## Bridging the Gap Between Practice and Research Rowman & Littlefield

The achievement gap between white students and African American and Hispanic students has been debated by scholars and lamented by policymakers since it was first documented in 1966. The average black or Hispanic secondary school student currently achieves at about the same level as the average white student in the lowest quartile of white achievement. Black and Hispanic students are much less likely than white students to graduate from high school, acquire a college or advanced degree, or earn a middle-class living. They are also much more likely than whites to suffer social problems that often accompany low income. While educators have gained

an understanding of the causes and effects of the education achievement gap, they have been less successful in finding ways to eliminate it—until now. This book provides, for the first time in one place, evidence that the achievement gap can be bridged. A variety of schools and school reforms are boosting the achievement of black and Hispanic students to levels nearing those of whites. Bridging the Achievement Gap brings together the findings of renowned education scholars who show how various states, school districts, and individual schools have lifted the achievement levels of poor and minority students. The most promising strategies include focusing on core academic skills, reducing class size, enrolling students in more challenging courses, administering annual achievement assessment tests, creating schools with a culture of competition and success, and offering vouchers in big-city school districts. While implementing new educational programs on a large scale is fraught with difficulties, these successful reform efforts offer what could be the start of widespread effective solutions for bridging the achievement gap.

Every military must prepare for future wars despite not really knowing the shape such wars will ultimately take. As former U.S. Secretary

---

of Defense Robert Gates once noted: "We have a perfect record in predicting the next war. We have never once gotten it right." In the face of such great uncertainty, militaries must be able to adapt rapidly in order to win. Adaptation under Fire identifies the characteristics that make militaries more adaptable, illustrated through historical examples and the recent wars in Iraq and Afghanistan. Authors David Barno and Nora Bensahel argue that militaries facing unknown future conflicts must nevertheless make choices about the type of doctrine that their units will use, the weapons and equipment they will purchase, and the kind of leaders they will select and develop to guide the force to victory. Yet after a war begins, many of these choices will prove flawed in the unpredictable crucible of the battlefield. For a U.S. military facing diverse global threats, its ability to adapt quickly and effectively to those unforeseen circumstances may spell the difference between victory and defeat. Barno and Bensahel start by providing a framework for understanding adaptation and include historical cases of success and failure. Next, they examine U.S. military adaptation during the nation's recent wars, and explain why certain forms of adaptation have proven problematic. In the final section, Barno and Bensahel conclude that the U.S. military must become much more adaptable in order to address the fast-changing security challenges of the future, and they offer recommendations on how to do so before it is too late.

Three experts on equity and technology offer concrete, evidence-based strategies for classroom teachers to move toward digital equity in K12

settings. Closing the Gap is an ISTE book series designed to reflect the contributions of multiple stakeholders seeking to ensure that digital equity is achieved on campuses, in classrooms, and throughout education. In this series, authors Nicol R. Howard, Sarah Thomas, and Regina Schaffer offer historical and philosophical insights while exploring challenges and solutions unique to teacher preparation programs, pre-service and in-service teachers, and instructional coaches. The second title in the Closing the Gap series, this book includes:

- Examination of digital equity and the "problem of practice" for teachers and coaches
- Strategies for connecting the ISTE Educator and Student Standards to practice
- Discussion of key challenges facing teachers in today's classrooms, such as access, connectivity, limited resources, digital divide, and the homework gap
- Research-based vignettes from teachers who have encountered and conquered some of the challenges addressed in the book, and from edtech coaches who have implemented equity-centered innovative professional development

This book helps teachers address the challenges of teaching in the digital age, providing positive examples and recommendations for achieving digital equity in their classroom communities.

