. Darkly comic, provocative, and insightful, *Native Believer* is a startling vision of the contemporary American experience and the human capacity to shape identity and belonging at all costs. "Native Believer stands as an important contribution to American literary culture: a book quite unlike any I've read in recent memory, which uses its characters to explore questions vital to our continuing national discourse around Islam." —The New York Times Book Review "A page-turning contemporary fiction that addresses burning issues about the very essence of identity, and without question Ali Eteraz is a writer's writer, one whose ear for the English language is just as acute as fellow naturalized Americans Vladimir Nabokov (born in Russia) or Viet Thanh Nguyen (Vietnam)." —Los Angeles Review of Books
