Today, most substance abuse treatment is administered by community-based organizations. If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment, the treatment would be much more effective and efficient. The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field. Informed by real-life experiences in addiction treatment including workshops

and site visits, Bridging the Gap Between Practice and Research examines why research remains remote from treatment and makes specific recommendations to community providers, federal and state agencies, and other decisionmakers. The book outlines concrete strategies for building and disseminating knowledge about addiction; for linking research, policy development, and everyday treatment implementation; and for helping drug treatment consumers become more informed advocates. In candid language, the committee discusses the policy barriers and the human attitudes--the stigma, suspicion, and skepticism--that often hinder progress in addiction treatment. The book identifies the obstacles to effective collaboration among the research, treatment, and policy sectors; evaluates models to address these barriers; and

---

looks in detail at the issue from the perspective of the community-based provider and the researcher.

Today's children are tomorrow's citizens. Good health and well-being in the early years are the foundations for well-adjusted and productive adult lives and a thriving society. But children are being let down in Australia and elsewhere by the lack of knowledge transfer between the worlds of research, policy and practice. Improving such transfer is

the job of knowledge brokers - the various ways they can operate are explored in this book through case examples and the lessons learned from experienced proponents. The book concludes by posing three sets of ideas to shape the future of knowledge brokering.

This volume is an orchestrated critique of the notion that individuals from lower socioeconomic status communities have inferior language skills as compared to middle- and upper-class groups. The idea of this so-called " language gap " stems in large part from Hart and Risley ' s (1995) publication *Meaningful Differences in the Everyday Experience of Young American Children*. Hart and Risley proposed that by age 3, children from more economically affluent households were exposed to approximately 30 million more words than children from low-income backgrounds. They also claimed that this gap in exposure to words negatively impacts cognitive development and eventual academic achievement. The contributing authors in this book contest the original concept of a " language-gap " as well as the recent swell of academic research and public programs that it has produced. The chapters interrogate the linguistic, academic, cultural, and social implications of the " language-gap " by providing critical accounts grounded in the scholarly disciplines of sociolinguistics, anthropology, and education. This book was originally published as a special issue of the *International Multilingual Research Journal*. *Proceedings of a Workshop American Society for Training and Development*

How Smart Companies Turn Knowledge Into Action Rainbow Bridge Publishing

Written for the mid to high-level developmental reading course, Bridging the Gap, by Brenda Smith continues to be the #1 textbook choice of developmental reading educators. Bridging the Gap was the first book to focus on how to read college textbooks. Over the course of several editions, this theme has been broadened by linking textbook readings to recent news in the popular press and adding material on critical thinking and the Internet. A hallmark of the text, the end-of-chapter readings represent three different reading levels (9th-10th, 10th-12th, 12th+) to permit individualization of assignments to meet varying student needs. A variety of academic disciplines are represented throughout, including psychology, history, biology, business, allied health, English literature, and more.

The Case Approach to Financial Planning: Bridging the Gap between Theory and Practice, Fourth Edition, fosters sound planning logic and decision-making using the systematic financial planning process approach. This textbook provides the tools and foundation for preparing a financial plan and provides students with a real-world demonstration of how a financial plan is developed. The text features: A content review of all of the major subject areas in the financial planning curriculum set in the context of the financial planning process. A variety of case studies: The Bedo Family Case serves as the foundation for writing a comprehensive financial plan. Questions and discussion related specifically to the Bedo case run through the entire book. Chapter-based case examples illustrate how financial

planning recommendations are developed to help clients meet goals and objectives. End-of-chapter mini-cases and questions challenge students to apply chapter content.

Quantitative/analytical mini-cases feature multiple-choice questions and answers, designed to develop a student's ability to analyze, evaluate, and synthesize strategies to create appropriate recommendations matched to the clients. A separate ethics case tests knowledge of securities rules and financial planning practice standards. Chapter-based learning aids for focus and retention of key information: Key Terms, Learning Objectives linked to end-of-chapter Learning Outcomes, and End-of-Chapter Questions and Resource Lists. And, new and expanded coverage for the fourth edition includes: 14 newly updated chapters that explore all levels of financial planning issues--from budgeting to estate planning. The latest tax and financial information. Updated content to comply with the latest CFP Board requirements. Newly enhanced learning tools including: key terms; visual reminders of key points throughout each chapter; and self-tests. Updated content on planning for special populations, including same-sex couples. Updated case problems throughout. Enhanced visuals to clarify complex content.