## Press

The United States national-security establishment is vast, yet the United States has failed to meet its initial objectives in almost every one of its major, post-World War II conflicts. Of these troubled efforts, the US wars in Vietnam (1965-73), Iraq (2003-11), and Afghanistan (2001-present) stand out for their endurance, resource investment, human cost, and miscalculated decisions. Because overarching policy goals are distant and open to interpretation, policymakers ground their decisions in the immediate world of short-term objectives, salient tasks, policy constraints, and fixed time schedules. As a consequence, they exaggerate the benefits of their preferred policies, ignore the accompanying costs and requirements, and underappreciate the benefits of alternatives. In *Planning to Fail*, James H. Lebovic argues that a profound myopia helps explain US decision-making failures. In each of the wars explored in this book, he identifies four stages of intervention. First and foremost, policymakers chose unwisely to go to war. After the fighting began, they inadvisably sought to extend or expand the mission. Next, they pursued the mission, in abbreviated form, to suboptimal effect. Finally, they adapted the mission to exit from the conflict. Lebovic argues that US leaders were effectively planning to fail whatever their hopes and thoughts were at the time the intervention began. Decision-makers struggled less than they should have, even when conditions allowed for good choices. Then, when conditions on the ground left them with only bad choices, they struggled furiously and

more than could ever matter.

Policymakers allowed these wars to sap available capabilities, push US forces to the breaking point, and exhaust public support. They finally settled for terms of departure that they (or their predecessors) would have rejected at the start of these conflicts. Offering a far-ranging and detailed analysis, this book identifies an unmistakable pattern of failure and highlights lessons we can learn from it.

Nearly two-thirds of countries that pursued nuclear weapons have abandoned their programs. *Delaying Doomsday* examines how the United States has successfully persuaded states to give up their nuclear weapons programs in the past, and how the international community can continue this success in the future. The book draws on interviews with current and former policymakers, as well as in-depth case studies of India, Iran, and North Korea to provide policy recommendations on how best to manage nuclear proliferation challenges from rogue states. It also outlines the proliferation horizon, or the set of state and non-state actors that are likely to have interest in acquiring nuclear technology for civilian, military, or

unknown purposes. The book concludes with implications and recommendations for U.S. and global nuclear counterproliferation policy. Bridging the Family Care Gap Akashic Books

Helps to ease the transition between school/college and university mathematics by (re)introducing readers to a range of topics that they will meet in the first year of a degree course in the mathematical sciences, refreshing their knowledge of basic techniques and focussing on areas that are often perceived as the most challenging. Each chapter starts with a "Test Yourself" section so that readers can monitor their progress and readily identify areas where their understanding is incomplete. A range of exercises, complete with full solutions, makes the book ideal for self-study.

What happens when you die? How does one transcend mankind to heavenly being, the known to the eternal mystery? One spring day in 1971, Calvin Cassady, a southwest Missouri teenager, was a victim in an unexplained automobile accident on a curvy Ozark mountain roadway. The impact caused the car that Calvin was a passenger in to burst into flames, plunging him into a clouded existence that included a walk through the valley of the shadow of death, leaving him on the threshold of eternal life. Eternity surrounded him and filled him with an absolute certainty of heaven. Standing before the Master and all his creation Calvin became troubled with the vision of his judgment and the life that he brought with him. Consumed with

feelings of emptiness, he needed fulfillment. Bridging the Gap is the story of that miraculous event and the life of fulfillment that followed. Experience that fulfillment through Calvins spouse, his children, his students, his friends, and through the lives of total strangers as they became players in the great spiritual adventures of his life. Observe as the Holy Spirit guides Calvin through natural disasters and serious health issues, and feel the love as he takes into the mission field. Bridging the Gap celebrates the ordinary and illustrates the extraordinary results that occur during a lifetime lived for Christ. While you continue your spiritual journey, remember that faith, hope, and love conquer all. May your journey be fruitful, and may Gods peace be with you.

