Serving At-Risk

Teens Simon and Schuster  
In Bridging the Gap, Glen Williams takes readers on a police officer's journey from optimistic rookie to jaded veteran and shares traumatic events he experienced and how they developed into PTSD. He describes how he built walls to protect himself, stopped communicating, and how this led to two divorces. Glen then talks about how he relearned to open up, communicate openly and develop the good

relationship he now lives in. Bridging the Gap gives ways to deal with and reduce stress and ways to take traumatic events and rephrase them so they can be shared safely, thus, bridging the gap in communication that has been created.

In the age of information, an essential priority in the context of international education is the development of language learning and its inconsistencies.

The gap between language and education has intermittently grown through time, with mistaken assumptions about how linguistic shortcomings are being solved around the world.

Research on comparative educational approaches to teaching verbiage and the foundation of future language development are instrumental in positively impacting the global narrative of dialectal education.

International  
Approaches to

Bridging the Language Gap is a collection of innovative research on the methods and applications of second language teaching as well as social developments regarding intercultural learning. Although two federal panels have concluded that all students can learn mathematics and most can succeed through Algebra 2, the abstractness of algebra and missing precursor understandings may be overwhelming to many students ... and their teachers. *Bridging the Gap Between Arithmetic & Algebra* responds to this need for instruction and interventions that go beyond typical math lesson plans. Providing a

review of evidence-based practices, the book is an essential reference for mathematics teachers and special education teachers when teaching mathematics to students who struggle with the critical concepts and skills necessary for success in algebra.

While the achievement gap has dominated policy discussions over the

past two decades, relatively little attention has been paid to a gap even more at odds with American ideals: the opportunity gap. Opportunity and achievement, while inextricably connected, are very different goals. Every American will not go to college, but every American should be given a fair chance to be prepared for college. In communities across the U.S., children lack the crucial resources and opportunities, inside and outside of schools that they need if they are to reach their potential. Closing the Opportunity Gap offers accessible, research-based essays written by top experts who highlight the discrepancies that

---

exist in our public schools, focusing on how policy decisions and life circumstances conspire to create the "opportunity gap" that leads inexorably to stark achievement gaps. They also describe sensible policies grounded in evidence that can restore and enhance opportunities. Moving beyond conventional academic discourse, Closing the Opportunity Gap will spark vital new conversations about what schools, parents, educators, and policymakers can and should do to give all children a fair chance to thrive.

### **The Death Gap**

Routledge

- Chronicles the first all-African American summit attempt on Denali, the highest point in North

America • Part adventure story, part history, and part argument for the importance of inspiring future generations to value nature The nation's wild places—from national and state parks to national forests, preserves, and wilderness areas—belong to all Americans. But not all of us use these resources equally. Minority populations are much less likely to seek recreation, adventure, and solace in our wilderness spaces. It's a difference that African American author James Mills addresses in his new book, *The Adventure Gap: Changing the Face of the Outdoors*. Bridging the so-called "adventure gap" requires role models

who can inspire the uninitiated to experience and enjoy wild places. Once new visitors are there, a love affair often follows. This is important because as our country grows increasingly multicultural, our natural legacy will need the devotion of people of all races and ethnicities to steward its care. In 2013, the first all-African American team of climbers, sponsored by the National Outdoor Leadership School (NOLS), challenged themselves on North America's highest point, the dangerous and forbidding Denali, in Alaska. Mills uses Expedition Denali and its team members' adventures as a jumping-off point to explore how minority

---

populations view their place in wild environments and to share the stories of those who have already achieved significant accomplishments in outdoor adventures—from Mathew Henson, a Black explorer who stood with Peary at the North Pole, to Kai Lightner, a teenage sport climber currently winning national competitions. The goal of the expedition, and now the book, is to inspire minority communities to look outdoors for experiences that will enrich their lives, and to encourage them toward greater environmental stewardship.