A pressing challenge in the modern health care system is the gap between education and clinical practice. Emerging technologies have the potential to bridge this gap by creating the kind of team-based learning environments and clinical approaches that are increasingly necessary in the modern health care system both in the United States and around the world. To explore these technologies and their potential for improving education and practice, the National Academies of Sciences, Engineering, and Medicine hosted a workshop in November 2017. Participants explored effective use of technologies as tools for bridging identified gaps within and between

health professions education and practice in order to optimize learning, performance and access in high-, middle-, and low-income areas while ensuring the well-being of the formal and informal health workforce. This publication summarizes the presentations and discussions from the workshop.

In the age of information, an essential priority in the context of international education is the development of language learning and its inconsistencies. The gap between language and education has intermittently grown through time, with mistaken assumptions about how linguistic shortcomings are being solved around the world. Research on comparative educational approaches to teaching verbage and the foundation of future language development are instrumental in positively impacting the global narrative of dialectal education. *International Approaches to Bridging the Language Gap* is a collection of innovative research on the methods and applications of second language teaching as well as social developments regarding intercultural learning. While highlighting topics including curricular approaches, digital competence, and linguistic disparities, this book is ideally designed for language instructors, linguists, teachers, researchers, public administrators, cultural centers, policymakers, government officials, academicians, researchers, and students seeking current research on the latest advancements of multilingual education.

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying

neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Geared for undergraduate and graduate students, *Goal Writing for the Speech-Language Pathologist and Special Educator* details different types of goals, essential elements of goals, how to establish goals from information garnered from evaluations, and how to write continuing goals for the field of Speech-Language Pathology and Communication Sciences. It is written for students in a Clinical Methods/Clinical Practicum course who are about to begin their clinical experience in SLP. Real-world exercises are provided throughout in order to provide realistic examples of what students may encounter in speech and hearing clinics, hospitals, and schools. Goal writing is practiced by SLPs on a daily basis, and understanding how to turn diagnostic information into therapy is a difficult, yet crucial, task. This important subject is not covered in depth in other clinical methods titles yet is a skill all students and clinicians must master.

The Case Approach to Financial Planning: Bridging the Gap Between Theory and Practice, Fourth Edition Georgetown University Press

Drei Jahre nach der Einführung der Europäischen Bürgerinitiative (EBI) bietet der Band einen kritischen, wenngleich vorsichtig optimistischen Ausblick auf die Möglichkeiten und Grenzen dieses neuen Instruments transnationaler partizipativer Demokratie in der Europäischen Union. Der Band verbindet theoretische Diskussionen zum Wesen und Beitrag der EBI mit empirischen Perspektiven zu den Erfahrungen jener ersten Initiativen, die seit April 2012 auf den Weg gebracht wurden. Als partizipativ-demokratisches Instrument ist die EBI nur schwer einzuordnen, da sie lediglich eine indirekte Agenda-Setting-Funktion erfüllt. Ebenso konnte die EBI bisher nur ansatzweise den hohen Erwartungen gerecht werden, die von wissenschaftlicher Seite, aber auch von Aktivisten und EBI-Organisatoren in sie gesetzt wurden. Dementsprechend zwiespältig fällt auch das Fazit des Bandes aus: Während die EBI ohne Zweifel großes Demokratisierungspotential besitzt, deuten die Erfahrungen der ersten drei Jahre sehr stark auch auf großen Reformbedarf hin. Mit Beiträgen von: Jeannette Behringer, Carsten Berg, Katrin Böttger, Maximilian Conrad, Marie Dufresne, Louis Bouza Garcia, Pawel Glogowski, Justin Greenwood, Annette Knaut, Julian Plottka, Yannick Polchow und Freyja Steingrimsdóttir.

an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, *Crossing the Quality Chasm* also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.