Today, most substance abuse treatment is administered by community-based organizations. If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment, the treatment would be much more effective and efficient. The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field. Informed by real-life experiences in addiction treatment including workshops and site visits, Bridging the Gap Between Practice and Research examines why research remains remote from treatment and makes specific recommendations to community providers, federal and state agencies, and other decision-makers. The book outlines concrete strategies

---

for building and disseminating knowledge about addiction; for linking research, policy development, and everyday treatment implementation; and for helping drug treatment consumers become more informed advocates. In candid language, the committee discusses the policy barriers and the human attitudes — "the stigma, suspicion, and skepticism" — that often hinder progress in addiction treatment. The book identifies the obstacles to effective collaboration among the research, treatment, and policy sectors; evaluates models to address these barriers; and looks in detail at the issue from the perspective of the community-based provider and the researcher.

While the achievement gap has dominated policy discussions over the past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S.,

children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, Closing the Opportunity Gap will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive. Program Materials for 11th Bridge-the Gap Seminar, January 10-12, 1975, at Atlanta, Georgia International Society for Technology in Education This book includes a discussion of the many possible definitions of popular music, information on how popular musicians learn, and specific examples of educational programs that incorporate popular music with suggestions on how to choose high quality repertoire. --From publisher's description.

A research-based guide to navigating the newest dating phenomenon--"the love gap"--and a trailblazing action plan to help smart, confident, career-driven women find (and keep) their match. For a rising generation young women, the sky is the limit. Women can be anything and have everything. They are outpacing their male peers in higher education and earning the corner office at work. Smart, driven, assertive women are succeeding at

just about everything they do--except romance. Why are so many men afraid to date smart women? Modern men claim to want smarts, success, and independence in romantic partners. Or so says the data collected by scientists and dating websites. If that's the case, why are so many independent, successful women winning in life, but losing in love? Journalist Jenna Birch has finally named the perplexing reason: "the love gap"--or that confusing rift between who men say they want to date and who they actually commit to. Backed by extensive data, research, in-depth interviews with experts and real-life relationship stories, The Love Gap is the first book to explore the most talked-about dating trend today. The guide also establishes a new framework for navigating modern relationships, and the tricky new gender dynamics that impact them. Women can, and should, have it all without settling.

The book's inherent value, currently, is in its uniqueness. There are few books on Integrative Oncology (IO). There are few books on the entirety of traditional Chinese medicine in the treatment of cancer. There are even fewer, if any, books that deal with the topics of Integrative Oncology and the use of traditional Chinese medicine as a whole in the treatment of people with cancer. While very broad and deep topics, this makes for a varied audience of interest that includes not just the TCM practitioner or student, but Western health practitioners and patients as well as laypeople

interested in the topic of oncology. For those interested in the topic of IO, it gives one of the few non-biased, honest and critical views of the state of IO in contrast to what is promoted by various institutions and societies. For the Western health practitioner and/or patient, many of whom are completely unfamiliar with TCM and how it works or can be used, it provides information on the breadth of TCM and how it can be applied in various ways to help improve outcomes. For the TCM practitioner or student, it provides much needed information on how to go about caring for a patient with cancer to include clinical pearls and important Western medical information and terminology.

“ [A] wickedly funny Philadelphia picaresque about a secular Muslim ’ s identity crisis in a country waging a never-ending war on terror. ” —O, The Oprah Magazine Ali Eteraz ’ s much-anticipated debut novel is the story of M., a supportive husband, adventureless dandy, lapsed believer, and second-generation immigrant who wants nothing more than to host parties and bring children into the world as full-fledged Americans. As M. ’ s life gradually fragments around him—a wife with a chronic illness, a best friend stricken with grief, a boss jeopardizing a respectable career—M. spins out into the pulsating underbelly of Philadelphia, where he encounters others grappling with fallout from the war on terror.

Among the pornographers and converts to Islam, punks and wrestlers, M. confronts his existential degradation and the life of a second-class citizen. Darkly comic, provocative, and insightful, *Native Believer* is a startling vision of the contemporary American experience and the human capacity to shape identity and belonging at all costs. “ *Native Believer*
